Thrifty Holstein Bull Calf

EIGHT MONTHS OLD FOR SALE

Dam's record, 10,000 lbs. milk in one year (private). Official record of sire's dam, over 14,000 lbs. milk as a three-year-old. Dam is a regular breeder, which quality is likely to be transmitted to her son. This is a very important point. For price, write: Manager "Overlake Farm," Grimsby East, Ont. or H. H. Dean, College Heights, Guelph, Ont.

2 Yearling Holstein Bulls 2

and several younger females, all ages; cows in R.O.P. and R.O.M. Will sell half interest or all of our old herd. Sire and show bull. "King Fayne Segis Clothilde," five year old.

R. M. HOLTBY
Phone. R.R. No. 4, PORT PERRY, ONT.
Manchester and Myrtle Stations.

Woodbine Holsteins

Young bulls and bull calves, sired by Duke Beauty Pieterje; sire's dam's record 32.52 lbs. butter, and his two granddams are each 30-lb. cows, with 30-lb. daughter, with 30-lb. granddaughter. Three generations of 30-lb. cows. If you want a bull that will prove his value as a sire, write: A. KENNEDY & SON, R.R. No. 2, Paris, Ont. Stations: Ayr, C.P.R.; Paris, G.T.R.

Maple Grove Holsteins

Do you know that Tidy Abbe Kirk is the only cow in the world that produced three sons who have each sired 30-lb. butter cows, and two daughters with records greater than her own. She was bred, reared and developed at Maple Grove. Do you want that blood to strengthen the transmitting power of your herd, at live and let live prices, then write: H. BOLLERT
TAVISTOCK, ONT. R.R. No. 1.

Holstein-Friesian Association of Canada

A Demonstration Car of Wool and Egg Exhibits.

As a result of the success, which has attended the presentation of the wool and egg exhibits of the Live-stock Branch of the Dominion Department of Agriculture, at the larger Western fairs this summer, arrangements have been made in co-operation with the Canadian Pacific Railway to place these exhibits before the people of the Eastern Provinces through the medium of a demonstration car. This car will leave Ottawa on or about the middle of October, and will be operated over the lines of the Canadian Pacific Railway, stops being made at a large number of important agricultural centers. The detailed itinerary is now being arranged, and further announcement of the date of the arrival of the car at each point will be given later. The car will be in charge of egg and wool specialists of the Poultry and Sheep Divisions, respectively, and demonstrations will be given at each scheduled stop.

THE WOOL EXHIBIT.

The object of the wool exhibit is to assist farmers and city dwellers alike to gain a more complete and definite knowledge of the character of wools grown in this and other countries, and of the products manufactured therefrom. It will demonstrate how wool may be handled to secure the best advantages to both producer and consumer. Carelessness in the preparation of Canadian wool has resulted in an injury to its reputation upon the markets of the world. In an endeavor to overcome these conditions by aiding the wool-growers of Canada to place upon the market a high-grade product, the Sheep Division presents this exhibit to the public.

One of the most interesting and instructive features comprises samples of wool in both the greasy and scoured product, showing the injurious effects of using insoluble paints, which are difficult to remove. There are also samples of wool tied with binder-twine (sisal), which show how the sisal fibre becomes incorporated into the wool and the consequent defect in the finished cloth. The injurious effect of shearing sheep while damp, or of permitting the wool to become wet while in storage, is exhibited, together with the damage caused by the incorporation of straw and chaff into the fleece.

Representative fleeces of the most important breeds of Canadian sheep are shown; their character and staple being further displayed by means of smaller samples. The Canadian classification is also represented by fleeces of the different grades.

The processes of woolen and worsted manufacture are illustrated by samples representing the intermediate product from the wool in the grease to the finished cloth. This serves to give the public an idea of the types of wool entering the different classes of fabrics.

THE EGG EXHIBIT.

The principal features of the egg exhibit are contained in two large show-cases, and strikingly illustrate right and wrong methods of marketing eggs. In one case by means of models and appropriate descriptions are depicted the careless methods of handling eggs, prevailing on too large a number of Canadian farms and in country stores. In this illustration the eggs are gathered infrequently and from questionable places. They are held until it is convenient to carry them to market, and are often traded on a flat-rate basis, for merchandise, at the country store, where little or no attention is paid to their preservation. Here they are frequently held indefinitely, in anticipation of a rising market, and often are shipped in damp and musty cases to the wholesale dealer, where they are candled and graded. The result of the candling is indicated, and it is to be noted that but a relatively small proportion grade "select." The manner in which the average retail grocer permits eggs to deteriorate is also pointed out, and if by chance a portion of the uncandled eggs should have gone direct to the consumer, the result is very evident.

The other case shows the results that may be obtained through the adoption of improved methods, not only on the farm and in the country store, but on the part of all those who handle eggs. The models show a flock of pure-bred poultry

Power Makes Farms Pay

Put our Engine on your farm to give you power. Then plan to use power, instead of muscle, for every possible farm job. With it, separate cream, pump water, saw wood, grind chop, clean grain, pulp roots, mix feeds, etc. These jobs done in half the time. Besides, you can save a hired man's wages (most farms) yet can raise more beef and pork than now, at no more cost. This Chapman Engine has the working parts in a detachable box. In case of trouble, ship us only the box by express, instead of the whole engine by slow freight, or lose time waiting for an expert to come, as ordinarily. With ours, ship us the box only, we rush it back. This saves time and money. Our AIRMOTOR, with or without tank on tower, pumps water for your barn and house—no fuel cost. Get either our Engine or Airmotor Catalogue. Also we will gladly send our catalogue on chop mills, feed grinders, saw tables, fire pumps, piping, stall water basins, house water fixtures, etc. Ask for it today.
