

The Farm Burden Bearer

YOU and your farm wagon spend a great deal of time together. Of all farm tools, it is your standby. Its wheels bear the burden of big loads—tow-

ering racks of hay or grain, sacks of produce, loads of sand and gravel, anything that needs moving, over miles of roads to market. It takes solid strength to stand up long under that. When next you ride on a load, listen to the constant racking, creaking, groaning sound of the wagon box, wheels, and running gear as the load pitches back and forth over the road ruts. Not an unpleasant sound, but the strain that causes it is hard on the wagon. IHC wagons—

Petrolia Chatham

give the buyer the most he can get for his money because they defy hard usage for the longest time, and are easiest on the horses, which is no small item.

These are a few of the things that contribute to the making of the unbeatable IHC wagon reputation. Selection of the finest grades of lumber, oak, hickory and pine, and of the best quality of steel and iron; many months of toughening air-drying for every piece of wood; skilled assembling of parts, fitting of bolts and rivets, and perfect shaping and ironing; application of the purest paint to act as wood preservative and to prevent shrinking and warping of the wood. In the constructing, the wagon undergoes many careful inspections by experts who test every part and verify each operation so that when the wagon is ready for the farmer, it is practically perfect in every detail and thoroughly up to the IHC standard.

And there are many other reasons we have not room for here why IHC wagons are the best to buy. A visit and a talk at the IHC local agent's, where the wagons may be studied, will convince you as to the wagon you want. Get catalogues from him, or, write the nearest branch house.

Independent Systems Constantly Growing

THE number of municipal, government and independent local telephone systems in Canada is constantly growing. The independent telephone movement, in spite of tremendous opposition, is a huge success. If your locality is without telephone service, write us, and we will tell you the steps to take to organize an independent telephone system.

We are the largest Independent Telephone Manufacturers in Canada. We carry complete stocks of guaranteed telephone materials, and can make shipment within 24 hours after receipt of order. Our telephones are superior to others in design, material and workmanship. Send for Free Trial, so that you can test and compare them with others.

Ask for our No. 3 Bulletin—containing the latest information about building telephone lines. Also No. 4, describing our magneto telephones, is free on request.

WINCHESTER

Rifle and Pistol Cartridges

It's the careful and scientific manner in which Winchester cartridges are made and loaded which has earned for them a reputation for accuracy, reliability and uniformity which no other brands enjoy. Winchester cartridge shells are carefully inspected before loading for size, length and conformity. All Winchester bullets are swaged by machinery which makes them exact in size, contour and density. Then the loading is done by automatic machinery which not only insures a uniform charge, but seats the bullet in the shell so that its axis coincides with that of the shell; hence with that of the barrel of the arm. These are a few of the many reasons why Winchester cartridges in all calibers are the most satisfactory on the market. Use the **W Brand**

10 % More Milk

You will increase the milk production of your cows 10% by installing a BT Water Bowl Outfit. This keeps fresh water constantly before them. They can drink frequently and as often as they need it; cows cannot be expected to do well if they are allowed to drink from contaminated pools or driven out through sleet and storm to a spring or frozen trough.

A Bowl that Lasts

The BT Water Bowl is a large, heavy bowl, designed to do the work faithfully for 25 years and not give worry over repairs. It weighs 20 lbs.; holds 3½ gallons of water—only one bowl being needed for two cows.

The valves are made of aluminum, the valve-seats are brass, so that there is no danger of rusting and leakage.

The bowl is easily and quickly cleaned by simply pulling out a rubber plug. No need to tamper with the valve in cleaning.

The outfit is easy to install. It will pay you to put your bowls in right now, before cold weather sets in.

Mail the coupon for free book No. 21, fully describing BT Water Bowls, Steel Stalls, etc. Sent free for your name and address on a postcard.
