Rified Guńs vs. Protests.

ZANZIBAR, Oct. 20.—Advices received here by British vessels which have arrived from the Zambesi River state that the British guaboats entered the river Oct. 8, despite the protests of the Portuguese authorities. In their company was a steamer belonging to the British African Lakes Company, which had in tow a flotilla of lighters and canoes, laden with stores and munitions of war. The entire native population lined the banks of the river, shouting, dancing and clapping their hands. The Portuguese made a verbal protest against the guaboats entering the river.

Storm and Fog—Many Casualties.

London, Oct. 20.—The storm that prevailed along the North British coasts Saturday was followed by a dense fog. Vice-Admiral Sir Michael Seymour and the 240 officers and men belonging to the British fleet who were left on shore at Scarborough Saturday morning when the squadron put to sea to escape being blown ashore, made an attempt to rejoin their vessels this morning. The heavy sea had gone down, but the fog was so thick it was impossible to find the vessels, and the boats returned to the town. When the fleet ran out to scathe gunboat Speedwell had only one officer on he el. Shortly after noon to-day the fog he had given way and severely injured thirteen of the crew, their legs and arms and ribs being broken. Three other vessels belonging to the fleet have signaled that fatal accidents occurred on board.

"How Not to Do It."

LONDON, Oct. 20.—Mr. J. Tuke, the good d Quaker who helped administer the mine funds in Ireland in 1846-48 and in sollow the indiscriminate distribution of money from America or England, but in certain districts of Donegal, Mayo, Galway, Kerry and Cork, the Government will have to interfere actively, provide work for the people, and use every means in its power to avert or minimize distress. But this is precisely what is not being done. Not one of the much-vaunted public works promised by the Government has yet been commenced, and some of the districts enumerated by Mr. Tuke have not been included in the official schemes. Mr. Balfour says he has received many exhaustive reports, but he has not yet acted upon them, and Dublin Castle will for the first time in its history belle its evil repute if it does not blunder atrociously in this matter. Even Mr. Tuke is evidently uneasy on this point. While exhorting the Government to do its duty he expresses the opportunities for the exercise of private charity, and suggests as two methods of meeting the distress the supply of wheaten flour, Indian meal and potatoes at market prices in the congested districts and the assurance that "from one source or other" a supply of the best seed potatoes and oats shall be forthcoming.

A Four-Thousand-Pound Cheese. A Four-Thousand-Pound Cheese.

At the cheese factory in East Otto last Thursday there was put in the hoop the biggest cheese ever made in this region, and probably the largest ever made in the United States. It measures 5 feet in diameter and is 39 inches high. Its weight when cured will be 4,000 pounds, and fully 38,000 pounds of milk was used in its manufacture. The abundant pasturage made the September milk unusually rich, so this huge cheese is expected to be of prime quality. About four weeks will be required to cure it thoroughly. This record breaker was made for a grocery house of Cincinnati, who are about to occupy a large new building. It is wanted as an attraction for the opening.—[Buffale Commercial.

A BRAVE ENGINEER.

The Most Wonderful Escape on Record

—150 Passengers Imporited and

No One Killed.

Erie, Pa., Oct. 20.—A horrible catastrophe was averted on the Lake Shore and Michigan Southern Railway yesterday near Silver Creek, through the bravery and cool-headed conduct of an engineer. A detached section of an east-bound freight train had been run into by another section of the freight, and a portion of the debris was thrown on the west-bound track, just as No. 5 fast train was going west. Engineer John Burns, of Buffalo, of the passenger, was booming down the hill at the rate of 50 miles an hour. He saw a truck ahead, and then a freight car. He saw an attempt to stop his train and jump wouldsacrifice the lives of his 150 passengers. His fireman had left him, and freight cars mounted one on top of another were ahead. In a flash of a second Engineer Burns resolved to stand by his post, and, springing from his seat behind the boller, put on a very pound of steam, and opening his sand box so as to get a firmer hold of the rail, the iron monster, "Ed Gallop," gave a snort and aprang forward, threw the truck, and cut through the freight car and other debris. Burns, with wonderful fortitude, held the wreck. The sides were torn out of three conches and the screens of women rose high above the screeching of the steam, and the moment he had cleared the wreck. port contained merely the result of the labors of the Board of Governors. They had not, of course, always seen eye to eye, and these conclusions were reached after much debate and arduous labor. Woodstock College had done much excellent work, and now the university was preparing to take a creditable place in the country. Some had thought they had not looked sufficiently to the theological department, but he would say that in his opinion the theological department was their great work. (Applause.) Still he believed that what had been done in the arts department and in Woodstock College would greatly benefit the Theological College. What they needed now was unity. The Baptists had at this time in the country a splendid opportunity to build up a mighty educational power, but they must stand firmly together and the results would be most creditable to the denomination.

denomination.

Mr. A. A. Ayre, of Montreal, seconded the adoption of the report.

Dr. Newman made a plea for the students' aid fund. They had a great need for educated men now in the ministry, and it had been a crying evil that men had gone to Woodstock College and then left it for the pastorate long before they had graduated. With proper assistance this need not occur.

his heroism had saved the train. But one passenger was seriously injured, and that was Mrs. Mary Kane, of Denniston, O., who was in the smoker. Her injuries are internal, and several ribs are broken. Joseph Meyers, of Cleveland, was badly hurt about the head. Little Sissie Heitner, daughter of David Heitner, of Chicago, ahoulder dislocated; News Agent John Quinn, of Buffalo, arm hurt. A number of others were slightly injured. After the people got quieted, C. M. Spitzer, a Boston banker, headed a list and over \$400 was presented to Engineer Burns by the passengers. ated. With proper assistance this need not occur.

Rev. R. G. Boville wished to move an amendment to the report. He did not believe that the time had come for the establishment of an arts college. They needed now money for the securing of a library, the erection of a university building and of a science hall, if they were to make their arts college effective. Where was this money to come from? He would like to have it settled whether our boards were independent or whether they report to the convention. Now that they had an arts college they would all work for it, arts college they would all work for it, but the Baptist Convention ought to safe-guard its own independent rights. He moved the following amendment:

The attempt at the meeting of the Western Freight Association at Chicago to advance freight rates between Chicago and St. Paul to the former basis of 60 cents first class failed.

It is rumored that the M. C. R. intend constructing a tunnel under the Detroit River between Courtright and St. Clair and making the St. Clair branch the main line of the way.

nominations to this convention before calling them into existence.

Rev. E. W. Dadson seconded the amendment. He believed that policy is the business of the convention and not of the board. He had not thought they needed an arts college, but now one had been established. They must all help to build it up. But they could not tell what the boards would do next. They should have come to this body and said, "What is your will, brethren."

Dr. Rand defended the governors. Rev.

Dr. Raud defended the governors. Rev. Elmore Harris said they must face the fact that the Boards were independent.
Rev. James Grant was with Brother Dadson in opposition to an arts college. He charged the Board with stealing a march on the convention in founding the arts college, and spoke of the expedients used at the Ottawa Convention to delay and defeat certain motions.

Praying that God will bless all his people that worship him in spirit and in truth and commending them to his loving care. Sincerely yours, R. NEALE.

The reason for thus suddenly agreeing to the resignation of Neil is to be found in the information which had recently come to the ears of the deacons, which, however, had been preceded by the facts made public by Mr. Ashplant and others, as well as by the affidavit which was procured from Mr. Colwell, issuer of marriage licenses, which went to show that Moffat Neill had changed his name to "R. The deacons, therefore, decided to ask for his resignation and pay his salary to the end of the month, and he accordingly went away from the city by a late train on Saturday night.

The Former Husband's Testimony.

The statements made by Mr. Ashplant in the above letter are very strong. The foundations for them are to be found in a letter which was received last week. It was addressed to the pastor of the Baptist Church and was returned by the deacons to the postoffice authorities, because the church was without a pastor. The postal authorities advised the deacons to open the letter and upon doing so they found that it was from a Chicago man, who claimed, as Deacon George Nicol related, that Mr. R. Moffat Neill had eloped with his wife and that since her elopement he had secured a divorce. Mr. Neill was furthermore charged in the letter with having

It has since been ascertained that the name signed to the mysterious letter was signed "Hunt" being the same name as that given by Mr. Neill's bride when married in this city about a year ago.
