TOTAL ABSTINENCE and MORTALITY

IN 1915 the mortality experienced in
our ABSTAINERS' SECTION was
but 42% of the expected, compared
with 66% in the General Section. This
is but a repetition of the extremely
favorable death rate experienced in our
Abstainers' Section year after year,
demonstrating the longevity of the
Abstainer over the Moderate Drinker.
The benefits of this Section are for you,
if you are an Abstainer. Why not
ascertain the special advantages we
have to offer before placing your in-
surance? A copy of our booklet
"Total Abstainers vs. Moderate
Drinkers" will be gladly mailed on
request.
