REBEL ARMIES MAKE HEADWAY

Three Forces Are Expected Soon to Besiege Mexico City.

cos, near San Luis Potosi, which is 300 miles north of Mexico City. This is the southernmost point which the constitutionalists have reached in Central Mexico, and with the army now attacking Tampico, they declare that the general advance on the Mexican capital is to be made within a few weeks from three sides.

The significance of these constitutionalist successes lay in the fact that San Luis Potosi is far south of Saltillo, and only 100 miles from Tampico on the west and Mexico City on the east. Carranza's report of the desperate condition of the federalists at Matamoros was coincident with reports from Rear Admiral Howard, who stated that a bold and sea engagement was carried on there through yesterday, the constitutionalists firing rifles and field guns from Piedra Island, while the federal gunboat Mexico was supported by the federal shore batteries.

Funston to Extend Lines. Aside from the notable constitutionalist successes, the chief military development of the day was the authorization to Gen. Funston to extend his lines at Vera Cruz as might be required for defensive purposes, without, however, undertaking any aggressive operations. A report also came from Gen. Funston that he could secure no definite information as to active movements by the federalists to extend his lines at Vera Cruz as might be required for defensive purposes, without, however, undertaking any aggressive operations.

The naval situation was shown in reports from Rear-Admiral Badger as to the Atlantic coast points, and from Rear-Admiral Howard as to operations on the Pacific coast side. Admiral Badger stated that sharp fighting had occurred between federal and constitutionalist forces at Tampico, and he added that rumors reached him that Admiral Mayo had some of Villa's forces intended to take and burn the City of Tampico. Admiral Mayo put no faith in reports of a truce between federal and constitutionalist elements about Tampico.

REBELS ROUTED FEDERALS. EL PASO, May 6.—Gen. Pablo Gonzalez, the rebel commander who captured Madero, met and defeated a strong force of federalists near Saltillo May 4, according to a message received here today by Rafael Muscueta, rebel consultant here. The message was routed from Monterrey via Matamoros, and Brownsville to El Paso.

How to Destroy the Dandruff Germ BY A SPECIALIST.

That the dandruff germ is responsible for nearly all the diseases of the scalp is hair, as well as for baldness and premature gray hair, is a well-known fact, but when we realize that it is also indirectly responsible for many of the worst cases of catarrh and consumption, we appreciate the importance of any agent that will destroy its power. We are, therefore, particularly pleased to give herewith the prescription which an expert scientist states he has found, after repeated experiments, to completely destroy the dandruff germ, and it also immediately stops itching and it has been used in numerous cases produced a new hair growth after years of baldness. This or any drug will not put it up for you, it must be put in at home.

Directions: May Run, 2 ounces Lavender de Cologne, one-half ounce Menthol, one-half ounce Eucalypti, and after use. Apply with a brush, rubbing the scalp with the finger-tips. If your favorite perfume is a drachm of rose water is not a day, it is unsatisfactory for removing gray hair to its original color.

BRITISH PRESS SCOTTS AT ROOSEVELT'S FIND

LONDON, May 7.—Some of the London morning papers today express skepticism in regard to Col. Roosevelt's discovery of a hitherto unknown river in the interior of Brazil, and they chaff at the expense of the former president.

The Standard publishes an interview with Sir Clements Markham, former president of the Royal Geographical Society, who is somewhat incredulous about the discovery and says he is inclined to think Col. Roosevelt traced the Canzema River, an affluent of the Madeira, further south than it had been hitherto explored. He says he cannot believe Col. Roosevelt discovered a new river 1000 miles long.

Rutherford's claims in military are shown in no great variety that the selection of a hat to wear with any costume is the first principle in the reasonable price of five to ten dollars, 542 Yonge street.

Use Gibbons' Toothache Gum—Sold at drugstores. Price 10 cents.
