

These Machines Will Do Their Part to Help You Bank More Profits This Year

Don't put hard work and good management into running a threshing outfit that won't do its part of the job right. There's no reason why with good handling you should have to spend a lot of your profits for repairs, why you should have kicks from customers about wasting grain or poor cleaning or why you should lose a lot of time with breakdowns.

An Avery Separator Will Do Its Part

It has such good cylinder teeth we guarantee them for life against breakage. It is the champion grain saver. It's backed up by the best grain saving tests and the strongest definite grain saving guarantee of any machine. It's also guaranteed to clean the grain in perfect condition for the local market. It threshes fast, stands up on the job, does a good job of work, and lasts a long time.

An Avery Engine Will Also Do Its Part

Choose the Avery Engine that best fits your needs—a Single Cylinder Straight Flue Steam Engine designed for belt and ordinary traction work—a Double Cylinder Undermounted Steam Engine if you want to do heavy traction work as well as belt work—or a Gas or Oil Tractor if you want gas power.

All of these Engines are built so strong we guarantee them against breakages of shafting and gearing as well as against defect. All of these Engines have made records in fuel economy. They will do their part in helping you bank more profits this year.

Get all the Facts in the New Avery Catalogs

The new Avery Catalogues are the most complete, are the best illustrated and have the most detailed descriptions of any threshing machinery catalogs ever published. They have handsome covers showing the machines in natural colors at work in the field.

Write now for the new 1915 Separator, Steam Engine and Tractor Catalogs and say what machinery, if any, you are in the market for this year. Address:
