

The Weekly Observer.

have made a direct appeal to the charity of the public. From the circumstance, however, of the military in these quarters being put under arms, there is reason to think that riotous proceedings of an alarming nature are seriously apprehended. It would be well if the authorities would think of setting the unemployed to improve the roads, drain the marshes, redeem land from the sea, and the like, which would not only keep them usefully and honestly occupied, but would soon tell upon the face of the country, and ultimately yield a good return. For many improvements, particularly of the high ways and moor lands, was Scotland indebted to the stagnation of trade not many years ago, and why should not the present occasion of calamity be made available in the same, or in similar ways? We have no news respecting the war in the East of Europe, on which we can place much reliance. It appears, however, that there is no prospect at present of Great Britain being involved in the struggle.

We are happy to observe, from a subsequent Notice, that our Agricultural and Emigrant Society has not yet slept the sleep of death, but that, on the contrary, there are some symptoms of revival. As the tide of emigration continues to flow, while the more fluctuating branches of our trade and commerce are on the wane, now is the time for redoubled exertion in the prosecution of the important objects which this Society contemplates. The emigration from the different parts of the Parent State to this quarter of the world, has been considerably reduced for some time past, but it is still sufficiently great to call for the attention and energies of a Society whose existence is no longer doubtful, and of whose renovated vigour we hope soon to witness many substantial proofs.

DR. BAYARD gave a second introductory Lecture on Chemistry, at Masonic Hall, on Saturday evening last, to a respectable auditory. His illustrations were both pleasing and useful, and he was peculiarly happy in his experiments. At the conclusion of the lecture, the nitrous oxide, of which he had prepared an abundant supply, was inhaled by several young gentlemen who were thereby rendered both merry themselves and the cause of mirth in others.

HIS HONOR THE PRESIDENT leaves town for Fredericton by next Steam-boat.

A Boy was carried before the Mayor, this day, charged with having, last evening, committed a robbery, and that, on search being made, he was found in the Theatre, intoxicated. From the press of business in the Mayor's Office at the time, the Boy was sent to prison till to-morrow morning, when he will be again brought up and fully committed.

FRESH SALMON have appeared in our market for a week past, of excellent quality and at a moderate price.

The Steam-boat Saint George was brought through the Falls this morning, for the purpose of towing in, if possible, the Barque Spence, lying off the Island, water-logged.

The Duke of York, April packet, sailed from Falmouth on the 8th ult. for Halifax.

The thermometer at Quebec, on the 8th inst. rose to 90 degrees of Fahrenheit.

ROBBERY OF THE MAIL.—John Mullen, a person hired by one of the contractors, for carrying the Mail from hence to St. John, left St. Andrews on Monday last at 3 p. m. with the Eastern mail; he had two horses with him, one of them a return horse, put under his charge to be re-conveyed to St. John. Mullen proceeded as far as Diguidigash, (12 miles distant), when it appears he changed his course, and made for St. Stephen the same evening.—From thence he went to Eastport by water, as we are informed, where the Eastern mail was found near Hatheway's Wharf, and brought to St. Andrews on Wednesday. All the Newspapers are missing, but all the Letters, except the Money Letters, and they were fortunately few in number, were found, opened. From the best information we can obtain, the money stolen, or ran away with, does not exceed £25. Keleher, the mail contractor, is gone in pursuit of the villain, and we think it quite probable that the hand of justice will overtake him. We do not recollect of hearing of another instance of a mail carrier running away with a mail in any country.—St. Andrews Herald, May 25.

Mullen the Mail Robber taken Prisoner.—Mr. Keleher the mail contractor, who was in pursuit of Mullen, returned this morning, after a very fatiguing and expensive journey of 120 miles to the Westward, without success. Mr. Keleher, on his return to Eastport, traced M. to G. Mann, but did not find him; he, however, left a description of his person, and had not returned to his home more than an hour, when Mullen was brought here a prisoner by one of the inhabitants of G. Mann. Mr. Keleher speaks in high terms of the zeal and activity displayed by our Western neighbors, to aid him in catching the robber. The inhabitants of Lunenburg sent a boat to G. Mann, for that purpose; this is highly meritorious and generous on their part, and they were justly rewarded, as the old adage that "one good turn deserves another," will not be forgotten on this side of the lines.—Id.

LIVERPOOL, (COUNTY OF KENT.) MAY 13.—Five.—The Building occupied as a Court-House and Jail, in this County, was totally consumed by fire, on Saturday evening last, occasioned, as is supposed, by sparks from the stove. Fortunately the Prisoners were let out before the fire reached the apartment where they were confined.

The Quebec Gazette of May 7, says:—"The weather has been dry and rather warm for the last week. In all parts of the district the wheat is in great part in the ground, and the favorable weather has rapidly advanced all agricultural labors. The prices of produce still continue high. Seed wheat has sold in the distant settlements at high as 15s. a minute, but since the opening of the navigation it has fallen to 9s. 6d. and 10s. oats are at 2s. 6d. potatoes 2s. 3d., coarse flour, in the market, 20 to 25s per cwt.; and fine, in barrels of 196 lbs. \$10. The cargo of wheat consigned to a house in Quebec from Boston, U. S., has not arrived and will probably not be in time to serve as seed."

From the Baltimore Gazette, May 3.—We learn from Washington that Mr. Louis McLane is now there, preparing to proceed to England. His family will not go out with him. His daughter went to Washington with him, and will remain with the ladies of the President's family. Mr. Gallatin, Judge Preble, with Mr. Gallatin, Jr. are also there, prosecuting the objects of the commission some time since instituted for the defence of the state of Maine, in its claim to the disputed territory bordering on the province of New Brunswick. They have collected all the testimony in the case, and are now engaged in furnishing a statement for the consideration of the arbitrator between the parties, the King of the Netherlands. This statement will, by arrangement, be furnished to the British authorities by the first of July for answer, and the replication on the side of the United States will be furnished by the first of January next, when the case will be finally submitted. It seems to be quite as tedious an affair as some of the chancery proceedings of England.
