TIFF WITH LAMP POST

London Advertiser:—When Nathaniel Currie, of Glencoe, driving a small roadster bearing license No. 205-934, travelling north on Richmond street at a fair rate of speed, endeavored to rein in his trusty steed near the corner of Dundas street on Thursday afternoon, the brakes evidently refused to grip and the vehicle took a dive across the street on to the sidewalk, colliding with one of London's ornamental lighting standards, breaking the globe at the top of the post.

The auto suffered considerable damage as a result of its contest with the lamp-post.

Two Irishmen were working on the roof of a building one day, when one made a mis-step and fell to the ground. The other leaned over and called:

"Are ye dead or alive, Mike?"

"O'm alive," said Mike feebly.

"Sure, ye're such a liar Oi don't know whether to believe yez or not."

"Well, thin, Oi must be dead," said Mike, "for ye would never dare to call me a liar if Oi was alive."

Promptly at 5 o'clock the members and friends, to the number of about sixty, sat down to tables heavily laden with a tempting repast of all the delicacies of the season, prepared by the ladies, and to which all did justice.

Calves under six months old make little or no gain on pasture alone, however good the pasture may be. Their feeding is a real problem. For this reason dairymen try to have the calves come in the fall so they will be ready for pasture in the spring. The soil will break up many pupal cases and thereby expose the young or developing beetles to the cold and wet. All or many will perish, reducing the possibility of serious infestation on cultivated lands during the following season.—L. Stevenson, Sec. Dept. of Agriculture, Toronto.
