MOTHER'S, SPEAK LOW!

I know some houses, well built, and handsomely furnished, where it is not pleasant to be even a visitor. Sharp, angry tones resound through them from morning till night ; and the influence is as contagious as measles, and much more to be dreaded in a household. The children catch it and it lasts for life, an incurable disease. A friend has such a neighbor within hearing of her house when doors and windows were open, and even Poll Parrot has caught the tune and delights in screaming and scolding, until she has been sent into the country to improve her habits. Children catch cross words quicker than parrots. Where mother sets the example you will scarcely hear a pleasant word among the children in their plays with each other. Yet the discipline of such a family is always weak and irregular. The children expect just so much scolding before they do anything they are bid; while those in many a h where the low, firm tone of the mother or a decided look of her steady eye is law, never think of disobedience either in or out of her sight.
