The power of Dodd's Kidney Pills has for some time past been unanimously admitted, in this town, for we have had absolutely convincing proof of it. Mr. W. G. Cragg, a prominent merchant, and ex-reeve of Dresden, was for eight years a sufferer from Inflam-matory Rheumatism, aggravated by Gout. Our most skillful doctors failed to relieve him, and not till he began using Dodd's Kidney Pills did he find a cure. Six boxes cured him completely. He is now attending to business every

Solomon Jacobs, of Cleveland, who swindled Max Bernstein, of the same place, out of \$14,000 in New York last November through a "gold dust" trick, has been sentenced to eight years in Sing Sing. Jacobs obtained \$14,000 for brass which he represented to be gold. Worms cause feverishness, moaning and restlessness during sleep. Mother Graves' Worm Exterminator is pleasant, sure and effectual. Review of the Outlook Up to Date.

Hon. George W. Ross at Chesley-The Situation in North Oxford.

THE OUTLOOK. The forces are now arrayed from Essex to Glengarry, and the battle is progressing earnestly, quietly, and, from the Liberal standpoint, most satisfactorily. With one exception all the nominations are made that will be made, and each candidate knows just whom he has to fight. The exception referred to is East Toronto, and the Liberals of that riding, who meet tomerrow evening to nominate, have for some time been actively at work organizing in the interest of the candidate to be se-

From the different constituencies come most encouraging reports. There is a sustained confidence among the Liberals that has grown and grown until at the present time with the splendid set of candidates in the field it is felt that there can be but one result, and that victory will as surely await the appeal of the Hardy government as during the past quarter of a century it crowned the successive campaigns of the Mowat government.

HON. GEORGE W. ROSS AT CHES-

LEY. Chesley, Feb. 9.—There was a packed hall here last night in the interests of Mr. Malcolm, Liberal candidate for this riding. So great was the crush that A Meeting in Mr. Hodgens' Into push his way through the crowd and was compelled to enter the building through the window by means of a ladder. A number of enthusiastic Mr. Shore, M. P. P., Shows the Holledge. followed the example of the minister of education, and courageously mounted the ladder, and were thoroughly rewarded for their efforts by the applause of their friends.

NORTH OXFORD. Woodstock, Feb. 11.-The political situation in North Oxford is increasing in interest. Mr. Louis Kaufman, who has been chosen by a caucus of his friends to oppose Mr. Pattullo as an independent, appears to be in earnest in his decision to enter the field.

Mr. Pattullo's chances for re-election are of the brightest character, the general impression being that opposition will be entirely futile.

PARRY SOUND NOMINATION. Parry Sound, Feb. 10.-The Liberal convention to select a candidate for the forthcoming election was held here today. Mr. R. Watson, of Burk's Falls, was unanimously nominated. The campaign opens now in earnest, and it promises to be a three-cornered contest, as a section of the Conservative party express their determination to bring out a straight party nominee. Mr. W. R. Beatty remains in the field as an independent.

SPECIMEN MISSTATEMENTS. As a maker of reckless statements and as a repudiator Mr. Whitney excells. His performances in the former capacity when on the stump, and as a repudiator when on the floor of the legislature, when taken to task about some of the statements he made during his fall campaign, are too fresh firm; creamery, 13c to 19c; dairy, 11c in the memory to need recalling. But there is one statement made in a Conservative paper published in his own constituency, which he has not yet denied or repudiated. The opposition leader is reported to have said that the commission appointed to inquire into the cost of the school books was a partisan one and comprised among its members a paper manufac-turer and a publisher. What are the facts? 1 e commission was composed of His Honor Judge Morgan, Mr. Bain, jun., of the Toronto Free Library, and Mr. C. Blackett Robinson, publisher of the Westminster. The first two are Conservatives, and neither of them is a paper manufacturer, and Mr. Robinson not a book publisher. Yet knowing the composition of the commission, Mr. Whitney had the temerity to make the statement that he did. Can such a repudiater and maker of reckless statements be trusted with the destinies of this great Province?-Stratford Bea-

con. "WHY?" THAT IS THE QUES-TION.

The Whitneyites profess to regard the sums voted to aid railways as constituting an enormous debt, variously stated according to the recklessnes of the organ, at 5,000,000 to 10,000,000. What are the fact ? The total aid voted, and to be splead over 40 years, is \$2,769,358. The reader may form his own opinion of the character of the men or newspape's which magnify this into a debt of \$5,000,000 or \$10,000,-000. The government has evolved and put into use a scheme of selling annuities realizing to the purchasers about 3 per cent. It gets 5 per cent on its investments. The purchase money of the annuities pays the railway subsidies as they fall due, and by time the accounts are squared the government's profit on the interest pays off the annuities and leaves the government's capital untouched. The Tory cry, "Why sell annuities if you have a surplus?" is in a very absurd one. Why should a man sell securities bringing him 5 per cent when he can get money at 3 per cent, thus making 2 per cent profit, a rate that is 40 years will amount to the original capital?-Hamilton Times.

A LIBERAL GAIN. Says the Toronto Star: Dr. McKay, M.P.P., was in the city yesterday. Dr. McKay's own riding in South Brant is so strongly Liberal that he has a good opportunity to stump for the Liberal interests. He has just returned from East Middlesex, where he went on behalf of Dr. McWilliam. He says that the Liberals are quite sure to redeem the riding, which is now held by a Patron."

In Westminster.

Lambeth, Feb. 11.-Last night a meeting in the interests of Mr. T. D. Hodgens, of London city, Conservative nominee for East Middlesex, was held here. There was not a large audience, but the weather was not propitious. Mr. Richard Robinson pre-

Mr. Hodgens had a good hearing. He made an address on the lines of the speech given by him in West London. He considered that the government of Ontario were strongly fortified in power. There was not a cross-road where someone was not continually promoting the interests of the government. They were altogether too kind to their friends. In conclusion, Mr. Hodgens referred to his failure in business, but claimed that he was an honorable man. He referred to the Liberal speakers at West London as "city

on the programme. Mr. Shore, member for the riding in last legislature, appeared and explained that he and his fellow-Patrons in the legislature had found the opposition to be wrong on the piggery issue, and they therefore had voted against Mr. St. John and his associates, who attacked the govern-ment. Mr. Shore explained that the Ontario government was in no sense to blame for the outbreak of hog cholera in the Humber piggery, nor for the methods pursued in stamping it out. If anyone was to blame it was the Dominion inspector, who was one of the strongest Conservatives in the Dominion. He had ordered the pigs to be killed, and had disposed of them in precisely the same manner as he had followed in the hog cholera outbreaks on farms in Essex and Southwold. He did not defend the government for establishing that piggery, because it would always cost more for a government to set up a piggery than for a farmer. As to his record as a Patron, he claimed that he and his associates had exercised their influence on the side of economy, and had aided in saving the province \$250,000 in four years. He had stood on the Patron platform. Mr. Henry Macklin, one of the P. P. A. leaders in London, made an attack on Hon. George W. Ross for his management of the schools, attacked Hon. Mr. Dryden for the management of the Agricultural College, said there was no surplus, and further said that Sir Wm. Meredith, whom he lauded to the skies in 1894, was not a shrewd politician. Mr. Whitney had refused to caught in the same way as Mr. Meredith was and the former leader had aided in improving the laws, but Mr. Whitney had refused to say how he would remedy wrongs-until he got into office!

LEGAL DECISIONS

In Cases Affecting Huron, Essex and Lambton. The following cases came up at Osgoode Hall, Toronto, on Thursday: Re Beattie vs. Holmes—Judgment on

appeal by defendant from the order of Meredith, C. J., in chambers, dismissing a motion for prohibition to the third division court, in the county of Huron. The plaint in the division court was by the assignee for creditors of one Hanna to recover \$13 39 from the defendant, a creditor of Hanna, to whom it was paid by one Wilson, to whom Hanna had transferred a lot of butter for the benefit of defendant and others of his creditors. Wilson sold the butter and distributed the proceeds among the creditors. The butter was sold in September for \$1,800, and the proceeds distributed prior to the assignment to the plaintiff for the general benefit of creditors made under the assignments act, on Oct. 2. The transfer of the butter to Wilson was within 60 days of the assignment. Held, that the plaintiff, as assignee, had creditors elected to avoid the transfer as to each of the creditors who had received a part of the proceeds. The transfer was divisible into as many parts as there were creditors. There was no dealing with Wilson except as a conduit through whom the butter might be turned into money and paid over to the beneficiaries. Each creditor might have the means of defending the payment made to him by showing such a state of facts as would rebut the presumption of fraud or preference. There is no common ground of defense by which the transfer as a whole was to be supported, and, therefore, there was no inquiry before the division court as to any matter not within its competence, for the amount paid to each was within \$100. It was not necessary to consider what might be the re-

sult if the transfer as a whole had to be set aside. Appeal dismissed with costs. D. L. McCarthy for defendant; Aylesworth, Q.C., for plaintiff. Gignac vs. Iler-Judgment on appeal by plaintiff from judgment of Meredith, J., at the trial at Sandwich, dismissing the action, which was against the sheriff of the county of Essex and his bondsmen, for damages for wrongful seizure and conversion of a crop of corn and cornstalks alleged to be the property of plaintiff, but selzed and sold by the sheriff under an execution against one Antilla, who had conveyed to plaintiff the land on which the crop grew. The trial judge held that the crop was not the plaintiff's, because the conveyance to him was an unjust preference, and, therefore, void. Held, that, as there was evidence of a request on the part of plaintiff for the conveyance, to secure him against the liability he was under for Antilla, which amounted to pressure, and the first proceeding taken to impeach the transfer was the actual seizure by the sheriff more than 60 days afterwards, the transfer could not be impeached as a preference. But the transaction was void under the statute of Elizabeth. The statement of the consideration was untrue, because there was, confessedly, no exchange of properties. The onus was upon the plaintiff to prove beyond reasonable doubt that there was some other good consideration. The plaintiff contented himself with giving his own unsup-ported evidence of the existence of a consideration which contradicted the statement in the deed. Under these circumstances, the evidence of the existence of the consideration was insufficient, and the conveyance must be

treated as voluntary. Appeal dismissed

Court. The woman was on the stand, and she was a very nice-mannered, respectable woman, who kept a cheap boarding-house, and it was the desire of one of her guests to be dishonest that had hrought her to the court to make him

pay his board. "How old did you say you were, madam?" inquired the lawyer, with no reason on earth, for an elderly landlady is no more anxious to lose a board bil' than a young one. "I did not say, sir," she responded, flushing to the roots of her hair.

"Will you be kind enough to say, madam? "It's none of your business." "Objection sustained," smiled the "Um," said the lawyer, rubbing his chin, "how much did you say was the amount defendant owed you?"

"Twenty-five dollars." "And for how long was that?" "Five weeks." "That's five dollars a week, isn't it," "Yes, sir." "Five weeks at five dollars a week is twenty-five dollars, I believe you said;

The witness was patient, but her temper was not improved under the "Isn't that an extravagant price to pay for board in that locality, madam?" inquired the attorney, severely. "He didn't pay it, sir," answered the worm, beginning to turn. The lawyer gave a little start of sur-

prise, then became indignant at the very thought of a witness talking like "Don't be facetious on the witness stand, madam," he said, assuming a tone of warning. "This is a serious matter, madam. I have asked if your prices were not exhorbitant, and you have seen fit to answer lightly, madam. Now, madam, I ask you in all earnestness if you mean to tell this court that your prices are moderate, and that if I should come to your house to board you would charge me \$5 a week? Answer directly, madam," and the attor-ney sat back in his chair and assumed

an imperial manner. The witness was not at all abashed. "No, sir," she said, simply. I would "I thought not, I thought not," interrupted the attorney, rubbing his hands. "No, sir," continued the witness, "I would not charge you at all. I would make you pay in advance.' Then the court forgot its dignity, and everybody laughed except the attor-

THE BURIED CITY-POMPEH. About half the town is at present uncovered, and they are still busily engaged in excavation. The superincumbent mass, consisting wholly of volcanic materials, is some twenty feet thick. It is said that the first shower of lava from Vesuvius covered the town to a depth of only about a yard, so that the majority of the inhabitants escaped; still ultimately many lives were lost—the number is estimated at about 2,000. Skeletons are not infrequently found in the volcanic dust, which has solidified so as to form an exact mould of the original figure. Of late the workers have succeeded in running plaster into these, and thus obtaining casts representing the body perfectly. Their accuracy is painful; death seldom seems to have been easy, treated as voluntary. Appeal dismissed with costs. F. D.
