Leonard's, Our friends were horrified because we were willing to guarantee the bonds of the International Railway to the extent of \$8,000 a mile. Now that they are in power, however, they are willing to give a guarantee of \$25,000 a mile to a railway down the valley of the St. John way down the valley of the St. John

### No Rattle-trap Road Wanted.

I am one of those who are willing to assist such a railway, but what is wanted is not a rattle-trap road such as our friends rid Laurier will be made part of the I. C. R. There will be no relief from the high rates which prevail in that section of competitive one. What advantage would there be in a road which started on the C. P. R., that

## Iron Ore Development.

"We were condemned for spending a few thousand dollars to demonstrate the possibilities of the iron ore of Gloucester. Part of the money was spent to in quality and now the present government is spending thousands upon thous ands of dollars to carry out the policy of of this great industry. I do not conde necessary railway but what else have they done? They have given the promoters grants of land and given away valuable water power rights and they reduce the royalty on the iron ore. These resources are ours; they belong to the people and no government has the right to hand them over to monopolies. Are you in favor of monopolies? I do not think so. The policy of the old government was to conserve these resources for the people of the prov-ince and generations which will follow us.

## The Lumber Question.

"Now to take up the lumber question You know the vast extent of this industry and its importance to the province Our friends have charged us with improper conduct in connection with the revenue of this industry. What are the facts? The old government refused time after time the pleas of the lumber lords of the provnce for a reduction in the stumpage rates Instead, we doubled the stumpage rates. Instead, we doubled the stumpage rate and the mileage rates on lumber lands which were being held idle by the lumber operators without giving employment to the men of the province. What has the present government done? It has reduced the size of the logs that could be cut on crown lands to a figure that will encourage. rown lands to a figure that will encourage the depletion and wiping out of the for-ests which should be an everlasting reource for the province. If the forests are wiped out where will the revenue come from? You and I will have to go down into our pockets for taxes to replace the revenue from the lumber industry."

In referring to the prospects which New Brunswick held for new settlers and posibilities of development through an in-rease in the population he declared himelf in favor of a policy which would pro-uce such results. He did not think it cessary to bring in the riffraff of E ope, however. The policy he advocated was one which would encourage our young nen to stay in the province and would in-luce the thousands who have crossed the order into an alien land to come flocking the land of their birth.

## The Finances of the Province.

Taking up the subject of finances, Mr. weeney said: "It is costing more by learly a quarter of a million to govern his province than it did in the days of the old government. It must be so be-cause our friends claim an increased revnue of that amount but yet they have no surplus to devote to the reduction of the public debt."

## Their Strong Point.

"The present government," he said, "is strong on commissions. They appointed one on the Central Railway to give good jobs to some of their friends. They did ot know what the farmers wanted and hey appointed another costly commiss good salaries to travel around the untry and try to find "They have appointed a public utilities ommission and I would like anyone to now me what good it has accomplished The bill appointing the commission is not worth the paper it is written on. At the ast session I offered an amendment to it o give the commission power to reduce elephone rates. Why? Because the teleone company is a monopoly which has profits of this monopoly? I think if you examine its records you will find that some of those who do are not far from he Hazen administration. (Applause).

## Gave More Jobs.

"However, the commission gave a few nore good jobs. If there are any more riends unprovided for next year it will e hard to tell how many more commisns will be appointed by that time.

## abor Legislation.

"Let me now refer to labor legislation. urish of trumpets over what it will do d what it has done for the laboring en, but I challenge anyone to show a ngle thing which they have done. They ade an amendment to the employer's pility act and I claim the act is aker than when Hon. Mr. Pugsley ed it on the statute books. There is a piece of labor legislation on the placed there by the old government. friend of the laboring men of this nce is not W. Frank Hatheway, but loyal son of the province, Hon. Wm. (Cheers).

want to say that if you compare the lation of the old government with of the present government when you to vote at the next election you will your ballot for the party that tried to something and did do something to ten the load of the people and imter the condition and the prospects of

applause which frequently punctu Mr. Sweeney's ringing speech broke again with renewed volume at the of his remarks.

pictures of Sir Wilfrid Laurier, Wm. Pugsley and Hon. Clifford on were then thrown on the screen were received with a great outburst heers. An exhibtion of moving pic-

t its close, light refreshments were ed and the singing of the National ful political meetings ever held in St.

## MRS. MARY BAKER EDDY, HEAD OF CHRISTIAN SCIENCE, DEAD

who was the son of a poor blacksmith, was described at the time of his meeting with Mrs. Eddy as a shrewd little man, of argumentative disposition and dogged ly determined. From him Mrs. Eddy became imbued with metaphysical ideas, and started on a career in that line which made her one of the most famous of the world's mental healers.

Mrs. Eddy, who was then Mary Glover Patterson, dwelt long under the influence of Quimby's mesmeric beliefs, and it came to have a great, though not supreme, significance in her later teachings.

Later Mrs. Eddy denounced Quimby's mesmeric beliefs, and it came to have a great, though not supreme, significance in her later teachings.

Later Mrs. Eddy denounced Quimby's mesmeric beliefs, and it came to have a great, though not supreme, significance in her later teachings.

After spending two years in study at Portland, Mrs. Patterson rejoined her husband in Lynn, where she lived five years, continuing her studies of metaphysics. It was in that city that she suffered an accident through a fall on the ice which the doctor said was severe, but from which, she received many enthusiastic followers, it was this incident that led directly the promulgation of her discovery of Christian Science, and nine years later the later she married Asa Gibert das doen and that was follow; years later the leader.

During the last years of Mrs. Eddy's life in Concord and heard a few worls from the leader.

During the last years of Mrs. Eddy's life in Concord there was a newspaper ment of the Massachusetts (Mrs. Eddy continued her writings and baptized.

Mrs. Eddy continued her writings and baptized.

Mrs. Eddy continued her writings and baptized.

Mrs. Eddy continued her writings and in 1839 and controversy over her identity, and for sev eral days the city was filled with raport derived many entires and accepted at Mrs. Eddy was obliged to exhibit herself to a first by a few followers mad as expers went of Chirst, it is a few followers and as years went of Chirst, and that was from the first of the first

## FIGURES THAT TELL STORIES

CONSUMPTION AND EXPORT OF DIARY PRODUCTS

ANADA'S annual consumption of dairy products such as milk, cream, butter, cheese and condensed milk, is estimated at a value of \$10 per capita. Our total dairy production in a year is now approaching the \$100,000,000 mark in value. The II-lustrations contrast the consumption and exports of dairy products in 1901 and 1910. It will be noticed approaching the \$100,000,000 mark in value. The ilthat our home consumption has been increased by

about fifty per cent. At the same time, our exports \$53,000,000 \$24,000,000 have fallen off slightly in quantity, though not proportionately in value. In other words, though our population has grown about 50 per cent since 1901, we have supplied the home demand and practically hold the same position in value as dairy exporters that we did ten years ago. But Canada reached her zenith as a dairy exporter in 1903, when over \$32,000,000 worth of butter and cheese left our shores and the drain of our increasing population has been seriously felt, from an export standpoint, since 1906 Though the value of our export trade for 1910 is only a milion dollars less than in 1901, it represents a disproportionately smaller tonnage, as butter and cheese bring more on the English market now than ten years ago. Taking the figures in the illustrations, our production of dairy products has grown from a value of \$77,000,000 in 1901 to nearly \$100,000,000 in 1910, an increase of about 30 per cent in the de-

LETTERS TO THE EDITOR

Sir: In reading Mr. Robinson's address touched the heart of every sympathetic for life to the Young Liberals, published in your reader. The author was H. L. Spencer,

ed a grant from the government of \$1,000 to repair a road in or near the Blue Bell

tract of land, for carrying on lumbering operations for his own use.

'Mr. Robinson said he had not heard of it before. Mr. Hilvard stated that he had Hon. Mr. Maxwell as his authority that such a grant had been made. Mr. Hilyard also referred to some of the acts of the Hazen government regarding the management of the government lands, claiming that they

showed favoritism." I never heard of such a grant being made until I read Mr. Hilyard's statement, and never said that such a grant was made. I am confident that Hon. Mr. Flemming never asked for or received such grant. The roads in the Blue Bell tract are being opened up and maintained for settlement purposes only. The work is done by the crown lands department under the direction of the surveyor general, Hon. W. C. H. Grimmer, and the settlers are getting the benefit of every dollar expended there.

Thanking you, Mr. Editor, for space, etc. Yours, etc., R. MAXWELL.

St. John, Dec. 5, '10. When asked, last night, about the fore going letter, Mr. Hilyard refused to make any statement whatever.

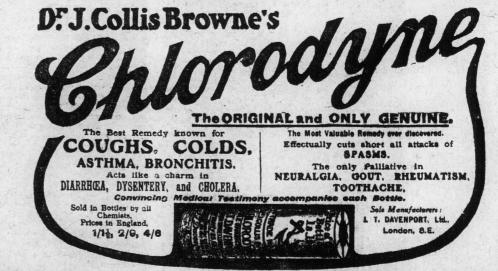

## H. L. SPENCER, THE POET

[The opinions of correspondents are not necessarily those of The ierograph. This newspaper does not undertake to publish all rany of the letters received. Ussigned communications will not be noticed. Write on one side of paper only. Communications must be plainly written; otherwise they will be rejected. Stamps should be encosed if return of manuscript is desired in case it is by the appearance of a new poet in the should be done in his case is to buy him the representation of the other repeated. The function of the should be done in his case is to buy him an annuity sufficient for his comfort, and the signature of Enylla Allyne, were so we hope the proceeds of the entertain-far above the ordinary newspaper verse ment will be supplemented by subscrip MR. MAXWELL AND MR. HILYARD. as to put them in a class by themselves. tions and an annuity bought for him. As They were artistic, tender and sad, voicing a deep regret and a great unrest that this way, would make him safe from want

Saturday issue, I was much surprised to read the following statement by Mr. Hilyard:

"Thomas Hilyard, who was in the audience, arose at this point to ask the speaker if he was aware that Hon. Mr. Fleming, the provincial secretary, had received a grant from the government of \$1000.
