By a Close Squeeze the Council Votes Down

The city council sat till 25 minutes to 1 this morning, one of the longest sessions is to be knighted at the instance principally of Louisa of Lorne, who thinks he did not get fair treatment in Canada. Col. Middleton, according to the same on record. Among the business trans acted, not specially referred to elsewhere, the council struck out the recomme tion of the waterworks committee giving letter, is not to the tender for supplying hydrants to the Why not give it to Col. Denison ? department at \$34.50 to John Perkins, and pstituting Lauder, Thornton & Co. Both tenders were the same, and the rea-son given for the change was that Lauder & Co. had the tender last year and gave every satisfaction. None of the other contracts of the water department were

contracts of the water department were altered. The council went into committee of the whole on a report from the board of works recommending that the street railway a double track in Yonge street, from King to Front. The company promised in the event of being allowed to do this, to run their cars along Queen street east to the Don, At the last meet-ing a petition was presented by Ald. Piper signed by 2000 oitizens praying that this portion of the street be tracked. Ald, Piper voted against it last night. Strong opposition was offered both before the board of works and the council by the wholesale merchants along the street and express company. The matter was dis-cussed for an hour and a half last night, and Alex. Manning and P. Hughes were permitted to speak against it. Several motions and amendments were moved in committee of the whole and in council and the relative strength of the opposing fac-tions can be understood from the following vote on a motion by Ald. Harvie to allow a double track :

Alluding to the large number of heavy salmon c ught in British streams this season the Manchester (Eng.) Sporting Chronicle says: "This year's spring fishing will be remembered for the unusual number of heavy salmon which have been landed ; and, strange to say, the biggest fish have been taken from English rivers. The Tweed can boast of 43 pounds, the Tay of 41 pounds, and several salmon of about forty pounds have been captured on Irish rivers; but the other day a fish of fifty-one pounds was landed from the Ouse, near York; and another of forty-eight pounds was taken from the Wye at Red. Nearly 1000 fher passengers were persons who had heard me lecture on the Northwest in my recent tour of Brit-ain, and they were bound for our new country. The vessel was loaded and the prospects are that every boat of the line will have all the freight and passengers they can carry. I am receiving favorable accounts from England of intended migra-tions, and equally favorable accounts from our settlers already at Crescent Lake. Mr. Moore has late y issued a capital pocket guide for the Northwest settler. He started from Vladikavkas, a cossack village, where from the age of 6 he had given concerts, and he hoped to obtain a permanent appointment in the capital.— Land and Water.
