Supply

of subsidies, when in fact it is much less than that in the dairy industry. Rather than \$8.8 billion, the dairy industry is only getting \$266 million in direct subsidies.

LOW-LEVEL FLIGHTS

Mr. Ray Funk (Prince Albert—Churchill River): Mr. Speaker, it is my honour and privilege to present a petition to this House signed by Canadians from western Canada, including places like Steinbach, Manitoba; Saskatoon, Rosthern and Carlton, Saskatchewan; and other points in western Canada.

These people are asking the government to stop the low-level flight training program as it affects aboriginal people both in Labrador and in other parts of Canada. They are happy that the training base will not be established and that the military has agreed not to escalate flights.

However, they would like all flights to end and that money to be directed toward developing a sustainable society among aboriginal people.

FOOD AND DRUGS

Mr. Francis G. LeBlanc (Cape Breton Highlands—Canso): Mr. Speaker, I am pleased to present petitions today from almost 100 members of my constituency who are calling for the government to enact legislation amending food and drug regulations.

The petitioners feel that the new legislation is necessary and that it would require both manufacturers and restaurateurs to provide a specific list of food ingredients and additives in their prepackaged and prepared foods.

Perhaps this legislation would prevent the needless deaths from food allergies, like that of 15-year old Robyn Allen who died from consuming food that had peanut oil in it; he was strongly allergic to peanut oil.

There are many other Canadians who are in that situation. That is the purpose of this petition. It is supported by a private member's bill which was introduced in April by the hon. member for Hamilton East.

GOODS AND SERVICES TAX

Mr. Neil Young (Beaches—Woodbine): Mr. Speaker, I too have the honour to present a petition sponsored by the Writers' Union of Canada.

The petition has been signed by Canadians from coast to coast, many in my own constituency. It reads: whereas the Government of Canada has seen fit, since Confederation and without hiatus, to apply a zero rate of tax to magazines, books and newspapers and, now proposes to include them in GST and whereas uninhibited dissemination of the printed word as a cornerstone of democracy, culture, education and a literate and productive society will be negatively affected by GST application, wherefore the undersigned, your petitioners, humbly pray and call upon Parliament to reaffirm the historic principles embodied in tax–free status for the printed word by retaining the zero rate in the GST legislation on regulations

QUESTIONS ON ORDER PAPER

Mr. Albert Cooper (Parliamentary Secretary to Leader of the Government in the House of Commons): Mr. Speaker, I ask that all questions be allowed to stand.

The Acting Speaker (Mr. DeBlois): Is it agreed? Some hon. members: Agreed.

ALLOTTED DAY, S. O. 81-RAFFERTY-ALAMEDA PROJECT

Mr. Simon de Jong (Regina-Qu'Appelle) moved:

That this House urge the Minister of the Environment to revoke the Rafferty-Alameda project licence and use all federal authority to prevent Saskatchewan from proceeding with project construction until an independent environmental assessment panel has completed its review.

He said: Mr. Speaker, it is a pleasure for me today to lead off the debate on this motion.

What we are concerned with is a very important issue. It is not just an issue of concern with the province of Saskatchewan, but how this issue is resolved will exhibit
