

Build Concrete Barns and Barnyards

YOU will find that they are best at first and cheapest in the end. Concrete buildings cannot burn, and many dollars are saved in lower insurance rates. They need practically no repairs and never need painting.

Concrete barnyards make the best kind of a feeding-floor and save many dollars in feed bills, as your stock gets every particle that you feed to them.

Send for this free book, "What the Farmer Can do With Concrete." It shows just how to build your own concrete barn, feeding-floor or any other building that you may need.
