TORONTO.....13.

12th August 1930.

Lieut. General Sir Arthur Currie, K.C.M.G., D.S.O., etc.,  
Principal,  
McGill University,  
MONTREAL.

Dear General,

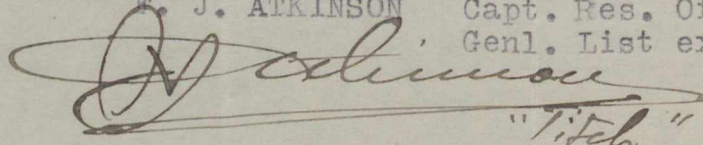

I trust you are finding your health steadily improving since your return from Egypt and England.

I am taking the liberty of asking you to consider the application of Dr. chem. Fr. Reis, who has been analytical chemist with customers of mine, the Summit Dyeworks, a large German organisation here and the Eaton Knitting Mills in Hamilton.

Dr. Reis is known to me as having a thorough knowledge in chemical science and with his experience in Research Departments of the German Food Control service, you may be interested in his application.

It was a pleasure to hear from Colonel Allan Magee recently and to see his new venture, as Director of the British bank Barclays, prospering and about to open a branch here. Whilst in Ottawa recently I had the pleasure of meeting Maj. General McBrien of the Aviation League and residing at the Bytown Inn, with Carter Guest as my room mate, gave him a visiting card to Ralph Webb in Winnipeg, from whom I hear at intervals & the next thing I heard Ralph was in Carter Guests airplane en route from Winnipeg to Peace River district. So that you will see your "boys" are sticking together and doing things in the face of problems connected with this great pioneer Dominion.

Ever your devoted servant,

F. J. ATKINSON     Capt. Res. Offrs  
  Genl. List ex R.A.,  
  
  "*Titch*"

To Dr. Johnson:  
What advice can I give this man?  
I know we have nothing.

A
