

...GUARD

**Against Milk Fever and secure
Better Calves and More Milk.**

Under date of Sept. 10, 1896, the well-known and successful breeders and exhibitors of Ayrshire cattle, Messrs. Wm. Stewart, jun., & Sons, say: "One of our Ayrshire cows has just come through the CRITICAL YEAR with her calf without even a touch of MILK FEVER; second, we believe that it is the regular use of

...HERBAGEUM...

which has kept her in such prime order. We have used Herbageum for eight years with our Ayrshire cattle, and consider it the finest known preparation for purifying the blood and putting and keeping the whole system in perfect working order, insuring much better returns in milk while sustaining the animal in flesh. The extra return from the food used equals a good profit over and above the cost of Herbageum."

THE BEAVER MFG. CO.,

GALT, ONT.

SOLE MANUFACTURERS.

If your local merchant does not keep Herbageum
write for a Pamphlet and mention "OUR HOME."
