E. L. Richardson, manager of the Calgary Stampede of 1923, held under the patronage of the Prince of Wales and Governor-General Byng, announces that, owing to the enormous success of the great rodeo July 9-14 it will be staged annually instead of at intervals of several years, as heretofore. The recent Stampede was attended by 137,800 people.

Only once in the history of Canada was the gold production record set in 1922 exceeded, and that was in 1900, when the Yukon placers reached the peak of their yield. During 1922, 1,283,364 ounces of gold were mined in the Dominion. The value is set at \$26,116,050, an increase of 35% over the previous year's figures. In 1900, 1,350,057 ounces of gold were mined and the value was \$27,908,153.

Canada's trade is climbing ahead. Total trade in the three months ending June was \$462,544,438, an increase of \$110,841,056 over the corresponding three months of last year. For June alone total trade was \$179,720,516, an increase of \$44,944,732 over last year. Domestic exports in the three months increased approximately \$50,000,000 and imports approximately \$61,000,000.

Why Ford Predominates

## A Triumph of Mechanical Simplicity

The Ford is without superfluous parts, yet has everything needed for efficient operation.

Like all great engineering accomplishments, it has progressed through simplification—the reduction to fundamentals.

This process of simplification has brought into being many of those distinctive features which are found exclusively in Ford cars. The Ford planetary transmission and three-pedal control are among those features.

Experts agree that they are ideally suited to the small, light car.

Another feature is the Ford magneto, so remarkable in principle and so successful in practice that a complete unit was recently presented—by request—to the Smithsonian Institution.

There are many such features, but these are sufficient to indicate the sound foundation upon which engineers have pronounced the Ford to be a triumph of mechanical simplicity.
