

GERMAN MERCHANTS PLEASED AT TREATY PROSPECT

Statement That There Is a Possibility of Commercial Treaty With Canada Comes as an Agreeable Surprise

Berlin, April 8.—The statement that there is possibility of a commercial treaty being concluded between Germany and Canada comes as an agreeable surprise to German business men who deplore the fact that they are losing ground rapidly in Canada.

The Tageblatt points out that the settlement of the conflict with Canada will have the effect of removing the commercial relations with England and urges that an agreement of a permanent nature should be arrived at as soon as possible.

There is all the more necessity for an early conclusion of such an agreement on a sound basis, it says, as there seems to be every prospect of the idea of tariff reform being realized in England.

What We Take Home

Six weeks ago we offered for subscription 300,000 shares of the Preference Stock of this Corporation. Within that comparatively short time, over one-third of the capital necessary for the purchase of the 100 square miles of timber limits and for the erection of the first unit, 90-ton pulp plant, has been subscribed and every dollar has been secured from Vancouver Island.

What does this splendid result mean? It means, if it means anything, that the people of Vancouver Island are awakening to the great possibilities in the development of their natural resources, and are prepared to support any industry that is built upon good clean, sound, substantial business principles and which has for its object the utilization of the timber or mineral resources. When we organized the company, considerable criticism was manifested because we were obliged to sell our stock through the medium of the press and by personal solicitation. We adopted this plan because it was the only policy which promised success, and the only manner of bringing the proposition to the attention of the intelligent thinking people of Vancouver Island.

The majority of the big enterprises of the world are those that have been built up by popular subscription from the plain people. In every political, industrial or educational movement in this or any other country it has always been the plain intelligent people who have responded to its formation and made it possible. As a matter of fact, the majority of the large corporations of both the United States and Canada are made up of small stockholders. The United States Steel Corporation has 110,000; Pennsylvania Railroad 60,000; of which are women; Union Pacific and Southern Railway 30,000; Atchafalaya, Topoka and Santa Fe Railroad 25,000; New York Central 22,000; American Sugar Co. 20,000; Bell Telephone 24,000; Pullman Car Co. 15,000; American Smelter Co. 10,000; General Electric Co. 10,000; National Lead 8,000. The average individual holding in the above stocks represents only 85 shares. If we are to develop the great natural resources which nature has so bountifully supplied us with, we must get out into the great highlands and get the plain people to support us.

We now offer for subscription the remainder of the first issue of 300,000 preference shares in blocks of 100 shares at \$1.00 per share.

Payments: Fifteen per cent on application, fifteen per cent in thirty days after a like amount has been paid on the Ordinary Stock, both Stocks thereafter participate equally.
