Live Hogs-It is safe to say that there

is not one-half as many live hogs in this Province as there were a year ago; in-deed, some of the buyers place the number at about 30 to 35 per cent of last year. There is no better indication of the shortage than the Toronto markets, as on any one day a year ago there were more live hogs offered than the combined offerings the past two weeks. The prospects are that the shortage will continue for some time, as a large number of the farmers have sold their breedings sows, and are unable to get suitable animals for breeding purposes. The packers say that the price paid at present for live hogs are price paid at present for live hog higheo than they should be, as the of bacon in the English markets is lower.

will be about \$6 50 per cwt.
