There are those who predict that the brilliant young Welsh Radical will some day be the leader of a reorganized and reconstructed Liberal party. He is only 41 years of age, but is already in the front rank of parliamentarians. In the debates on the education bill he was admittedly the most effective speaker on the Opposition side, and was paid a generous compliment by the Premier himself. He is taunted by his Canadian critics with being a pro-Boer be cause in common with some of the best men in British public life he opposed the South African war. He was mobbed in Birmingham and other places, but he showed the courage of have been shared by more of his countrymen if they could have foreseen the magnitude of the struggle, the terrible unpreparedness of Great Britain, for which some of her statesmen must be held responsible, and the subsequent surrender of the Government to the capitalists of the Rand (mostly foreigners), who have been permitted to bring in Chinese coolies to work the mines under a system little removed from slavery. The realization of a white man's South Africa has been indefinitely postponed.

Such men as Lloyd-George, who are not afraid to stand up for what they lar opinion and popular fury are the salt of British public life. The British tutional freedom upon which the libercolonies rest. Mr. Lloyd-George took the constitutional view of the Dundonald case, holding that an Imperial officer had no right to dictate to the Canadian Government. While Canada is quite capable of taking care of the dispute without aid or interference from the mother country, it should be gratifying to Canadians to find self-governing rights of this country. Those who are assailing Mr. Lloyd-George are assailing the British Government, which assented to his views by recalling Lord Dundonald.
