WANTED—Girl for general housework. Good wages. Apply to J. E. WILSON, 100-102, Main Street, St. John. 2-7-11

SAVING AND TEACHING THE AMERICAN BUFFALO

Backed by the enthusiasm of private individuals the governments of the United States and Canada have taken up the question of preservation of the American buffalo, and strenuous efforts are to be made to encourage this patriarch of the western plains to propagate and live in contentment in specially-protected enclosures.

Fifteen of the finest buffaloes in the herd of the New York Zoological Garden were recently shipped and dumped down into the Wichita game preserve, a great range containing twelve square miles of grazing grounds formerly inhabited by the buffalo in the state of Oklahoma. To fence this vast enclosure the United States Government appropriated a sum of \$20,000.

PRACTICAL INTEREST.

Then during the last few months the Canadian Government has been busy transporting 38 of the buffaloes of the Fable-Alford herd to Elk Island Park in Canada. The herd totals 628 animals, for which the Canadian Government has set apart a sum of \$10,000 to purchase and transport them.

The practical interest which the United States and Canada have evinced in the buffalo is no doubt largely due to the efforts of the American Bison Society. It has 700 members, including the leading naturalists, sportsmen, and public men of both the United States and Canada. Curiously enough, the 'person' who has given the most money to further its work is a woman.

The secretary of the society, is Mr. Ernest Harold Baynes, and no institution ever had a more zealous worker. He has discovered new uses to which the buffalo can be put; for instance, he can be broken to harness like any ordinary horse, while his wool is of commercial value.

When Mr. Baynes decided to rouse public interest in the buffalo he went to the authorities in charge of the Furber Island herd, and asked them to turn over to him four calves. He said he would rear them by hand and look after their education.

He raised them on the bottle, two domestic cows supplying the milk. Two of them he broke to harness, and when they were a year old they would open the winter roads after a New Hampshire snowstorm. Mr. Baynes took his team around to sportsmen's shows and agricultural fairs.

He issued a standing challenge against anything of his own age in pulling contest, and against anything of any age in domestic cattle in a speed contest. He never got a taker in pulling, but he did get a taker in speed. He found a taker for the speed contest in a young steer which had been broken to harness by him.

The two little buffaloes had received the gentle names of War Whoop and Tomahawk. The latter was chosen for the race. At the go the startled steer felt a cyclone pass. He caught the pulling of War Whoop's harness, and that was the last he heard of him until he reached the grand stand where a broad expression which indicated that an idle life did not agree with him.

CENSUS OF BUFFALOES.

Then Mr. Baynes has discovered that the wool of the buffalo is of value. In spring these animals shed their hair. It comes out in great handfuls, and they can be sheared like sheep. The application of a little ingenuity. Mr. Baynes took a few handfuls of wool from War Whoop and Tomahawk.

By great energy and good management the bill of the buffalo is being paid. The influence of Mr. Roosevelt as an enthusiastic naturalist, and his influence on the movement, for the buffalo came under the category of the natural resources of the United States. The bill of the buffalo is being paid.

Owing to the absolute necessity of paying the bill of the buffalo for the lands desired an appropriation of \$20,000 has been made and for fencing the land a sum of \$10,000 has been provided. All that remains to be done now is to procure the animals. The stock of the buffalo is being increased by the importation of Canadian cattle to this country.

H. J. SHEPSTONE.

WILL HOLD THEIR OWN AT QUEBEC

Col. White's Tribute to Maritime Brigade

Fine Body of Men, He Says—Camp Sussex Best Held in Years

Colonel G. R. White, D. O. C., told a reporter for The Sun last evening that the militia camp held at Sussex during the past two weeks was the best held there in many years. There were 2,600 men and officers present and there wasn't a rainy day during the camp. The inspecting officers were greatly pleased with the appearance of the men.

Colonel White added that the maritime brigade going to the Quebec tercentenary could not be excelled. The men were all of splendid physique and the colonel declared that they would be able to hold their own with any there.

The troops leave here for Quebec on the 18th and 19th. There will be 106 artillery officers and men from St. John, 25 men and 25 officers from the 62nd Fusiliers and 25 officers and men composing the Maritime Brigade. Lieut. Colonel McLean will be in command of the Maritime Brigade.

MISCELLANEOUS

KNIGHTS OF PYTHIAS visiting Boston will find nice rooms at 47 Appleton St. 2-7-11

TO WHOM IT MAY CONCERN.—I will not be responsible for any debts contracted by any person after this date unless upon a written order signed by me. FREDERICK W. CURRIE.

NEW GOVT. Revolutionists Are Victorious There

Their Own President Takes Office—Fighting in the Streets

BUENOS AYRES, July 5.—A revolution has taken place in Paraguay today. The revolutionists have overthrown the government of the Argentine Republic and have established a new government. The revolutionists have been victorious in Paraguay and have taken the city of Asuncion.

The revolutionists have appointed Dr. Emilio Gonzalez Navarro president. He had the office of vice-president in the government which has just been overthrown.

Unofficial dispatches that the new cabinet includes Manuel Gondra, the Paraguayan Minister to Brazil; Dr. Eusebio Ysla, Dr. Alvaro Jara, Dr. Rigulino and Dr. Manuel Franco. These represent a combination of the two most powerful parties in Paraguay, the Liberal and Conservative, and it is believed that their appointment will insure early peace to the country.

The members of the former government, who include Manuel Benito, Minister of the Interior; Cecilio Baez, foreign affairs; General Rios, war; Adolfo Soler, finance; and Carlos Izaia, Minister of Justice, it is understood, have taken refuge in the foreign legations.

Fighting has been proceeding in the streets of Asuncion for some days past, and many of the public buildings have been seriously damaged. Previous estimates of the killed and wounded, however, have been exaggerated, and it is now believed that the number will not exceed 500. It is expected that telegraphic communication with Asuncion will be restored tomorrow.

Feeling that the law might not be relaxed in favor of allowing Canadian cattle into the country, it is contended that Canadian cattle are as healthy as our own, and entirely different from the cattle which at one time came from the United States. The Canadian statesmen have protested against the slaughter of their cattle in the United States, and the price of beef is at such an advance figure, and likely to become higher still, the government might well consider the whole question. Free admission of Canadian cattle would mean a valuable addition to our food supply. Canadian farmers, for climatic reasons, are not so well adapted to the raising of cattle as the United States, and the government might well consider the whole question.

RACING BALLOONS COME TO GRIEF

Occupants of Some Badly Injured Several Landed in Ontario—Two Men Were Nearly Drowned

TORONTO, Ont., July 5.—The balloon race which started from Chicago to the ocean, Saturday, has caused great interest in this province, over which the balloonists must pass. So far five have been heard from and three have come down in Ontario. The first reported was the Columbia, in charge of Capt. Peterson and C. H. Leichter, which struck on a wire fence near Clinton and the occupants were thrown out. The Chicago came down near London and the Illinois at Glen Island, near Belleville, the latter after lighting on the island was carried out into the Bay of Quinte by the wind. The occupants were rescued.

CHICAGO, July 5.—Colonel A. E. Muller and Geo. Schoenbeck, aeronauts, who sailed in the French balloon Ville de Dieppe from Chicago yesterday in the endurance contest, came to earth near South Haven, Mich., during the night after having been dragged for miles along the surface of Lake Michigan. They saved themselves from drowning only by throwing overboard every available thing in the balloon basket and taking to the rigging. They returned to Chicago today by train. Neither was injured, but both were chilled and soaked to the skin.

The fielding landed near West Shore, Quebec, and the King Edward, Canada's entry, landed near Port Huron, Mich. The Chicago, of 10,000 cubic feet capacity, came to earth near Atwood, Perth county, Ont., this afternoon, according to a telephone message received in Chicago today. The fielding landed in Chicago today. The occupants, C. A. Coey and Captain G. L. Bunbaugh, were well. The United States landed near the east end of Pinkerton station, Bruce county, Ont., at 8:30 o'clock today. The Columbia also landed in Canada, and while C. S. Leichter and Captain Martin Peterson managed to leave the car near West Shore, Quebec, and the King Edward, Canada's entry, landed near Port Huron, Mich. The Chicago, of 10,000 cubic feet capacity, came to earth near Atwood, Perth county, Ont., this afternoon, according to a telephone message received in Chicago today.
