GIRL OF 11 TAKES  
PREACHER'S PLACE

Boys Amazes Congregation With  
Sermon Worshy of a "Grown-Up"

LOS ANGELES, Sept. 24.—Eleven-year-old Inez Bowers, who occupied the pulpit of the West End Congregational Church Sunday night in the place of the gray-haired clergyman, Inez wears short dresses, and when the pulpit does not claim her she devotes much time to her doll.

The girl apparently had not memorized her sermon. She was perfectly at ease.

Here is a part of what the child preacher said:

"God called me and I want to do His will. I speak without notes, trusting that the Master, who has seen fit to guide my steps this way, will give me words to speak that I may glorify Him."

"I will choose as my text tonight a verse from Romans: God commendeth His love towards us, that while we were yet dead in trespasses and sin, Christ died for us. The love of the Savior is the keynote of everything in this world, from the beginning to the end. God is love and love is sacrifice, and the death of Jesus is the sacrifice of God."

"God gave His best and He is not satisfied short of our best. When we do our best, only then have we done our duty. Then what can we say of those who have failed to be filled with divine love, without which no one can do his best? In studying the word we discover that there are two kinds of love—the divine and the human. We see much of human love and but little of the divine."

"It should be discouraged if I did not think God's love can forgive all sin and lead all things right. God gives his best to those who stand the best test. I remember a minister saying once that a man wanted a million dollars blessing for ten cents worth of religion. Let us give generously of our love to God and God will reward us."

HARD TO GET  
ACT TO SUIT  
ALL PARTIES

Labor Men Discuss  
Lemieux Act

SOME OPPOSE IT

Others Favor — Congress  
Elects Officers — Quebec  
Next Meeting Place

HALIFAX, N. S., Sept. 24.—The adoption of the amendment of the Lemieux act was again the main feature at the afternoon session of the Trades and Labor Congress. Some of the delegates favored the total abolition of the act, others wanted it amended, while still others seemed satisfied with it as it stood. The statement of Adam Anderson of Montreal, that it was hard to have a law to suit everyone, was entirely borne out.

The western miners and employees of the C. P. R. are opposed to the act, while others who have seen its workings are very much in favor of it.

Election of Officers

The election of officers also came up and the result was as follows:

President, Alphonse Verreuil, M. P.; secretary, James Simpson, Toronto; treasurer, P. M. Draper, Ottawa. The only contest for the executive was between James Simpson and C. C. Hahn, of Berlin, Ont., with Simpson winning out.

The provincial executive for the ensuing year are:

Alberta—Vice pres., F. H. Sernan, Calgary; executive—John Harrison, Calgary; T. E. James and George Howell, Saskatchewan—Vice pres., Hugh Peat, Regina. The appointment of an executive was left in the hands of the executive council of the congress.

Manitoba—Vice pres., W. J. Bartlett, Winnipeg; executive, W. N. Goodwin, W. H. McInnis and T. F. Robbins, Winnipeg.

Ontario—Vice pres., J. Barnett, Toronto; executive, B. C. Carleton, Ottawa; C. C. Hahn, Berlin, and F. Bancroft, Toronto.

Quebec—Vice pres., G. Francis, Montreal; executive, Louis Beland, Montreal; T. Fisher, Montreal, and O. Proulx.

New Brunswick—Vice pres., C. W. Blakney, Moncton; executive, E. J. Neave and M. J. Kelly, St. John, and F. C. Gardiner, Moncton.

Nova Scotia—Vice pres., John J. Joy, Halifax; executive, J. R. Martin, Sydney, George W. Murray, Digby, and Charles Nelson, Halifax.

Prince Edward Island—Vice pres., George Caron, Executive to be appointed by the executive council of the congress.

Always Wanted Bill

A trades union always wanted a bill similar to the Lemieux Act. They now have it. Chief Pidgeon, of the Labor Department of the state of Massachusetts, is on record as saying that an act similar to this one has been in operation there for thirty-five years, and that it has gone through the hands of the Legislature and the courts without a word of complaint.

The girl apparently had not memorized her sermon. She was perfectly at ease.

Moved Resolution

Delegate Anderson, Montreal, moved the following amendment to the resolution:

"That while this congress upholds the principles of the Lemieux act, we nevertheless have shortcomings and request the executive council along with our supporters to amend the act, so that the provisions of that bill along with the ones expressed by the delegates to this congress, and thereafter submitted to the various organizations affiliated with this congress."

SYNOD HAS  
BIG DEBATE  
AT OTTAWA

A Prayer in Giving of  
Unction

MAJORITY OPPOSE ONE

Speakers Declare Church is  
Losing and Christian  
Science Gaining

OTTAWA, Sept. 24.—The general synod of the Church of England in Canada today, after a long and interesting debate, defeated a resolution providing for the adoption of a prayer to be used by clergymen in the administration of unction to the sick.

The debate was of peculiar interest on account of many references to the Christian Science movement. More than one of the speakers declared that the church was losing and Christian Science was gaining followers because the church had abandoned the practice of granting unction of oil and prayer when called upon by persons in extreme physical distress.

The synod during the debate showed a distinct cleavage between advocates of high church and of broad church practices. The high church adherents favored the resolution which was proposed by Canon Scott of Quebec.

Declared Lost

On a vote this was supported by a majority of the clerical delegates present, but was declared lost because a majority of the lay delegates cast their votes against it.

Canon Scott's resolution provided for the substitution by the synod of the use of prayer for administration of unction in first prayer book of King Edward sixth. The church, he said, had a mission for the body, as well as for the soul, and there was no reason to suppose that the healing powers of the first ages had died out.

Many acts, such as Christian Science, were now sprouting up and groping after truth which is suggested. He urged the original purpose of anointing of oil for purpose of restoration of health and contented that the Roman church since about the ninth century had held in holding that anointing was for forgiveness of sins and only in rare cases for healing of body.

Rev. Archdeacon Harding, of Indian River, supporting the resolution, declared that the church, like her divine, was bound to administer to the body as well as the souls of men. In reference to a case cited by the speaker, he said that the church, like her divine, was bound to administer to the body as well as the souls of men. In reference to a case cited by the speaker, he said that the church, like her divine, was bound to administer to the body as well as the souls of men.

Not a Good Thing

Rev. Canon D'Esmum of Calgary declared that he had used anointing with 37 Galleons and half-breads in the northwest, and that of the cases prayed for the faithful and of the sick had been answered.

Dean Crawford of Halifax said the church had used anointing with 37 Galleons and half-breads in the northwest, and that of the cases prayed for the faithful and of the sick had been answered.

Asked for Support

During the afternoon session of the synod a resolution from the Lord's Day Alliance was received. They asked for co-operation and support in the work of the alliance. W. G. Hanna, assistant secretary of the provincial alliance, declared that in British Columbia, Nova Scotia and Quebec the Lord's day act was not adequately enforced. Of 150,000 men who formerly were compelled to work on Sunday, 80,000 now had the Sabbath to themselves. The alliance, he said, still sought to "emancipate" 50,000 more. He further noted that the number of American Sunday newspapers coming into Canada had now been reduced to 30,000.

RIVER STEAMERS MEET  
WITH SLIGHT MISHAPS

A couple of river steamers met with slight accidents this afternoon as they approached William's wharf, her propeller fouled something and broke a blade and the other city all right and was taken through the falls for repairs. She will leave at her usual hour this evening for up river.

As the May Queen was going up river on Wednesday morning she grounded at the Narrows. She was not seriously hurt, but she had to back off with much difficulty. As far as was known she suffered no damage from the mishap.

The water in the river is very low at present and owing to the navigation is more difficult than usual.

Three fine moose reached the city this morning from up river.
