

ROSSLAND WEEKLY MINER.

Fourth Year, Number 45

ROSSLAND, B. C., THURSDAY, JANUARY 19, 1899.

Two Dollars a Year.

A TRIP TO THE WEST

Mr. Fox Tells of His Experience in Boundary and Elsewhere.

CAMP MCKINNEY MINES

The Minneha is destined to be one of the leading mines there—Knob Hill—Old Ironides—Townside or Columbia Purchased, Etc.

William C. Fox, of the firm of Fox & Ross, brokers of Toronto, has returned from a visit to the country to the west and south. He is particularly pleased with the Trail Creek division, the Boundary country and the Okanagan division. In speaking of his trip yesterday he said: "While I was away from Rossland I visited Camp McKinney, Greenwood, Columbia, Grand Forks and Spokane. In company with George Reiner I left this city and went straight through to Camp McKinney. What I wanted to see principally was the Minneha property. Our firm sold 250,000 shares of its stock and also furnished the company with the money necessary for development work. We found the property in excellent condition. It has a steam drill, pump and hoist and good office buildings. Major Angille McGraw is the manager of the property. The shaft has attained a depth of 110 feet and the vein has been traced for a distance of 180 feet. The vein is six feet wide. Samples taken across the face of the vein, without touching the galena, gave returns of \$27.70. Another careful sampling of the vein, taking everything, including galena, returned an assay of \$125. I am waiting for the president of the Minneha company, Professor Henry Montaha, who is in New York. He is expected here in a day or two. The manager of the Minneha, Mr. McGraw, thinks that further depth should be attained before a stamp mill is erected, and President Montgomery, when he arrives, will decide on the matter. The manager says the Minneha is a mine."

Mr. Fox visited the mill of the Cariboo company and says it is well managed and everything about its property has a business like air. The Waterloo property was next visited. Joseph Murphy is in charge. The shaft is down 82 feet, and soon a crosscut will be run to tap the vein, which on the surface was wide and showed considerable free gold. It is Mr. Fox's impression that the Waterloo will make a paying mine with the expenditure of not a very large sum of money. It is very well managed. The Salar, he says, has the Cariboo vein as well as the vein of the Minneha. He visited several other properties, and his opinion is that Camp McKinney has a future of considerable importance. Then he returned to Greenwood and visited the Old Ironides and Knob Hill. Mr. Fox says there are immense ore bodies in these properties, and that both will yet be heard from as large producers and dividend payers. The Knob Hill, he says, has a vein that is 240 feet wide. It is all ore that can be marketed, but there is 83 feet of it, on which the authority Mr. Hemmingsway, that gives from \$20 to \$40 per ton.

Mr. Fox also visited the Mother Lode, which he declares to be a wonderful property. Mr. Johns, the manager of the Mother Lode, has had a variety of experience in mining, and he said Mr. Fox that he told in places where he had actually seen in the Boundary country large bodies of ore in any portion of the world as were to be found in the Boundary country.

Mr. Fox next went on to state that he and his associates had purchased the townsite of Columbia and that he expected that it would be a good-sized city there before very long.

B. A. O. PROPERTIES.

Hon. C. H. Mackintosh Tells How Well They Are Turning Out.

"In the Nickel Plate we are getting about 26 feet of good copper ore running in the neighborhood of from \$18 to \$20," Havans. The journalist chivalrously feigned ignorance.

Mr. Wallace's New Buildings.

Howard S. Wallace, who lately bought the building and the lot on Columbia avenue occupied by the Brunswick hotel, has arranged to remove the present building. In its place he will erect a handsome six-story structure, 30x100 feet in size, that will cost about \$7,000. It should be erected about May 1, when Mr. Wallace will occupy it with his large stationery and fancy goods store. His present quarters on West Columbia avenue have proven to be small and not sufficiently central for his business, and Mr. Wallace has decided to erect a building of his own in the heart of the city. The old Brunswick hotel building, which is on the ground, will be at once moved to the vacant lot on East Columbia avenue, between the Taylor block and the Cosmos.

One From Copper Mountain.

A. P. Hunter and W. S. Archer are displaying some very pretty ore from Copper Mountain at their offices on North Washington street. One big specimen from the Copper Bluff is reported to assay 54 per cent copper and 20 ounces in silver, and it looks as if it would carry fully those values. The Sunrise, owned by Ed Burr and H. L. Jones of Rossland, is also represented in the collection, and assays from it gave 21 per cent copper. The Brooklyn, which is owned by the same people, returns copper values of 15 per cent. Mr. Hunter has just completed a map of the Copper Mountain country, in which a number of claims and placer locations are shown.

Columbia Townsite.

William C. Fox, of Fox & Ross, the Toronto brokers, and one of the members of the Toronto syndicate which has recently completed the purchase of the Columbia townsite, formerly known as the Upper Grand Forks, has appointed the Reddin-Jackson company of this city Rossland agents for the townsite. Mr. Fox will remain in Rossland until Friday morning. Meanwhile anyone desiring information with reference to Columbia can see him at the office of the Reddin-Jackson company.

SENATORIAL CONTESTS

In Eight States Senators Were Chosen Yesterday.

In Seven Instances the Selection of Members of the Upper House of Congress Was Prevented by Faction.

BUFFALO, N. Y., Jan. 18.—Joint meetings of both branches of the legislature in 15 states were held today for the purpose of electing United States senators. In eight states senators were chosen and in seven faction fights prevented an election. The senators elected were as follows: New York state, Chauncey M. Depew, republican, to succeed Senator Murphy, democrat; Connecticut, General Joseph R. Hawley, re-elected; Massachusetts, Henry Cabot Lodge, re-elected; Maine, Eugene Hale, re-elected; Minnesota, Cushman K. Davis, re-elected; Missouri, Francis M. Cockrell, re-elected; Michigan, J. C. Burrows, re-elected; Indiana, J. C. Beveridge, republican, succeeding a democrat. In the states "deadlocked" five are republicans, namely, Delaware, Pennsylvania, Nebraska, Washington, and California. Two of these are Democrats, Montana and Utah. The greatest interest is manifested in the fight for senator in Pennsylvania, where Matthew S. Quay, the present senator, and for many years the political "boss" of the state, is seeking re-election. In the balloting today, Mr. Quay was voted short of a majority by the anti-Quay people, headed by John Wannamaker, claim that they will continue the deadlock for six months rather than allow Quay to succeed himself.

DOMINION MINING LAWS.

Americans to Be Treated as Aliens Are in the States.

TORONTO, Ont., Jan. 18.—The Mail says that a member of the commons, who enjoys confidential relations with the Laurier government, assured him that legislation affecting mining would be one of the most important matters of the coming session. The whole mining law needs to be recast. He said the government intends to deal comprehensively with it. The member of parliament said: "We are going to insist that Americans be treated the same way as aliens are in the States. The house will not meet until March. I am afraid that Mr. Dingley's death will have the effect of delaying the session until late in that month."

Spanish Spies Reward.

LONDON, Jan. 19.—The Madrid correspondent of the Daily Mail says: "Among those recently rewarded for military service during the Hispano-American war are five Spanish officers. A man who volunteered, without asking a reward, to go to the United States after war was declared and supply information to the Spanish government. They formed a commission under Lieutenant-Colonel Sorrao. They visited New York, Washington, Jacksonville, Key West, Tampa and other points, changing their posts every few days. They had many narrow escapes from detection, notably on one occasion when one of them met face to face a New York World correspondent whom he had known in Havana. The journalist chivalrously feigned ignorance."

A Liner in Distress.

QUEENSTOWN, Jan. 18.—The Hamburg-American liner Alesia sent word today that she was outside with a broken propeller. Tugs were sent to assist the Alesia, but returned later in the day without having been able to find her. The increasing force of the gale made it necessary for the tugs to seek shelter here. It is thought the Alesia will approach the Irish coast during the present weather, and may be forced up the channel.

A Fire Causes a Panic.

CHICAGO, Ill., Jan. 18.—Several hundred men and women employed in the big building at 153 Market street were thrown into a panic today by a fire, which broke out on the fourth floor. Although no one was injured, many had narrow escapes. The structure was occupied by a number of makers of gentlemen's wearing goods and hats. The loss sustained aggregates \$100,000.

A Rising Fronted in Spain.

LONDON, Jan. 19.—The Paris correspondent of the Daily Graphic says: "One of the principal chiefs of the Carlists here says that everything is now ready for a rising in Spain; that Don Carlo is absolutely resolved to take the field, and that all are waiting for the signal."

A CLAIM FOR \$1,000 IN OUTSIDE CAMPS

Ed Watson Wants a Commission for Selling the Mountain Chief.

SOME MIXED-UP OPTIONS A COPPER-LEAD DISTRICT

The Case Embraced the Attention of the Jury in the County Court Yesterday—A Long List of Minor Civil Actions Settled.

In the county court yesterday Judge Spinks was busy hearing the case brought by Ed Watson of the Headquarters hotel, against John R. Stuessi for \$1,000 commission. The commission was claimed on account of the sale of the Mountain Chief copper claim to the Golden Gate Mining company. The Mountain Chief was owned by Stuessi and Thomas Alexander. Last summer they started negotiations for the sale of the claim, and Stuessi gave Watson a 60-day option for \$9,000, with the condition that if Watson sold the property he was to receive a \$1,000 commission.

Matters dragged along for some time, and meanwhile Stuessi gave several other options and agreements to various people. Watson had been trying to sell the property, and at last negotiated with the people who afterwards formed the Golden Gate company. They bought on the basis of \$6,000, and up to date have paid \$1,500 down, leaving a balance of \$4,500 still due. Now the company may not be able to meet its final payments, according to the claim of Stuessi. The case was heard yesterday before a jury as follows: Charles Dargatzis, foreman; Edward A. Seaton, George Owens, Norman L. McInnes and F. W. Fretty.

Other Cases.

The other cases thus far heard were disposed of as follows.

Mrs. G. H. Williams, by Hamilton, vs. D. Coran, \$60; services. Judgment for plaintiff for \$60 and costs. Judgment for defendant for \$24.02 and costs.

Leslie Hill, by Abbott, vs. Alexander Dick et al., by Hamilton, \$115; rent. Next court.

H. Stevenson, by Whiteside, vs. Great Western Mining company, by Hamilton, \$800; work. Next court, defendant to pay costs of day.

W. T. Hoyes, by Hamilton, vs. M. A. Rueh, \$40; promissory note.

Swan Nelson, by Galt, vs. Merryweather, \$216; lien. Not returned served.

W. T. Hoyes, by Hamilton, vs. Robt. Ballie, \$20; services. Not returned served.

R. W. Gregor, by Whiteside, vs. John McKane, \$610.84; account. Next court.

City of Rossland, by Abbott, vs. Wm. B. Dey, \$55.61; settled.

O. M. Fox & Co., by Forin, vs. C. Corbett, \$66.50; goods sold. Judgment for plaintiff for \$11.25 and costs.

Edwin J. Weston, by Macdonald, vs. Ross Thompson, \$390; plans. Next court.

H. McPherson, by MacNeill, vs. P. A. Silverstone, 5,000 shares stock. Settled.

Merchants' Bank of Halifax, by MacNeill, vs. Frank Elgie, \$227.20; promissory note. Mines Development Trust & Machinery company garnishees. Settled.

Bowes & Kennin, by Abbott, vs. O. Flynn, \$20; services. Settled.

War Eagle Hotel company, by Galt, vs. J. Kennedy, \$31; board. Settled.

James Dyer, by MacNeill, vs. J. L. Harrington, \$51; board. Judgment for plaintiff for \$40 and costs.

Mary Kirk, by Hamilton, vs. Dr. Corbett, \$40 and costs.

John Heintz, by MacNeill, vs. Dr. Corbett, \$77.40; account rendered. Judgment for plaintiff for \$77.40.

The Salmo Consolidated.

The latest advices from this property are of the most encouraging nature, showing that good progress is being made in sinking to the 200-foot level, and that the appearance of the ore is indicative of much higher values than have yet been obtained. The hoisting machinery is working well, and altogether the property has never shown to better advantage. A number of very rich looking samples have been sent to the head office, which will be assayed and the results published.

THE ALIENS SHUT OUT

They Cannot Hold Placer Claims in British Columbia.

Mr. Macpherson's Bill to Discriminate Against Laborers in Other Parts of Dominion Passes Committee.

VICTORIA, Jan. 18.—The bill to exclude aliens from the placer mines of this province received its third reading yesterday afternoon and was immediately assented to by the lieutenant-governor, so that it is now in effect.

Attorney-General Martin moved the second reading of the bill introducing the Torrens system of land registration, the debate upon which was adjourned yesterday.

Mr. Macpherson's bill to render void contracts for labor made by persons in British Columbia with persons residing in other parts of the Dominion, passed through committee, with an addition exempting skilled labor not procurable in this province.

Something About the Rich Windermere Country.

WINDERMERE DIVISION.

The shaft on the Delphine, owned by Kempton, Stark & Harrison, is now down 60 feet in solid ore, the assays of which give the exceptionally high average of \$185 per ton.

A proposal has been made that the government should sell by public auction all claims the right to which has expired owing to the assessment work not having been done. The Windermere Miners' association has decided to hold a discussion of the subject, but as matters stand the members are in a decided majority against the proposal.

Says the Spokesman-Review: "That part of the Windermere district lying in Porcell or Selkirk range, extending from Dutch Creek on the south to Horsethief on the north, has been the scene of very active prospecting this fall, and results have been most flattering. The belt in which the principal discoveries have been made extends from the head of the north fork of Toby creek towards the head of Horsethief creek, and is apparently about three miles wide and some 12 or 15 miles in length, as far as has been prospecting. The formation of this country is for the most part serpentine. The general character of the ore, taking the whole district, is copper-lead and iron sulphides. From several hundred samples assayed this fall and taken from all parts of this belt, an average of 60 per cent in lead, 120 ounces silver and three per cent copper and \$2.50 in gold has been returned."

Though very little work has been done in this district since from surface prospecting, it has been demonstrated that here is a country worthy of a good deal more attention than has hitherto been given it. The ledge runs from 30 inches in width to as many feet, and in some places the surface showings are not only wonderful but phenomenal.

SLOCAN DIVISION.

The Treasure Vault has laid off 10 men.

The Payne has eight feet of clean ore in the No. 4 tunnel.

Brineley Walton has 10 men working the Ajax fraction.

Work has been started again on the Charleston mine at Whiteside.

The affairs of the Galena Farm, at Silverton, are to be wound up.

The Minnesota Silver company has spent \$40,000 on its Slocan properties during the past year. It intends putting in \$60,000 more, most of which will be expended for a tramway and concentrator.

Work on the Joker group is progressing actively. A shaft has been sunk 70 feet and three feet of ore has been struck. There is 100 tons of ore on the dump and a good value of gold is shown.

McNichol & Reckell of Slocan City, and Spencer & Dunn of London, owners of the No. 2 tunnel, below Silverton, have bonded it for \$35,000. The ledge is some 20 feet in width. It is an old property and years ago shipments were made from the float found on the surface.

At the Ajax the lead has just been struck in No. 5 tunnel and the working force is now drifting on the ledge with a fine showing of ore in the face of both workings. The lead is stronger and better defined at this depth than ever before—three to four feet between the walls. The tunnel is 600 feet below No. 1, and the property has been steadily improving well as at present.—Sandon Mining Review.

The first annual report of the Northwest Mining syndicate of London, which is operating the Boshuna mine, has just been received. The report is most encouraging, and will help to turn British capital in the direction of the Slocan.

The company is spending about \$3,000 per month in operating the Boshuna, and is taking out about 120 tons of high grade ore, yielding about \$3,000. The syndicate produced in the last year and shipped 480 tons of ore, which netted about \$68 per ton, or \$32,640 in all. The big ore chute has been tapped by the No. 1 tunnel, which has been run to connect with the main shaft.—Nelson Tribune.

WAKEFIELD DIVISION.

The Wakefield mine, on the opposite side of Four-Mile creek from the Vancouver group, promise to be one of the largest producers in the Slocan. A year ago this property was closed down and later Mr. Young entered the property, shipped 480 tons of ore, which netted about \$68 per ton, or \$32,640 in all. The big ore chute has been tapped by the No. 1 tunnel, which has been run to connect with the main shaft.—Nelson Tribune.

NELSON DIVISION.

Work is to be resumed by the first of February on the Belle Singlehurst, a purely gold proposition lying just north of the Second Relief.

The Arlington, just above Erie, continues to make regular shipments. The new machinery is working smoothly and stopping will soon be commenced from the 800-foot level.

The Ontario on Donaldson mountain is working steadily on a new shaft just above the old workings and has already attained a depth of 40 feet on a fine looking body of ore averaging three feet in width.

The North Fork correspondent of the Nelson Miner writes: The Second Relief mine has added two more four-horse teams to the hauling force, and the wagon road is in splendid condition for moving heavy loads.

WINDERMERE DIVISION.

The shaft on the Delphine, owned by Kempton, Stark & Harrison, is now down 60 feet in solid ore, the assays of which give the exceptionally high average of \$185 per ton.

THE STOCK MARKET

A Large Number of Evening Star Shares Sold During the Week.

LONE PINES ADVANCE

There is a demand for the shares of the Montreal Red Mountain Company—Dundee Are Selling Well—Norways Selling Like Hot Cakes.

Signs of a revival have been noticeable during the last week and it is freely predicted that it will not be long before the market will have recovered its full activity. One of the noticeable features of the market was the increased trading in some of the shares of the Slocan. This, doubtless, is due to the publication in the earlier part of the present month of accounts of the dividends paid during the past year by the Slocan mines. This caused investors to seek for them, and there was considerable trading in the shares of Slocan properties. This is a good move as there are a number of mines there which pay dividends. The Rossland standard stocks are once more attracting attention, and there was considerable trading in the Republic group, while Boundary and Ymir stocks were by no means neglected.

BOUNDARY COUNTRY.

Henry White, manager of the Lincoln and the City of Paris, in Central camp, reports that work on the properties is progressing very satisfactorily. At present he has 15 men at work. The compressor plant recently installed is working finely. Tunnel No. 1, which is to be 800 feet long, is now in 300 feet, and at the present rate of progress it will be completed about the middle of March. He says he is highly pleased with the results of the work now being done and believes that with equal amount of development the Lincoln and the City of Paris will be rivals of the Old Ironides and the Knob Hill in Greenwood camp.

A NOTABLE CAREER.

W. R. Beatty Receives News of the Death of His Cousin, J. R. Young.

William Russell Beatty, undertaker of this city, yesterday received the intelligence that his cousin, John Russell Young, was dead at Washington, D. C. Mr. Young was librarian of the congressional library. He had a notable career as a journalist, diplomatist, and public official.

Mr. Young was born in Downingtown, Chester county, Pennsylvania, in 1841. Early in life Young entered the office of the Philadelphia Press as copy boy. In 1861 he appeared in Washington as an employe of the United States senate. By this time he had become a fluent writer. When the civil war broke out he became correspondent in the field for the Philadelphia Press and his graphic descriptions attracted much attention.

WILMINGTON DIVISION.

There is some talk of a consolidation of the various newspapers. During Grant's administration he was sent abroad to study financial conditions for the government. In 1877 when Grant started on a trip around the world Young accompanied the party and on his return wrote "Around the World With Grant."

In 1882 Young became minister to China. In 1897 President McKinley appointed Young librarian of the congressional library.

A Coming Attraction.

The All-Star English Specialty company, which is to play shortly in this city, numbers several artists of high ability among its members. It is a very strong combination. The Post-Intelligencer and other reputable papers speak in the highest praise of the company and its performances. Those who wish to see high class refined vaudeville should not miss going to the performances given by this excellent company, and it will open at the Rossland opera house for a week, commencing Monday, January 23.

VACANT COUNCIL SEAT.

Several Third Wards Who Would Like to Serve the City.

There will be at least three candidates for aldermanic honors to succeed Albert Barrett from the Third ward. M. S. Simpson, stationer and newsdealer, who has been well known in Rossland since the early days of the camp, has consented to let his name be used, and his friends are satisfied that he will be elected by a rousing majority. Eli LaValley, the proprietor of the Spokane hotel, and another old-timer in the camp, will also be a candidate again at the coming election. William Greer, the owner of the Ottawa on Washington street, will likewise make the race. The nominations for the office will be received at noon on Tuesday next by William McQueen, who is returning officer for the occasion. The election will be held on Friday, and C. H. M. Cameron will be the deputy returning officer in charge of the polls. As the vote need not be taken in the ward from which the alderman will be chosen, the city hall will be used as the polling place.

No Liquidator Appointed.

CASCADE CITY, Jan. 15.—The report from Grand Forks to the Spokesman Review on the 10th inst., stating that a liquidator has been appointed to wind up the business of the B. O. Mercantile company of Cascade City, is utterly without foundation. Mr. Mayall, the manager of the firm, left for Spokane this morning.

WINDERMERE DIVISION.
