BRITISH AWAITING TEMPERANCE MOVE

Cabinet, Meeting Today, Expected To Announce Some Drastic Measure.

INTEREST IN EAST WAR

Situation In the Carpathians Shares Prominence With Liquor Question.

[Canadian Press.]

London, April 7 .- The military situation in the Carpathians is competing with the prohibition question in the interest of the British public.

The cabinet meets today. It is exected that announcement will be made of measures to provide drastic restrictions on the consumption of liquors, but total prohibition is not expected.

Attention is concentrated on the Carpathian passes, where the Russians are bringing up heavy reinforcements to push their attack, the success of which is expected only through weight of numbers. On the other hand, the Austrian and German commanders also are making strenuous efforts to strengthen

Counter Claims. Petrograd reports that section near

the Uzsok Pass, where Vienna admits a retirement, extends for a distance of seventeen miles. To offset this, Vienna claims a counter offensive movement near Lupkow Pass, where the Austrians report the taking of several Russian positions with the capture of 7,000 prisoners. A conservative inter pretation of both the Russian and the Austrian reports leads to the belief that the Russian offensive at Lupkow has been checked, while they have forced their way through the Rostok Pass, capturing two villages on the southern side of the range.

Germans in Danger. In the western arena of the war the French continue their offensive movement between the Meuse and the Lorraine frontier. Their reported gains in the Ailly forest indicate the possibility of a new danger for the Germans holding St. Mihiel, while the advance to the east of Verdun is regarded in London as threatening St. Mihiel from the Berlin reports heavy fighting in this region without results for the
