

execution of useful and productive works. A circular has been written by Mr. Labouchere to the different Lords-Lieutenants, enclosing a letter to the chairman of the Board of Public Works, which sets forth his excellency's decision.

"The formation of a naval depot at Cork seems settled. A correspondence has appeared in the Cork Examiner, from which it appears that the Government will immediately begin to erect large coal stores, wharfs, &c., capable of containing 20,000 to 30,000 tons of coals; and they also intend to construct foundries, &c., for repairing and fitting her Majesty's steamers. Captain James, of the Engineers, is appointed to go to Cove, to survey and report how Cork Harbour and Haulbowline Island may be made more available as a naval station. It is the intention of the Government to erect a pier at Cove, for the use of large class steamers, as well as for a harbour of refuge and general landing-place." The Lords of the Admiralty have determined forthwith to commission and send to Cove a permanent guard-ship.

"Presentment sessions continue to be held in different districts, without variation in their general character. Many small amounts have been voted. At Killarney £15,000 was voted for the present. At Kenmare the amount was, after some discussion, fixed at £20,000. Fermoy has presented £17,000."

In consequence of the scarcity of food, a strong desire is expressed that bread stuffs should be immediately admitted into the United Kingdom duty free. The prices of corn of all kinds had advanced and were likely to be sustained. Ashes both Pots and Pearls scarce and in good demand at 28s. per cwt. For timber the demand continued good and prices improving; the supply compared with that of last year was considerably diminished, and the deficiency not likely to be made up. A great many vessels bound to and from Quebec suffered more or less in the terrible gales of Sept., a list of which would exceed the limits which we must set to that branch of intelligence.

Lord Elgin, it is said, will marry one of the daughters of the late Lord Durham, which may delay his arrival in the Province beyond the present month in which it was otherwise expected that he would have assumed his government.

RESTORATION OF MAGISTRATES IN IRELAND.—The Lord Lieutenant seems ready to restore to the magistracy such gentlemen as were removed from it on account of their adherence to Orange principles, as well as those who owed their removal to their advocacy of repeal. Mr. James Watson, who was deprived of his commission of Deputy Lieutenant by Lord Chancellor St. John, has had the offer of restoration, but declines; Mr. Cleland of Rath Gael House had voluntarily resigned in consequence of Mr. Watson's removal; the Earl of Besborough has offered to restore him, but the appearance of his being done in consequence of Mr. Watson's spontaneous act, and not as the Lord Lieutenant's spontaneous act, has induced that gentleman also to decline.

SHIPS OF WAR USED FOR PRESERVING LIFE.—In consequence of the great distress in Ireland, arising from the failure of the potato crop, various reports have been circulated as to what the government is about to do to relieve the necessitous population. As to what are the intentions of the government, we will not venture any speculation, but what has actually been ordered we may inform our readers. Six of her Majesty's steam-vessels and two ordnance lighters are at present employed on the coast of Ireland, not only in conveying Indian corn meal, but also ship biscuit, from Cork, to the various points on the coast and up the rivers of Ireland. Her Majesty's 44-gun frigate Madagascar, which arrived at Cork, from Plymouth, having been fitted up as a store-ship. There she is loading with Indian corn and other provisions, and when she has been quite fitted she is to be towed to the Shannon, and is to be moored at the island of Foynes, about twenty miles from Limerick, as a depot for provisions for that district. She is a very capacious ship, measuring more than 1,100 tons, and in order that she may be as roomy as possible, her masts and rigging are to be taken out of her. From this ship, the Swallow and other steamers will take provisions up the Shannon. The government have likewise ordered that two more sailing men-of-war shall be fitted at Plymouth dockyard for the same purposes as the Madagascar. These are the Andromeda, another 44 gun frigate, of above 1,300 tons; and the Andromache, a 26 gun ship, of 700 tons. It is understood likewise that arrangements have been made by the government and the admiralty to put into active operation the Royal William Victualing Establishment, at Plymouth, for the purpose of grinding Indian corn, and the manufacture of biscuit.—Morning Herald.

INCREASED STEAM COMMUNICATION WITH BRAZIL.—It is expected that the communication with Brazil will shortly be rendered available for the transmission of letters fortnightly, in consequence of the co-operation that is contemplated between the Oriental Steam Navigation Company and Messrs. Hallfield and Co., of Liverpool, who are about to build seven more steamers of size and power similar to the Antelope (which recently sailed on its experimental voyage to Pernambuco, Bahia, and Rio), and thus the packets that now take the letters will most probably be set aside for a conveyance so much more speedy.

THE CONTINENT.—The marriage of the Duc de Montpensier with the Infanta, Donna Luisa of Spain, was solemnized at Madrid on the 10th Oct.: the Queen of Spain, her sister, being married at the same time to Don Francisco de Assis, Duc de Cadix. The French Prince and his brother, the Duc d'Aumale, entered the city four days before, and were received with great respect and display by the authorities, but in perfect silence by the people. A second protest was presented by the British Ambassador, to the effect that the British Government will refuse to recognize the claims of the children of the marriage to the crown of Spain.

THE FRENCH TRANSATLANTIC STEAMERS.—The Havre Courier of a recent date has a paragraph which is thus translated:—"We have announced that the Government has decided to establish a train of communication between France and the United States, and that it has chosen Cherbourg for the place of departure and New York for the place of arrival. Of the two frigates, the Darien and Ulloa, to the port of Cherbourg, destined for this service, will be added the Christopher Columbus and the Canada, of the port of Brest.

At the General Scientific Congress lately held at Marseille, the subject of the cultivation of rice in the salt marshes on the banks of the Rhone was discussed, and it was proved that rice would thrive as well in that locality as it does in Italy. Samples were produced which had been grown at Mandirac, near Narbonne, where a trial on a large scale had been made, and which, notwithstanding the difficulties attendant on a new undertaking, would, it was thought, yield a profit of fifty per cent. to the proprietor.

M. Hatin, a French physician, has invented a new kind of glove, to be worn during post mortem

examinations. It is made of very thin caoutchouc, and hardly diminishes the sensation of the fingers. CAPTURE OF A BRAZILIAN SCHOONER.—On the 17th a new capture arrived at Brest—the Brazilian schooner the Trovoadat, under the charge of a Lieutenant. She was captured on the 18th of June last near the mouth of the Congo, accused of piracy. The Courier du Havre asserts that the Brazilian minister at Paris, in compliance with orders from his government, had sent in an energetic note to the French Minister for Foreign Affairs, and that a reply was sent that, as the Council of State was occupied with it, the government could not interfere.

TELEGRAPHIC COMMUNICATION.—It will no doubt be interesting to the public to know, that the contract for building the line of telegraph from Toronto to the Niagara River, crossing the same, and connecting with the Buffalo line, has been taken by Messrs. Livingston and Wells, (the principal contractors for the building of the New York and Buffalo line), for the sum of three thousand five hundred pounds,—that the posts required for the work from Toronto to Hamilton, and ten miles between Hamilton and St. Catharines, have been contracted for, and are now being delivered on the ground, and it is confidently expected that Toronto will communicate with New York direct on the 1st day of January next.

Of the capital stock, three thousand eight hundred and ten pounds had been subscribed in Toronto, Hamilton and St. Catharines, by the 16th of this month, and doubtless the whole four thousand have been taken up ere this. Thus, in less than three weeks from the time the idea was first broached, the necessary capital has been subscribed, and the company fairly launched, and if the rest of the province will follow the example, we may have a continuous line from Amherstburgh to Quebec in full operation by the first day of June next.

BRIDGE ACROSS THE ST. LAWRENCE, MONTREAL.—We are informed that Edw. Goy, Esq., of Pennsylvania, has been engaged to undertake the construction of the bridge across the St. Lawrence, and that he, with his assistants, will at once make the necessary surveys, with a view to ascertain its cost and location. We trust that the gentlemen who have this work in hand will not hesitate, but proceed boldly and prudently in making the necessary arrangements; for we have no doubt that it will prove the best stock in the Province, and that the capital necessary for its construction will be without difficulty obtained.—Economist.

NEW ARTICLE OF EXPORT.—The ship West Indian, Captain Rich, sailed 4th instant, for London, carries the first shipment of copper ore from the mines of the Quebec Mining Company on Lake Superior. A further quantity of ore will be shipped on board the Douglas, Capt. Douglas, for the same destination.

We learn from the Three Rivers Gazette that the sale of the fiefs of St. Maurice and St. Etienne took place at Mr. Dumoulin's office, in that town, on Tuesday last. They were adjudged to H. Stuart, Esq., proprietor of the St. Maurice Forges, for the sum of £5,900. This sum added to the amount obtained for the Forges, forms an aggregate of £11,475, which will yield an annual revenue of £685 10s.; being £188 10s. more than was received from the Hon. M. Bell.—Mercury.

WM. STEVENSON, Esquire, has been appointed one of the Wardens of the Quebec Trinity Board.

FIRE.—A stable belonging to Mr. F. Campbell, in St. Fustache Street, St. John's Suburbs, was consumed by fire in the night from Monday to Tuesday last: as it contained a good deal of hay, deplorable consequences might have ensued if the timely arrival of No. 3, Engine, commanded by Captain Houghton, had not furnished the means for arresting the further progress of the flames. The alarm of fire was given last night about eleven, when it was discovered that the dry-good-store occupied by Mr. Cox, in St. John Street, was on fire. Engine No. 1 was promptly on the spot, and a supply of water obtained, which was the means of speedily extinguishing the flames. The loss in goods burnt and spoiled must of necessity be considerable.

The New York Packet-Ship Liverpool, (J. G. Heath, Esquire, and sons, of Quebec, passengers) arrived at Liverpool on the 24th of September, after a passage of 32 days.

MARITIME EXTRACTS.

The Schr. Mic Mac, which had loaded from the wreck of the Magnet, ashore on Anticosti, was blown off before she got her letters from Capt. Morton, and had put into Gaspe Bay, to await the arrival there of Capt. Morton. It is not likely that she will come up to Quebec, this fall. The packet ship Mary Ann Brown, from Liverpool, at Boston, reports that on the 16th Oct., in lat 46, 19, long 43, 50, passed the wreck of the British bark Neptune, masts all gone close to the deck, boat at the stern; main-hatch off, and long-boat gone; did not appear to have been long in that situation; blowing fresh, did not board her. The Neptune sailed from London on the 1st Sept., for Quebec.

The ship Agnes, stranded on the Pillar Rock, and sold for account of the underwriters, has been floated, and was towed up to port on Saturday morning by the steamship St. George.

The St. George left again immediately for Red and Green Islands, and returned on Monday, with the wrecks of the barks Cove and Robert Stride, both sold for account of the underwriters some time since.

The Princess Alice, from Liverpool for Quebec, has put into St. John, N. B. with loss of spars, in a gale on the 23rd Sept.

BIRTH.

At Charlottetown, Prince Edward Island, on the 25th Sept., the Lady of Commander John Orlebar, R. N., of a son.

MARRIED.

At Montreal, on the 4th instant, by the Rev. W. A. Adamson, A. M., Archibald Hall, Esq., M. D., to Caroline, youngest daughter of the late Josiah Wurtle, Esq. Seigneur of Riviere David and D'Guire.

At Bytown, on the 2nd instant, Henry Aylmer, Esq., youngest son of Captain John Aylmer, R. N., Melbourne, C. E., to Eliza, daughter of the late James Atkins, Esq., County Cork.

At Toronto, on Tuesday, the 27th ult., by the Hon. and Right Revd. the Lord Bishop, Charles Wallace Heath, Esq., son of the late Col. Heath, Hon. J. C. Service, to Sarah Anne, youngest

daughter of the late D'Arcy Boulton, Esq., of the Grange. At Montreal, on the 3rd instant, Leonce Routh, Esq., D. A. C. G., second son of Com. Gen. the Hon. Sir Randolph Isham Routh, to Emma, second daughter of the late William Jephson Pardee, M. D., Assistant Surgeon, Rifle Brigade.

DIED.

Of rapid decline, at Kingston, on the morning of 2nd Nov., in the 40th year of her age, Helen, wife of the Hon. John Macaulay, deeply regretted by her family and friends.

On the 5th instant, at the age of 79, Mr. Jeremiah Wright, a native of the city of Norwich, in England, from which place he came to this country in 1794. He filled the office of Church Clerk of this Parish 39 years, but had latterly, on account of his infirmities, retired from it upon a pension from the Church. He gradually sunk under a decay of body and of mind which, however, did not render him inaccessible to the consolations of religion in his last hours.

At Charlottetown, Prince Edward Island, on the 30th Sept., Mary Longuet, eldest daughter of Commander John Orlebar, R. N., aged 7 years and 9 months.

Mutual Life Assurance.

SCOTTISH AMICABLE LIFE ASSURANCE SOCIETY,

HEAD OFFICE, 141, BUCHANAN-STREET, GLASGOW

THE Constitution and Regulations of this Society insure to its Members the full benefits which can be derived from such sums as they are willing to devote to the important duty of LIFE INSURANCE. The whole profits are secured to the Policy holders by the Mutual System on which the Society is established, and their allocation to the Members is made on fair, simple, and popular principles. It is provided by the Rules, that the whole Directors, Ordinary and Extraordinary, shall be Members of the Society, by holding Policies of Insurance for Life with it, of more than three years' standing. This rule secures to the Public that those Noblemen and Gentlemen who appear as Directors of the Society, have practically approved of its principles. For further particulars, with tables of Premiums, apply to R. M. HARRISON, Agent for Canada, Quebec, August, 1845.
