TORONTO MARKETS.

TORONTO, May 12th, 1887.

A hardening of rates for stock loans caused some selling in several speculative shares and a consequent easier feeling on the Toronto Stock Exchange. The pressure, however, having relaxed there was a firmer market at the close. Among the Banks, Montreal made a "spurt," but the advance was subsequently lost. Other bank shares are fractionally lower than last week, transactions being unusually light. The whole miscellaneous list was easier, Western Assurance falling 1%, Gas, 2½ in bids and Canada North-west Land 2/ to 61/. Loan societies' shares have sold to a very limited extent at about the old figures. Call money rose to 5½ and in some cases 6%, according to the security offered.

BOOTS AND SHOES.—Travellers will not start out on their fall trips until the first of the month. In the meantime there is sufficient sorting up orders being booked to make the manufacturers feel in good spirits. If money was more plentiful there would be little of which to complain.

DRY GOODS.—The week has been a quiet one in this line, city retailers are so busy as to have no time to go to the warehouses, and there is not much country demand, while remittances are very slack. Values are firmer in cottons, the advance reported in Ashton's prints has been confirmed. Nothing new in domestic cottons, prices of which are upheld. Woollens and silks are firm abroad, according to latest advices.

DRUGS AND CHEMICALS.—Our prices current show no change this week. Quinine is sluggish, opium, glycerine and morphia are firm. The New York Commercial Bulletin says:—"For quinine the feeling in the market is rather favorable to buyers. Best brands foreign, in large bulk, are offered quite freely at 42½c., but even at that quotation no business of any consequence has transpired. The London market is cabled a trifle weaker, with 1s. 10d. the quotation for German. Opium in Smyrna is a trifle higher, owing to unfavorable weather. The market here is somewhat steadier and some business is reported, aggregating 20 cases, at \$3.75 to 3.80. At the close ordinary test, in case lots, was yet obtainable
