

MASSEY - HARRIS MANURE SPREADER

By the old method of distributing manure by hand some plants got too much fertilizer, others got none—one is about as bad as the other—few got just the amount required. Much of the fertilizing material was wasted entirely. Then, too, the work was slow and disagreeable. In fact, the labor necessary to properly apply it was the cause of much valuable manure being allowed to go to waste entirely. The Massey-Harris 20th Century Manure Spreader applies the manure so that **each plant gets the right amount of nourishment**, and the work is done very much more easily, quickly and cheaply than in any other way.

The Massey-Harris 20th Century Manure Spreader spreads evenly from start to finish; it has a strong hardwood frame, thoroughly trussed; heavy, wide-tired wheels; the apron runs on rollers, and all parts are carefully fitted, making it light draft. It has a positive feed—cannot clog; positive automatic return of apron; change of feed, stop, start and reverse without stopping the team; front wheels turn under the box; the only "tight box" distributor; so simple a boy can operate it; does away entirely with hand work, and does the work much more thoroughly, thus increasing crops.

Building? Yes.
Then it's a question of material.
Wood shingles you have found to be short-lived and disappointing. Prices have gone up, and you do not like to pay a big price unless you are sure of what you are getting.
We know what you want, and we have it.

This is an age of steel, and metal-covered buildings will be the buildings of the future. By their superior merits they have overcome prejudice, until to-day they are springing up all over the country, to the admiration and satisfaction of all.

Lightning proof, fire proof, weather proof, beautiful and durable. "A thing of beauty and a joy forever," or at least for twice as long as wood-covered buildings, and at much less cost.
