Some Benefits of a Well Devised

PRAINAGE IS IMPORTANT

Drainage Plan.

Guesswork Is the Poorest Method to Adopt-Get the Land Levels and Then Arrange for Tiling - How to Protect Drainage Outlets.

(Contributed by Ontario Department Agriculture, Toronto.)

MEN WANTED FOR DETECTIVE erect a building be it ever Work Write J. Ganor, former Govso small, the first thing he does is to make a plan mment detective, Danville, Ills M.-27, A.-4-11-18 That plan may be on paper or it may exist only in the mind of the builder WANTED- POSITION BY FIRST yet it is a plan. Without a plan to class all round baker. P.O. Box 84, follow, a builder cannot do good M.-27-29. work. The same is true of tile drain age. The man who places a "string" er "line" of tile in a watercourse WANTED-AUTO PAINTERS EXwhich traverses his fields, should not perienced in varnishing, color varndo so without asking himself such ishing, varnish rubbing and rough questions as: "Am I putting this tile stuff rubbing. Apply stating exin the lowest part?" "Will I be able perience to General Motors of Canto get a satisfactory outlet? How ada, Ltd., Oshawa, Ont. M.22-29 many acres will this tile drain, and is it large enough to drain it satis factorily? Have I sufficient grade to MAN WITH OR WITHOUT FORD Car can make big money selling drain the holes in the rear fifty?"

If he does not ask himself these questions he is like a builder without

work cannot be efficient. All these

questions the drainage plan answers No matter how small the mean for immediate construction of drains, or how few the drains which one is about to instal, he should not do so without having first laid out a plan of which these drains will be a part. On rolling land such a plan is not hard to decide upon, because the differences in elevation are very amiliar with such lands is able to intelligently plan a system of drains for them. But where the area is large and the topography irregular or very flat, guesswork is out of the question. It is then that we must resort to the tape and the levelling

instrument for reliable information A drainage plan shows first of all the differences in height or elevation etween all parts of the farm over which the survey extended. This al lows the owner of the land to plan his own system of drainage. The posthe farm lays bare the most advanageous routes for tile drains, from study of the levels and contours o plan it is possible to calculate the ceage which each main tile mus drain. This information together with the fall or grade procurable is he only true guide to help us decid upon the size of tile needed in any given drain. It is only when the planner has a picture of the whole pro-

efficient yet economical plan of drains for any piece of land. Future Benefits.-The benefits o a plan do not end with the comple tion of the drainage system. Only those of us who have tried long and hard to find a drain; the location o the value of guidance such as is ofwith delivery box. Cheap for cash fered by a plan. When a tile-drained of a plan of drains adds greatly to the value of the farm. The plan is of equal value to both the seller and buyer. With proper care well-constructed tile drains will give good service for several generations; therefore for the convenience of our children and grandchildren it is ne-

ject before him that he can draft an

ground drainage work. There is another way in which a drainage plan is very heipful to a farm owner; it is a splendid guide toward ascertaining the acreage of any field or part of the farm. Fences are located on the plan, and the whole plan drawn to scale, so that with the aid of a rule it is possible to measure the area of any part of the land surveyed. This is of great assistance in planning a season's crops as well as in calculating yields

cessary to have a plan of our under-

Tile drainage pays; but, before you start even a small system by all means secure a plan—G. Heimpel, O. A. College, Guelph.

Protecting Drainage Outlets.

Tile, particularly clay tile, should irain. If a piece of old gas pipe, eight or ten feet long, can be secured. this should be placed in the drain in place of the last few tile. Failing this a piece of corrugated steel, or even a plank trough is much better than running the tile right to the end, where they will be broken, washed into the outlet, or otherwise destroyed, allowing the earth to roll in and stop he flow of water.

Under any condition the bank is iable to wear away. Animals pasturing in the field may tramp it down, and block the tile, so in the second place, an abutment should be built hrough which the outlet discharges its water and the bank will be kept in a state of preservation. This may be made of concrete, stone or plank, and should be a permanent structure. In some cases where the flow is heavy and the water would have a tendency to undermine the wall, it is well to build an apron on which the force of the falling water is broken.

There is still another precaution which should be given due considertion, Frequently small animals, muskrats, coons, ground hogs and others, seek refuge in the tile. Here they are entrapped, and form a dam to the flowing water. To overcome such, the outlet should have bars cross the end. These may be quite small, and close together so that nothing can get through. A screen may be fitted over the end, but unless the mesh is quite large the water is retarded in its flow. Sometimes the irst tile is threaded with wire. This

forms a good protection.

When all these devices are given attention, the outlet should remain in a state of efficiency for years, and the system, if properly installed, should give satisfaction. F. L. Ferguson, O. A. College, Guelph.

C. E. Patterson of Clappison's Corners near Hamilton, shot a brown vulture on his farm.

Where You'll Find Fire Boxes

OCTOR WARD, The Specialist

SACKACHE, LUMBAGO, RHEUMMATISM, STOMACH AND LIVER TROUBLES, ACNE, SKIN DIS-EASES, CATARRH, ASTHMA, RECTAL TROUBLES, PILES, FISTULA AND BLOOD CONDITIONS. The knowledge gained from many years' experience in treating diseases just like yours is of much ben o you and assures the ailing man of prompt relief. When a man knows that he is again feeling well-the is rid of his ailment-he feels that a heavy load has been lifted from his shoulders, I give every pati ent the benefit of the knowledge accuired through the long experience of a graduated, licensed and registe ed specialist, in order to bring about the most satisfactory results in the shortest possible time.

NERVE EXHAUSTION A CONDITION AFFECTING MANY MEN-THE GREAT AM-ERICAN DISEASE - IT IS BROUGHT ON BY OUR MAN-NER OF LIVING-OUR WORRY AND HURRY - AMERI-CANS EXHAUST MORE NERVOUS ENERGY THAN ANY

OTHER RACE OF PEOPLE.

There are a great many men who need treatment for their nervous system. These men do not know what is the reason they don't feel right-why they can't work like they used to-why they tire so easily and why they are irritable, nervous, despondent, weak, pale and lack ambition. These conditions require the expert knowledge and treatment of a specialist who has had many years' experience in just such ailments. A specialist learns by experience to know just the right treatment at the right time so that the patient can be dismissed at the earliest possible time. Men affected with nervous exhausion have no endurance-no ambition -everything they attempt is an effort. Life to them appears as a long, gloomy future. Their appetite is poor and variable—they become irritable, cross, and discouraged. They have pains and aches in various parts of the body and there is often indigestion and pains in the stomach. Sleepless, wakeful and restless nights fol-

RHEUMATIC AILMENTS

SCIATICA AND OTHER FORMS OF RHEUMATISM, LUMBA-GO, PAINS IN BACK, SWELLING, ACHING, PAINFUL CONDITIONS IN ANY PART OF THE BODY-INFLAMED AND SWOLLEN JOINTS OF LEGS AND ARMS - MANY OTHER SYMPTOMS

Hundreds of men are suffering with some form of Rheumatism. Many of these men go from day to day suffering untold agonies thinking they cannot be cured. They have tried liniments, rubbing, massage, salts and other treatments without experiencing any relief, and they are now going through life thinking they are martyrs to that burden called Rheumatism. If these men could only know how easy it is to get rid of many rheumatic conditions I know they would not suffer another single day. Then all sufferers of rheumatism would be strong and healthy if they could get rid of the condition. Rheu matic patients are nearly all strong and robust before being attached by this ailment, and therefore it is so hard for the man to understand why he should suffer the agonies of such a condition. When a man gets rid of such a condition he feels that a heavy burden has been lifted from his life, and he starts right out to make up for lost time both in money and pleasure. When a man comes to my office suffering with the above condition he is given a most careful examination, and he is given treatment that he feels is giving him great benefit.
