

The announcement is made of a combine of several of the large cotton duck factories in the United States, which have been incorporated under the New Jersey laws, with a capital of \$50,000,000.

Morris Cogan has resigned as overseer of carding for the Canadian Colored Cotton Co. at Merriton, Ont., and accepted a position as superintendent of the Beaver Dam, Wis., cotton mills. D. J. Scott, second hand at Merriton, has been promoted to overseer and Walter Davidson, third hand, has been made second hand.

—Sidney Moore, of Philadelphia, has patented a loom attachment, which may be adjusted to any make or style of loom, and which prevents the filling from catching in the selvages from the boxes, thereby making a perfect selvage and making steaming of filling unnecessary.

The Tetrault Sewing Machine Co., Ltd., have applied for incorporation, with a capital stock of \$25,000, with head office at Montreal. The applicants are H. Bernard, V. St. Denis, widow of H. Mercier, J. A. Dion, L. Dion, H. Tetrault, J. P. Morin, L. Deschamps, G. Tetrault, F. Tetrault, M. Gray, J. C. McNeil, C. Dignard, G. N. Monty and E. Monty.

## THE LATEST

## IMPROVED DOUBLE-BED ROTARY

## CLOTH PRESS

The bed plates are self-adjusting, the levers that operate them being mounted upon sliding steel fulcrum bars within the frames. The trussing apparatus of the bed plates is so arranged as to permit not only a forcing of the centres of the bed plates in a forward direction, toward the cylinder, but also away from it, which is of the utmost importance if the bed plates should ever become sprung. Bed plates and cylinder after being cold finished, are ground absolutely true while heated by steam at 75 lbs. pressure, insuring perfectly straight and uniform pressing surfaces. Pressure is applied and removed instantaneously, and by power.
