Will You Be Ready To Take Advantage Of Industry Growth in the '90s?

\$150 Billion Plus A Year

The growing environmental industry is already estimated at \$150 Billion a year. It's expected to grow at an annual rate of 12% for the next three years to as high as \$225 billion — nearly 5% of our national GNP! By comparison, construction is right now at \$500 billion a year; health care at \$550 billion a year.

New Businesses Entering Field

At the same time, an increasingly large number of new businesses are entering the field. Thousands nationwide will open their doors over the next few years.

Referrals Down, Competition Up

New regulatory activity and legislation have caused a drop in referrals and thrown open projects to companies who can compete.

Your Competitive Advantage

The Green Book Report is your competitive edge in an increasingly competitive marketplace. Without it, you play catch up. With it, you stay ahead of the game. It's that simple.
