

This week thousands of fires will be burning in Ontario's vacation land and on backyard patios - fires consuming charcoal and briquettes sold by your Red & White Market. The past couple of years has presented a problem to our Red & White supply house due to the inability of local charcoal suppliers to look after the booming barbecue market. However, early this year, our Red & White supply house contracted for over 100 carloads of charcoal and briquettes from 4 suppliers to make sure we were ready for the cook-out season. Many plans are made months in advance to make sure that Red & White has the product you want when you want it!
