our news coverage with such advertising - we unfortunately cannot always afford to have your middle class morals or values.

Sincerely,  
Mary Pat MacKenzie

**Clarke childish ?**

To the Gazette,  
Who is Peter Clarke and why is he saying such terribly childish things about me?

If Mr. Clarke had bothered to read the rest of the article on housing he might have noticed that its main points had nothing to do with him. I hate to disappoint him, as I can understand how someone might get so excited at seeing his name in print that he could neglect to read any further.

Yours Truly,  
Phillip Saunders  
P.S. Mr. Clarke, I resent being referred to as a "beggarly poltroon". I much prefer "dastardly poltroon".

# Outreach moves to King's

by T. Archibald

Outreach has once again started at King's College. The kids are bused in from the Preston area (courtesy of Acadian Lines) arriving about 9:00 Saturday morning. The tutors down an energy pill or two, put on those delightful smiles, say a few prayers and greet the kids rushing them off to some secluded room before they wake the whole campus up-watch out King's next week we are letting them loose on ya. The morning is full of events, beating up a few tutors, a lot of kids (this is a great place to take your frustrations out on some innocent kid). After a morning of soccer, basketball and other activities, the kids are given a meal and with tears of good riddens are sent home with the reminders that they will return next Saturday, the same time, same place, and probably with the same amount of energy. Where do kids get all that energy?

Bill MacCraken heads up another year of Outreach

This is only one aspect of Outreach tutoring, there are many more programs that you can get involved in where the kids are not allowed to beat you up. But is you like getting beat up then we will gladly let you come to King's Saturday morning. We need your

help in all four of the programs, remember we never have enough tutors for all the kids that want them. Come and see us sometime at 1460 Oxford St. the education building 3rd floor Mon-Fri 11:30-2:30 or phone 422-5833. No experience is needed please help.

# You want to change the system.

## But you don't think you have the bucks.

The system in question is your present stereo.

What's happened is that you've developed a more discriminating ear.

What once sounded terrific suddenly doesn't sound so hot.

And what never sounded —like the sibilance way behind the rhythm guitar—is now a veritable pain in the cochlea.

You're ready to upgrade. But your worry is that moving from stereo to true high fidelity is awfully expensive.

Well, it can be. But it doesn't have to be.

Hitachi has just brought a new line of equipment into Canada.

Good-looking, contemporary, high quality, high fidelity.

With specs you'd expect to find at a much higher price.

The name of this new line is Lo-D, the result of over three years research that speci-

fically focused on the listener and his needs. (What is the range of his hearing? Is he capable of catching the lowest and highest notes? Or is he limited to the middle range?)

Hitachi scientists measured these individual listening reactions by testing over 5000 people in Hitachi's sound labs. Then, the results were mathematically tabulated and converted into a unique Sound Design chart.

Called ESP for its investigation of Emotion, Sensation and Physical Characteristics, the Hitachi hi-fi report was the genesis of Lo-D.

When you hear its brilliant sound, and look at its brilliant price, you'll discover Lo-D is quite an achievement.

The kind of achievement that suddenly makes it easier for you to improve the system you're living with now.

The kind of achievement that has made Hitachi a world leader in electronics.

SR-802 AM/FM Stereo Receiver w/ OCL Circuitry 50 Wx2 @ 8 ohms (20-20,000 Hz, 0.5% THD)

D-3500 Advanced Stereo Cassette Deck w/ 3 Head Performance, D Dolby\* Off-tape monitoring, S/Nw Dolby: 63 dB Wow and Flutter: 0.05% (WRMS)

\*DOLBY is a trade mark of Dolby Laboratories, Inc.
