Important to Farmers.

The death of cattle which often happens in consequence of eating
too freely on fresh clover, may be prevented by giving them, by means
of a bottle or horn, a large handful of common salt dissolved in a pint
of water—

Or which is perhaps better;

Mix three gills of sweet oil with one pound of butter, to be given as
above directed. If this does not produce the desired effect in less than
half an hour, repeat the same quantity, walk the cow gently about
during the time.

SCRAP.

Lost money may be found again; but a lost character is rarely re-
covered.
