this issue.

Copy for advertisements for that issue
should be in this office by March 5th.

DAIRYMEN

See advertisement MILK TICKETS on
3rd page of cover.

...Special Notice to Farmers..

Is Your Poultry a Paying Depart-
ment of the Farm?

It should be a very profitable one, but many
farmers do not realize that it is absolutely neces-
sary to improve their stock by bringing in new
blood, or by selling off all their old chickens and
replacing them with large, healthy stock, pro-
viding good layers and excellent birds for the table.
For this purpose we breed the very best that
can be obtained, and we are sure that you want
the same. From our magnificent stock of White
Wyandottes and single comb White Leghorns, we
will sell settings of eggs at the moderate price of
\$1.50 per setting. We would strongly advise the
farmer to stock his farm with thoroughbred
White Wyandottes. This breed is known as an
all-round general-purpose fowl, being a great egg-
producer, as well as the very best marketable bird
for table use. We imported all our original stock
from the large poultry farms of the United States,
expressly for the purpose of obtaining the most
profitable breed for the farm, and have proved by
our own experience that it pays far better to breed
this profitable breed than the ordinary stock that
is so common throughout the country.

We have purchased from **MR. HAWKINS,** of
Lancaster, Mass., a pair of his celebrated

ROYAL BLUE STRAIN

OF
Barred Plymouth Rocks

We highly recommend these birds to the pub-
lic, and will be pleased to supply eggs from these
at \$2.00 per setting. Address—
