

GOSSIP.

For something choice in Barred Rock eggs, see the advertisement elsewhere of W. C. Shearer, Bright, Ont.

For good Ayrshire bull calves, write Alex. Hume & Co., Menie, Ont., whose crop of calves this year happens to be mostly of the male "persuasion." The accident is your chance. In writing, don't forget that you saw his advertisement in the "Farmer's Advocate."

FROM FAR-OFF AUSTRALIA.
Cardigan, Victoria, Australia,
January 4th, 1905.

The Dain Mfg. Co.:
With reference to your advertisement in the "Farmer's Advocate," please send me your catalogue and full particulars for hay press, if you consider it suitable for pressing straw. No grass hay is cultivated in this part of the globe, and while there are several makes of presses for sheaf hay, we have not anything suitable for straw. Please state if you have any agency for your manufactures in Australia.

When quoting, give f. o. b. price (boat, nearest port), and ascertain, if possible, probable freight to Melbourne, as it is very difficult to get quotations for freight at this end.

Should your press be suitable, I may state that there would, in all probability, be a good market here.

Yours faithfully,
T. O. SURMAN.

Graham Bros., Claremont, Ont., report the following recent sales of imported Clydesdale and Hackney stallions: Imp. Baron Primrose (3979) (10980) went to Star & Collins, Port William, N. S. This horse was by MacEachran (9792), dam Montrave Primula 11773, other sires in his pedigree being MacGregor 1487, Prince of Albion 6178, Prince of Wales 673, Darnley 222, etc., etc., breeding second to none, and quality to match. The purchasers are to be congratulated upon their choice. Messrs. McKinnon & Young, of Coningsby, Ont., were fortunate in securing a capital bay colt, three years old, in Lord Watson (12659), sired by Moncrieffe Marquis, the sire of Marquis and Kenneth, the champion geldings at Chicago, 1903 and 1904. Lord Watson is a big colt of good quality, with first-class feet and legs and splendid action. Robt. Cheyne, Cooksville, Ont., secured The Squire (Imp.) (12771), a three-year-old, sire Drumflower (107537), dam Peggy, another capital colt, with good feet and choice breeding and quality. Fabian (Imp.), another brown three-year-old, has been sold to Duncan Fumerton, Yorkton, Assa. This is a good, thick, stylish horse that combines quality with breeding, his sire being Up-to-Time, a son of Baron's Pride, and his dam a granddaughter of Darnley. There are several other imported stallions at Cairnbrogie, which were described in the "Farmer's Advocate" of April 13th, fuller particulars of which may be had by writing for a catalogue. A word about the Hackneys at Cairnbrogie: White-wall Fashion (Imp.), a five-year-old chestnut, by Troubadour (1357), stands nearly 16 hands high, is of true Hackney type, with a beautiful top, and the best of feet and legs; has splendid high action, and we predict he will create a sensation when he comes into the showing. He has 14 registered sires in his pedigree. Antipator (Imp.) is a beautiful chestnut three-year-old, by Rosador, the champion of England, dam Amelia 1423, by Danegelt 174. This colt has a long string of the best registered sires in England, backed up by conformation, style and action, seldom seen in a colt of his age. Among the home-bred Hackneys we noticed Revenge 246, a chestnut rising two years old, by Attraction 371, dam Prairie Queen 301, by Robin Adair 2nd (3907), the sire of Saxon, the Chicago and St. Louis champion, recently sold for \$5,500. This colt is of beautiful conformation, and a high actor. Supreme 247, rising one year old, is by Saxon, from the same dam as Revenge, and is a colt of great promise. Emerson Johnston, Binbrook, Ont., recently bought Orient 8596, a four-year-old, dark chestnut, that combines the greatest prizewinning Hackney blood in the kingdom. Joe Rock 6419, the prize-winning Hackney pony, has been sold to Geo. Chipchase, New York City, and it is expected he will create a sensation at the New York Horse Show.

We Will Buy

A 50c. Bottle of Liquozone and Give it to You to Try

We want you to know about Liquozone, and the product itself can tell you more than we. So we ask you to let us buy you a bottle—a full-size bottle—to try. Let it prove that it does what medicine cannot do. See what a tonic it is. Learn that it does kill germs. Then you will use it always, as we do, and as millions of others do. This offer itself should convince you that Liquozone does as we claim. We would certainly not buy a bottle and give it to you if there was any doubt of results. You want those results; you want to be well and to keep well. And you can't do that—nobody can—without Liquozone.

We Paid \$100,000

For the American rights to Liquozone. We did this after testing the product for two years, through physicians and hospitals, after proving, in thousands of different cases, that Liquozone destroys the cause of any germ disease.

Liquozone has, for more than 20 years, been the constant subject of scientific and chemical research. It is not made by compounding drugs, nor with alcohol. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are ex-

hilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissues too. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.
