WEEK'S ORE SHIPMENTS

Boundary Output for Year to Date Well Over the Half Million Mark

Frank Zinc Reduction Plant in Operation .- La Plata Concentrator Started -B.C. Copper Co's Extensive Program

(From Sunday's Daily.)
It was semi-officially announced just the close of the week that the Canadian Metal company's reduction plant at Frank, Alberta, which is to be sup-plied with British Columbia ores, and which for practical mining purposes is in the East Kootenay district, had been In the East Kootenay district, had been blown in, but beyond this statement de-tails of the starting up of these im-portant works could not be obtained. It was announced early in the week that there had been a change in the managements of the Canadian Metal company and that the company's smelcompany and that the company's smelter at Pilot Bay one stack of which was blown in some time ago, had been closed down, pending an examination by S. S. Fowler, M.E., of Nelson. It is understood that Mr. Fowler's examinaunderstood that Mr. Fowler's examina-tion will be closed this coming week. Mining has been very fairly active

during the past week throughout south eastern British Columbia, several deal of importance having been reported in the Boundary country Over in Rossiand some interesting experiments are being made on the Jumbo with diamond drills, the results of which are awaited interest. Work on the Velvet-Portland has been energetically resumed.

The new concentrator at the La Plata mine, better known as the Molly Gibson, near Kokanee creek, was successfully started for the first time on Thurs-

The ore shipments from the Boundary district for the year to date are now well over the half million ton mark.

The ore shipments from the several districts and the ore receipts at the smelters, in detail for the past week and for the year to date are appended. for the year to date are appended.

B. C. COPPER CO.'S EXPANSION

Daily Output Will be Increased From 600 to 1500 Tons

(Special to The Daily News)
Phoenix, May 26—On or about the 1st of
June the smelting works of the British
Columbia Copper company will be blown
out and remain cold for a number of
weeks while the three new and larged furnaces are being installed and a multitude of other improvements made at the reduction works. Only the converter plant is

expected to be operated, and this to handle the matte from the Dominion Copper company's smelter. Some idea of the magnitude of the improvements being made can be gainel when it is known that the freight alone on the new machinery ,etc., will be an item something like \$40,000, while a million and a half feet of lumber will be used in the new ore bins and buildings about the works.

As soon as ore shipments at the Mother Lode mine of the company are discontinued by the closing of the smelter, the entire force of miners will be placed on development work, preparing for the increase or daily ore tonnage output from about 500 tons to 1500 tons each 24 hours. The force at present employed at the mine is about

tons to 1500 tons each 24 hours. The force at present employed at the mine is about 125 men, but this will be increased approximately to 200 men.

For some time past superintendent Holman, under F. Keffer, M.E., has been preparing for the expected increase in tonnage, and this work will be pushed as fast as possible. The main shaft on which the work of deepening has been in progress for some time, is now down 435 feet, and will be continued to about the 600 foot level. It is known that some of the best ore in the Mother Lode mine has been n-countered in the deepest workings, aicountered in the deepest workings, al-though latterly most of the ore shipped to the smelter has come from the sur-

face quarries.

At the smelter about 200 men are employed, including those on construction, and this week a wage agreement was arrived at between manager McAllister and

and this week a wage agreement was rived at between manager McAllister and the employees, which is stated to last for the next three years.

At the company's Emma mine in Summit camp, there is also increased activity as a greater draft on the excellent fluxing ore from this property will be made as soon as the enlarged smelter of the company is blown in once more.

A temporary air compressor from the Mother Lode was set at work at the Emma this week, to be used till the new electric driven air compressor, recently ordered, is installed, a few months latter.

The West Kootenay Power & Light company is now surveying a branch high

The West Kootenay Power & Light company is now surveying a branch high tension line from Phoenix to the Emma mine, to supply the electrical energy. The work of deepening the main shaft at the Emma mine was also begun this week. On the Oro Denoro mine, adjoining the Emma, on which former the B.C. Copper company has an option, the diamond drill is still being operated, something like is still being operated, something like 1500 feet of drilling having been done on the Oro Denoro thus far.

STRIKE ON MAPLE LEAF (Special to The Daily News)
Grand Forks, May 26 - A pheno

Grand Forks, May 28 — A phenomenal strike of high grade copper ore has just been made on the Maple Leaf property on Franklin mountain. Already fully 80 feet of the ore body has been stripped and the width has been proved to be more than 16 feet. The Maple Leaf is one of a group of five claims owned by H. W. Young of Vancouver and the Fee brothers of Grand Forks.

OF INTEREST TO MINERS

SECOND INSTALMENT OF ARTICLE ON COPPER MINERALS

WITH SPECIAL REFERENCE TO BRIT

Today's article on the more importan metals is a continuation of Copper Minerals, of which the first was published last week. Th minerals which are described this week are those from which British Columbia, in the greater part, obtains its copper, therefore the attention of any of our readers who are interested in copper, is particularly drawn to this article.

Is particularly drawn to this article.
Our correspondence columns are being taken advantage of by a number of people every week, and we hope that during the coming months more will send us their samples for examination. Correspondents must please understand that an assay of-fice is not kept on the premises, but made upon a sample submitted, we shall be pleasd to place it in the hands of a competent assayer who will assay it and send a certificate direct to the sender. All samples will be retained from seven to fourteen days according to the distance from which they come: after that they from which they come; after that they will be discarded.

COPPER

CHRYSOCOLLA-This m cate of copper, carrying about 45 per cent copper oxide (36.2 per cent copper. Its color varies from a mountain green to a bluish green, passing to a sky blue and even a turquols blue. When impurities are present it sometimes has a black or brown tinge. Its streak is invariably white It is never found crystalline: usually it occurs as an incrustation or in thin seams in crevices and as copper stains in quartz, occasionally it is found massive. Its lustre is nearly always glassy or

shining, sometimes earthy.

This material is found in most copper mines, accompanying other copper ores, occurring especially in the upper parts

Chrysocolla obtains its naem from two Greek words, meaning "gold" and "glue."
This was the name given to a similar material used in soldering gold, hence its name. It is some times applied at the present day to borax, which has displaced

DIOPTASE-This mineral is also a silicate of copper, containing when pure, a lit-tle over 50 per cent of copper oxide. Its color is an emerald gren, with a green streak. In some mines in Arizona the most beautiful brilliant green crystals are found of this mineral which command a great

of this mineral which command a great price.

OHALCOPYRITE—Or copper pyrites, is one of the greatest sources of the copper of commerce and as far as British Columbia is concerned is the chief source of the metal. It has a strong metallic lustre, with a greenish black streak. In color it is brass yellow, often tarnished or irridescent. It usually occurs in uncrystalline masses with an irregular fracture; pound sulphide of copper and iron, carrying about 35 per cent copper, and 36 percent iron. It is distinguished from iron pyrites by its deper color, by its tarnishing, by being easily scratched with a knife, and by its chemical reactions.

Chalcopyrite is often associated with perrhotite, seams of it often running through the latter mineral, sometimes very distinct, at other times the copper pyrites of the complex of the whole series, Artendel with a latter mineral, sometimes very distinct, at other times the copper pyrites forms an entirely separate band, but gradually talls off into the pyrrhotite. It is also frequently found disseminated through pyrhotite as well as through iron pyrites.

expected to be operated, and this is handle the matte from the Dominion Copper company's smelter. Some idea of the magnitude of the improvement being made can be gained when it is known that the freight alone on the new machinery etc., will be an item something like \$40,000, while a million and a half feet of lumber will be used in the new ore bins and buildings about the works.

As soon as ore shipments at the Mother Lode mine of the company are discontinued by the closing of the smelter, the entire force of miners will be placed on develop—many other names according to the differ-

many other names according to the differ-ent parts of the world in which it is found. For instance, it is called variegated copper pyrites, percock copper and horse-flesh copper in the Kootenays, whilst in other parts many other names are applied to it. This mineral has a very important to it. This mineral has a very important position among the copper producing ores, in fact it stands a good second to copper pyrites. Its color varies from a copper red to a brown on fresh fractures, but it speedily tarnishes on exposure and is commonly irridescent with different shades of blue, purple and red, hence its various names. Its streak is always a pale, greyish black. When pure it contains about the product of t

CHALOCCITE—This mineral is commonly called copper giance, or vitreous copper. It occurs in six sided crystals, as well as massive, granular or compact. It has a color and streak of a blackish lead gray celor, often tarnished a dull blue or green which gives it an irridescent appearance. It is a straight sulphide of copper containing about 89 per cent of the metal. This mineral is frequently mistaken for argentite, or silver sulphide, but can very readily be detected upon chemical tests being applied.

readily be detected upon chemical tests being applied.

COVELLITE—Or indigo copper is another straight sulphide of copper, carrying about 66 per cent copper. As its name would imply, it has a deep indigo blue color, with a lead gray to shining streak. It is usually found massive, but occasionally in six sided crystals.

TETERAHEDRITE—Or grey copper, usually in the company of the

ally occurs massive, with fine or coarse granulations; sometimes compact, or even crystalline. This mineral derives its name from the crystals in which shape it was first found (tetrahedrite crystals, four faced). Its color varies from a flint grey to an iron black and it has a streak sin

to an iron black and it has a streak similar to the color. It is a compound of antimony, copper and sulphur, carrying about 25 per cent antimony, & per cent copper, the balance being sulphur.

In British Columbia silver takes the place of part of the copper in varying amounts from one to thirty per cent. This is especially noticeable in the Slocan district, where "grey copper" is one of the richest silver bearing minerals.

Occasionally arsente displaces the antimony in this mineral; it is then called Tennantite. This is the case at the Silver King mine, Nelson, B.C., where it is closely associated with bornite. Mercury and lead also frequently displace part of the copper in this mineral in various quantities from 5 to 16 per cent.

titles from 5 to 16 per cent.

There are many other copper ores but they are not of sufficient interest to just

tify going into further details at this wri CORRESPONDENCE J. C. B., Slocan, B.C.-Your No. 1 sam

and when taken in conjunction with No. 2 will probably assay somewhat similar with copper added. No. 2 is a pyrrhotite, which differs considearbly from the ordinary pyrrhotite of the Kootenays. It appears to resemble that found at Sudbury, Ontario, which contains nickel in paying quantities; we should therefore advise you to have it tested for that metal, as well as for gold and silver. The charges for this will be \$6.50, and we will hold your samples 14 days awaiting a reply from you.

samples were received and an ensweigiven in these columns some few weeks past. As the samples were apparently use less and contained no values, they were destroyed, so we are unable to return the to you. We are returning by next mail the stamps you enclosed for return postage on

the samples. Z. Y. X., Nelson, B.C.—The sample you left with us is a piece of Trachyte, and will contain no commercial values.Tra-chyte is one of the most common forms of volcanic or eruptive rock. It is a light colored rock and has a peculiar character-istic rough feel, as you will no doubt have

noticed.

A. N., Fort Steele, B.C.—Your No. 1 sample is Barite or heavy spar; the green particles present are due to copper stains. It may contain a little gold. You will notice the great weight of this sample as compared with a piece of quarts of the same size. No. 2 is a Basalite rock and will contain no commercial values.

G., Kaslo, B.C.—Your sample is composed mainly of gine blende, but there posed mainly of zinc blends, but there is present another mineral. The pink and yellowish material appears to be calamin or silicate of zinc. We should like a larger sample to give a further examination

upon.
- H. B., Nelson, B.C.—You will find you questions answered in today's article or

asking what Marcasita Argentea was. Since then the matter has been looked up and we find that it was the old name for Bismith, obtaining this name from its use as an imitation of silver for writing

Arundel's Crew Wins From Johnstone's i Final by Quarter Length (From Wednesday's Daily)

The spring regatta of the Nelson boat club ended last night with the Prettiest and closest race of the whole series, Arundel winning from Johnstone in a fast finish by a quarter of a length.

in the annual regatta of the N.P.A.A.O. which will be held in Nelson waters sometime between July 15 and August 15.

The number of active members of the club is greater this year than ever and more general interest than formerly is taken in the club.

Vienna, May 30—Baron von Breek, an official of the ministry of agriculture, has been charged by the emperor to form a new cabinet to succeed the Hohenlohen-Shillingsfurst ministry, which resigned on May 28, owing to dissatisfaction with the proposals for the settlement of the common customs tariff of Austro-Hungary.

TIMBER NOTICES

NOTICE is hereby given that 30 days after date we intend to apply to the Chief Commissioner of Lands and Works, Victoria, for special licenses to cut timber on the following described lands situated near headwaters of Boundary creek and Priest creek and Monk ereek:

(1) Commencing at a post marked "A. B. Buckworth N. W. corner post," and planted about 1 1-4 miles westerly of Boundary lake, about 24 miles from Kootenay river.

E. R. C. CLARKSON,

(3) Commencing at a post marked "Wm. Feeney S.W. corner post," and planted on Priest creek, adjoining claim No. 1 on the north, thence south 80 chains, thence east 80 chains, thence north 80 chains, thence west 80 chains to point of commencement.

WM FEENEY

(5) Commencing at a post marked "E. R. C. Clarkson S.E. corner post," planted on south side of Boundary lake, and lying along international boundary lake, and lying behavior to commencement.

E. R. C. CLARKSON.

R. C. ALEXANDER, Agent.

(6) Commencing at a post marked "J. Feeney S.W. corner post," and planted on the south side of Boundary lake and lying between the lake and the international boundary line and being east of claim No. 5, and about 22 miles from Kootenay rives, thence east 80 chains, thence north 80 chains thence west 80 chains, thence south 80 chains the point of commencement.

T. FEENEY.

R. C. ALEXANDER, Agent.

(7) Commencing at a post marked "R. C. ALEXANDER about 28 miles from Kootenay rives, thence 180 chains east thence south 40 chains, thence west 180 chains, thence west 180 chains thence west 180 chains thence west 180 chains, thence west 180 chains thence west

west 180 chains, thence horth we point of commencement.

R. C. ALEXANDER.

(8) Commencing at a post marked "L. Feeney S.E. corner post," planted on north side of Boundary creek and lying N.W. of claim No. 7, thence north 80 chains, thence west 80 chains, thence south 80 chains, thence east 80 chains to point of commencement.

J. FEENEY. WM. FEENEY, Agent (9) Commencing at a post marked "A. B. Buckworth S.E. corner post," planted on the north side of Boundary lake and lying west of claim No. 8 about one mile, thence north 30 chains, thence west 30 chains, thence south 80 chains, thence east 8 chains to point of commencement.

A. B. BUCKWORTH.

WM. FEENEY, Agent.

Dated April 14th, 1905.

Notice is hereby given that 30 days from date William C. Read will apply to the chief commissioner of lands and works, Victoria, for special licences to cut timber on the following described lands near 100g creek west of the Lower Arrow iake.

Licence No. 7: Commencing on the west boundary of lot 5817 about ten chains north of the North fork of Dog creek; thence west eighty chains, thence south forty chains, thence east forty chains, thence south fighty chains, thence east forty chains, thence south sighty chains to the place of beginning.

No. 5: Commencing where a Dost has been planted about twenty chains do the licence, thence forty chains north, thence a hundred and sixty chains west, thence forty chains south, thence a hundred and sixty chains west, thence forty chains south, thence a hundred and sixty chains west, thence forty chains south, thence a hundred and sixty chains east to the place of beginning.

No. 5: Commencing at the N. W. Commencing at the N. E. Commencin

a hundred and sixty chains west, thence forty chains south, thence a hundred and sixty chains east to the place of beginning.

No. 6: Commencing at the N. W. corner of the No. 5 licence, thence west one mile, thence south one mile, thence south one mile, thence south one mile west of the No. 1: Commencing one mile west of the No. 1: Commencing one mile west of the No. 2: Commencing one mile west of the No. 3: Commencing two miles west of the No. 3: Commencing two miles west of the No. 3: Commencing two miles west of the No. 4: Commencing two miles west of the No. 5: Commencing two miles west of the No. 6: Commencing two miles west of the No. 6:

following land, situated on Smoky creek, near Slocan Junction, in the West Kootenay district: Commencing at a post marked "N. D. Stewart, S. E. corner, post," planted on Smoky creek, one and one half miles from Kootenay river, about two miles from Slocan Junction; thence north 30 chains, thence west 30 cnaims, thence south 30 chains, thence cast 30 chains to point of beginning.

May 12, 1906. N. D. STEWART.

N. C. STEWART, Agent.

LAND NOTICES

NOTICE is hereby given that 60 days after date I intend to apply to the Hon, the date I intend to apply to the Hon. the Chief Commissioner of Lands and Works for permission to purchase the following described lands, situate in the West Kooteney District: Starting from a post marked "Harry Theodore Tilley's Southeast Post," about three miles east of Deer Park, on Arrow lakes; thence 40 chains west; thence 80 chains morth; thence 40 chains east; thence 80 chains south to point of commencement, containing about 300 acres.

NOTICE is hereby given that 60 days after date I intend to apply to the chief commissioner of lands and Works Victoria, for permission to purchase 160 acres of land, commencing at a post planted 40 chains northeast of lot No. 2719, on shore of Arrow lake and marked "M.C. S.W. corner" thence north 40 chains; thence corner." thence north 40 chains; thence east 40 chains; thence south 40 chains more or less, to the lake shore; thence along the lake shore to point of commence-

(Special to The Daily News)
Kamloops, May 30.—The trial
C. P. R. train robbers was continuously esterday and the case to
crown was concluded just befor
journment for lunch today.
On the reassembling of cour
morning A. D. MacIntyre, count
the defense, again applied for por
ment of trial until the fall assiz
the discharge of the present jury
grounds contained in an affidavit
by Edwards, alleging that nearly
jury witnessed the manner in wh
was greeted by warden Kelley, (
Quentin: "Hello Bill, old pai, he
you?" which could not but pre
them against him. Counsel also p
copy of the Vancouver Province
taining an interview with Kell
which he declares Edwards is Bill
Mr. justice Irving said it wou

Mr. justice Irving said it wo interfering with the administrat justice. He would not say at tha whether he had interfered or no that would be the way to have the ter discussed. He refused the appli

crown, said that acting on instru-the had gone to Vernon to see could identify the men arrested the suspicion of connection with the bery, but he did not identify them Deputy attorney general McLear dressing the court, said he had McQuarrie again to permit the did to examine him further. In his examination, MacIntyre had elicite fact that McQuarrie had reported the machine and description of men to fact that McQuarrie had reported rebbery and description of men to intendent McLeod. He had brough Leod's stenographer, who took that report, and who was now prescourt, and had the report taken by ther. He was prepared to put irreport as evidence and the stenogram to the stenogram of the stenog

information.

Interpolation in the incident closed.

MacIntyre then further cross examination who repeated that the worn by one of the robber's fitted over his chest.

Prisoner Edwards was made to down in view of the jury and with "Now close your coat," said M tyre, and Edwards folded his coat his chest. It overlapped several is "That will do," said counsel, and ness stepped down and Edwards again placed in the prisoner's box Mounted police corporal Stewarthe next witness and recited the cof the capture of the prisoners, deing how they were disposed about when after having been notified by vincial constable Fernie of their when after having been notified by vincial constable Fernie of their in the vicinity. Witness repeated evidence given at the preliminary ination with but little variation, tifying a handkerchief with white and a black handkerchief as simi those found among the prisoner fects.

Cross-examination showed that are had no warrant and that the med police were not wearing regulariforms, Stetson cowboy hats, shoots and pistol equipment excounsel endeavoring to show the boots and pistol equipment exc counsel endeavoring to show the party looked like ordinary cowboy not persons in authority. Counsel also tried to show by w
