
BOOKS BY JOHN M. COULTER, A.M., Ph.D.,

Head of Department of Botany, University of Chicago.

Plant Relations. A First Book of Botany. 12mo. Cloth, \$1.10.

"Plant Relations" is the first part of the botanical section of Biology, and, as its title indicates, treats what might be termed the human interests of plant life, the conditions under which plants grow, their means of adaptation to environments, how they protect themselves from enemies of various kinds in their struggle for existence, their habits individually and in family groups, and their relations to other forms of life—all of which constitute the economic and sociological phases of plant study.

Plant Structures. A Second Book of Botany. 12mo. Cloth, \$1.20.

This volume treats of the structural and morphological features of plant life and plant growth. It is intended to follow "Plant Relations," by the same author, but may precede this book, and either may be used independently for a half-year's work in botanical study. "Plant Structures" is not intended for a laboratory guide, but a book for study in connection with laboratory work.

Plant Studies. An Elementary Botany. 12mo. Cloth, \$1.25.

This book is designed for those schools in which there is not a sufficient allotment of time to permit the development of plant Ecology and Morphology as outlined in "Plant Relations" and "Plant Structures," and yet which are desirous of imparting instruction from both points of view.

Plants. A Text-Book of Botany. 12mo. Cloth, \$1.80.

Many of the high schools as well as the smaller colleges and seminaries that devote one year to botanical work prefer a single volume covering the complete course of study. For their convenience, therefore, "Plant Relations" and "Plant Structures" have been bound together in one book, under the title of "Plants."

An Analytical Key to some of the Common Wild and Cultivated Species of Flowering Plants. 12mo. Limp cloth, 25 cents.

An analytical key and guide to the common flora of the Northern and Eastern States, as its title indicates. May be used with any text-book of botany.

D. APPLETON AND COMPANY, NEW YORK.
