

TOLTON BROS. SPECIALTIES!

ALL EYES ARE ON THIS INVENTION.
PATENTED 1893, '95 AND '97.

PEA HARVESTER with New PAT. SIDE-DELIVERING SELF-BUNCHER at work.

We thank our customers for the business of the year just closing, and are in a good position to meet future trade.

THE LATEST AND BEST AND THE ONLY DOUBLE ROOT CUTTER MANUFACTURED. ALL THE WORLD LOVES A WINNER, CONSEQUENTLY

TOLTON'S NO. 1 PAT. DOUBLE Root Pulper

Is the one which sells, and is the favorite among all root pulpers, having won all the FIRST PRIZES last year. To change from slicing to pulping, and vice versa, is but the work of a moment: the hopper is so constructed that it cannot choke.

Tolton's Improved Flexible
ALL-STEEL HARROWS
We claim this Harrow has NO EQUAL.

Soliciting your orders, we are, yours truly,

FARM 3 MILES NORTH OF NIAGARA FALLS.

HOARD'S CREAMERIES' PARIS EXPOSITION BUTTER.

Among the prize-winning exhibits of American-made butter at the Paris Exposition, which were almost exclusively the product of the "ALPHA-DE LAVAL" Separators, was that of the Hoard Creameries, Fort Atkinson, Wis.

Few Creameries are more widely known than those of the Hoard concern, both by reason of the pre-eminence of "Hoard's Dairyman" as the leading dairy publication of America, if not the world, as well as of the magnitude, splendid equipment and superior merit of the output of the Hoard factories. Hence, while every big and successful creamery enterprise is to-day using De Laval Separators, what the Hoard Creameries may be doing in that regard is of interest to others with less experience.

The following letter speaks for itself:

HOARD'S CREAMERIES,

[COPY]

The De Laval Separator Co.,

31-45 W. Randolph St., Chicago:

Gentlemen,—Yours of Oct. 20th, in regard to our Paris medal, received. In addition to the medal awarded our butter, our Superintendent, Mr. C. L. Fitch, received a silver medal for original processes in buttermaking and apparatus and tests thereto.

The cream from which the prize butter was made came from two "Alpha" No. 1 Belt power machines and from the 20th Century Turbine "Alpha" No. 1. We are running ten "Alpha" No. 1 Belt machines, one "Alpha" No. 1 Turbine, one "Alpha" No. 2 Belt, and own only one other separator—which we wish was an "Alpha" Turbine.

Respectfully yours,

HOARD'S CREAMERIES.

While the separator does not make the butter, practically all prize-winning butter is to-day made from De Laval separated cream, and there is no question in the mind of any well-informed person that under like circumstances and equal conditions any buttermaker will make better butter from an "ALPHA-DISC" machine than is possible from the product of any other separator.

A De Laval catalogue will make plain the reasons for this to anyone who may not already understand them.
