CONDITIONS IN EUROPE

Peace seems as far off as ever in the Russo-Polish fighting area. The Poles are still advancing along the whole line north of the Pripiet. They have taken the important city of Gradno and are pursuing the fleeing Lithuanians east of that point. The Lithuanian Government is calling upon the people to resist the advance of the Poles who they say will take Vilna unless checked by outside influence. There renewal of hostilities by Poland against Lithuania after accepting the good offices of the League, has created a very unfavorable impression among the Allies, and the President of the Council of the League has sent a message urging Poland in her own interests to reestablish friendly relations with Lithuania. "The fact that Holland is considering measures for reinforcing the active forces of the country, and that France and Belgium have completed an agreement for mutual defence indicates that the feeling of security against further aggression by hostile powers is none too strong even yet. Evidently 'the great war, with the great peace that was to end war, did not assure peace in the minds of those who most need peace.' Conditions in Germany are far from reassuring. Dr. Koch, the German minister of home affairs, has been telling his people that the country has only two alternatives, higher taxation or bankruptcy. And with the 24-cent German mark valued in exchange operations at about two cents, it looks as if bankruptcy might come before higher taxation could have its effect. Italy is still convulsed with industrial unrest. Though the terms of settlement of the Italian labor troubles suggested by the Government gave the strikers more than has been accorded to labor in any other country, all at the expense of the employers, there are many sections of the men who refuse to accept the conditions. They found it easy to seize the factories, and have not had time to learn by experience that managerial control and financing ability are as necessary to business as skill and strength in the mechanical operations. They will learn, however, but it may cost the country its industries and themselves very much.

PILES

Dr. Chase's Ointment will relieve you at once and afford lasting benefit. 60c. a box; all dealers, or Edman, Baker & Co., Ltd., Toronto. Sample box free if you return this paper and enclose 2c. stamp to pay postage.

Rich, Red Blood The Greatest Need

Nearly all Ills are Due to Poor, Watery Blood—How to Improve Its Conditions

To be in a healthy condition the human body requires a constant supply of new, rich blood. Nearly all the ill from which people suffer arise from one cause—poverty of the blood. If the blood is rich and red it absorbs nourishment from the food which passes into the stomach and distributes that nourishment to the brain, nerves, muscles and all the organs of the body. When the blood is weak and poor in quality it cannot do its natural work of feeding the brain and body, and the result is weakness and disease.

Headaches and backaches, loss of appetite, poor digestion, nervousness, pimples and unsightly blotches on the skin, all indicate that the blood has become impure—that it is not doing its appointed work. If this condition is not remedied it will grow worse and worse, and a complete breakdown will eventually occur. To bring about a healthy condition of the blood no medicine can equal Dr. Williams' Pink Pills. Their one mission is to make new, rich blood, which reaches every part of the body bringing with it new health and increasing vitality. Thousands have testified to the benefit they have found in the use of Dr. Williams' Pink Pills when run down in health. Among these is Mrs. Bertha Kendall, Darling Avenue, Toronto, who says: "In the summer of 1918 I was in poor health. My appetite was variable, and I was weak and unfit for work, and I suffered a great deal from nervous headaches and palpitation of the heart. A lady friend recommended Dr. Williams' Pink Pills which I used with splendid results, as by the time I had taken six boxes I felt like a new woman. I think Dr. Williams' Pink Pills are worth their weight in gold to every nervous, sick woman, as they cure quickly and save big doctor bills." Dr. Williams' Pink Pills may be had from any dealer in medicine, or by mail at 50c a box or 6 boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Fraser Pulp Co To Issue Stocks For Ten Million

Fredericton, Oct. 21.—Consummation of the transfer of the New Brunswick Railway Company's extensive timber limits, amounting to approximately 1,500,000 acres, to the Fraser Companies, Limited, is now in course of completion at Montreal, it is reported here.

The option, which the Fraser interests obtained on the New Brunswick Railway Company's lands at a special meeting of the shareholders in June expired this month, and it has since been renewed, some difficulties which for a time threatened to put an end to negotiations having been overcome.

About \$10,000,000
The amount involved in the transaction is said to be between \$11,000,000 and \$12,000,000, and it is learned that there is soon to be a flotation of \$10,000,000, to be used to take care of the transaction by a new organization which will be known either as the Fraser Pulp and Paper Company, which will eventually absorb all the pulp and paper and lumber enterprises of the Fraser Co., Ltd.

A gift of \$40,000 has been made to the Redpath Library of McGill University by R. Blackner, Pasadena, Calif. The sum will be used for the purchase and endowment of a research library of zoology.

MacSwiney Died Monday Morning

London, Oct. 25.—Terence MacSwiney, Lord Mayor of Cork, died at Brixton prison, this city, at five forty o'clock this morning.

His death followed a hunger strike of more than 73 days, eclipsing any in the annals of the medical world. MacSwiney, who had been unconscious for several days, did not recover his faculties. Father Dominac, his private chaplain, and his brother, John MacSwiney, were with him when the end came. Father Dominac was at the prison all night, and did not leave until several hours after MacSwiney breathed his last.

John MacSwiney and the chaplain, who had been waiting down stairs in the prison, were told by prison officials at four thirty five o'clock that they should go to the mayor's bedside as they thought death was approaching. The brother asked for the privilege of communicating with other relatives who were not present but the officials, he alleges, refused him the use of a telephone.

After the prisoner's death his brother and the chaplain say they were not permitted to leave Brixton prison until six fifteen o'clock.

John MacSwiney immediately conveyed word to the widow of the Lord Mayor, who was staying at a west end hotel with Mr. and Mrs. O'Brien.

Mrs. MacSwiney, accompanied by her parents, and the Misses Annie and Mary MacSwiney, sisters of the Lord Mayor, arrived at Brixton prison at nine thirty o'clock.

CRISPS

There is no tyranny of the heart. There is a strain of latent ferocity in every emotionalist.

When Liberty rests on reason all is safe; when on emotion there is endless turmoil.

Democracy is secure so long as its members recognize the right of its most intelligent members to govern and control.

It is easy to reform the world; but hard to begin with oneself.

Idealism without a breakfast may be absurd; but materialism without a soul is tragic.

The aristocrat is of Nature's own creation: caste is the work of man's hands. Epictetus was a slave; Marcus Aurelius was born in a palace; yet both were true aristocrats.

When the classics are studied once more, not because they are old, but because they are superlatively beautiful and full of the wisdom born of experience, the reign of the crank in education will cease.

We have standardized education now for a decade, and the net result is bad English, bad manners, and bad sense.

During periods of cloud-burst, when rivers are engorged with silt and overflow their banks, chips, straws, and debris of all kinds float on the surface. It is the same with the human as with the natural river. When the roily waters of anarchy subside, these mad theories that now float on the surface will pass out to sea, and we shall be able to go ahead in safety and avoid the shoals, because the waters will be clear, as of old.

HIS IDEA

"You can't get an intoxicating drink except with a doctor's prescription," remarked Mrs. Corn tassel.

"Yes," replied her husband. "I was just thinkin' of writin' to our boy Josh, tellin' him to drop law an' study medicine."

IRONY OF FATE

"Speakin' of the irony of fate," began Uncle Bill Bottletop.

"What do you know about it?" "Quite some. This is the first Spring that my little mint patch has looked like it was really goin' to amount to something."

IN THE OLD DAYS

"How did you come to be lying there in the gutter?" demanded the policeman severely.

"It's all right," replied the inebriated one. "I jus' happened to walk between two lamp-posts and leaned against the wrong one."

ONE ATTRACTION

An irritable dyspeptic was advised by his physician to take up golf to improve his health, and went to purchase an outfit.

"I suppose I've got to play the game because it's doctor's orders."

A FRIEND IN NEED

"Hear about Bill Bottletop? He's got a case of lumbago at his house."

"I guess I'd better run over and help him drink it up."

CAREFUL

"Do you care for Brownin'?" asked the poetical minstrel of his conspicuously dressed companion.

"Not a bit," answered the other. "My husband has an awfully jealous disposition."

SUGAR FOR A SUPERANNUATED SYLPH

"Miss Miss, I think that hotel clerk just lovely."

"Sweet-Why so?"

"Maude, He wrote opposite her to Petit Roche, and asked six cases of gin which had arrived there."

British Columbia Goes Wet by Large Majority

Vancouver, B. C., Oct. 20.—British Columbia today voted overwhelmingly in favor of Government control of the sale of liquor. At this hour (11 o'clock) with returns from many parts of the province indicating that the present prohibition act has been defeated in cities, towns and villages the majority in favor of Government control totals approximately 15,000. Moderationists, however, claim that when final figures are in the majority in favor of Government control will total close to 30,000.

All the cities in the lower mainland and Vancouver Island returned large majorities in favor of the repeal of the present act, the outstanding surprise of the voting being the large "wet" majority recorded in this city of 10,176.

The heaviest vote in the history of the province was recorded and more women than men were numbered in the voters list. Victory of the moderationists will mean a generous system of Government sale. The exact details of the scheme under Government control have not yet been worked out.

Teacher Killed In Auto Accident

Miss Alice McLeod, aged eighteen, school teacher on Fredericton Road, parish of Salisbury, is dead. Dalbert Wilson and his sister, Miss Annie Wilson, are seriously injured as the result of an automobile accident which occurred between 9 and 10 o'clock Saturday night on the Fredericton Road, near Salisbury village. The accident was caused by the Ford motor, which was driven by Dalbert Wilson, striking a stone while traveling at a moderate rate of speed and turning turtle. As the car struck a stone it swerved and the driver attempted to right it at the same time applying the brakes with the result that the automobile turned completely over and landed right side up on its wheels straddle of the ditch. The occupants of the car consisting of the driver, Dalbert Wilson, his sister and Miss McLeod, were all thrown out with great violence, all being rendered unconscious. Examination showed that Miss McLeod sustained fatal injuries. Her neck was broken and her skull fractured, but she survived her terrible injuries about half an hour. Dalbert Wilson has had his collar bone broken and was stunned. His sister was also picked up unconscious. Although the injuries sustained by both are serious, their condition is not considered dangerous. Miss McLeod, the victim of the accident, which is one of the worst happening in this vicinity, lived on the Fredericton Road, where she taught school. She was a daughter of Richard McLeod, Fredericton Road.

PROHIBITION MATTERS

On Saturday evening Oct. 16th, Inspectors James and Adam Dickson drove to Eel ground and destroyed a large quantity of strong beer, which when analyzed was found to have 9.80 Proof Spirits. On Thursday, Oct. 14th, Inspector H. Saunders seized six cases of liquor. The party to whom the liquor was addressed sent an order for it but it was refused. He afterwards came for it himself, but when questioned by the Inspectors said that he had not sent for it, but that his brother had ordered it. In consequence the Inspectors took charge of it. On Monday, Oct. 18th, Inspector Campbell, at Bathurst went about 16 cases to dispose of as soon as the County Court closes.

Beaverbrook On Conditions In America

London, Oct. 22.—Lord Beaverbrook, who has just returned from an extensive tour in Canada and America, discussed some of his impressions with the "Mail Gazette" representative. He declared, he is abounding in prosperity, and has had the biggest crop in history—a bumper crop. As it was described on all hands, and as a consequence, wheat prices are falling. The outlook is most promising in every way.

As to the United States, the stabilization of prices, he says, is coming rapidly. There is a tremendous drop in sugar prices and a marked decline in the great American cereal crop. In Indian corn. The bottom is out of the motor-car market, and there is a slump that must have important results.

Lord Beaverbrook's investigations into the supply and prospects of newsprint, that all-important essential to the production of newspapers, show that the Canadian manufacturing capacity has considerably increased, and further extensions are being carried out to the already greatly developed mills.

As to prices, Lord Beaverbrook is convinced that they are bound to be reduced in the near future.

Decrease In Lumber Cut

The lumber business of the Miramichi and other shipping ports in New Brunswick is still suffering from the effects of the war, and is a long way from getting back into its old groove. Practically all the lumber wharves (with the exception of the one devastated by fire are piled to their full capacity with lumber, and the manufacturers have to haul their cut long distances to get piling room. As a result of the small shipments from this port this season, there will be more lumber on hand this fall than there was last, and a much heavier stock of sawn lumber will be wintered on the Miramichi this year than ever before. Consequently there is very little encouragement for manufacturers to go into the woods and get out more logs.

The outlook for 1921 is not at all bright. There are large quantities of British Government stock (bought for war purposes) still here, and this is having a paralyzing effect on the British market. This, combined with the low rate of exchange, is making United Kingdom business dead dull, and the increased rail freight to the United States is having a corresponding effect on the American market.

Several of the millmen have not sold their product for the last two years, whilst others have not sold their 1919 cut, and those who did say count themselves lucky. Ocean freights have eased a little, but the low rate of exchange makes business impossible.

It looks as if the high prices ruling the past few years have caused a heavy overproduction, and the only thing that will help to adjust matters will be a greatly curtailed output in 1921. This and this alone will put the lumber business on firmer ground.

World.
dressed to a fictitious name. Inspector Adam Dickson had Thomas Murphy of Chatham in the Police Court on Tuesday morning. He was arrested at 1.15 a. m. by Inspector James Dickson and had liquor in his possession. He was fined \$10.00 and costs \$5.00. The Inspectors have about 16 cases to dispose of as soon as the County Court closes.
