

DOES A WASHING JUST LIKE PLAY!

Six Minutes to Wash a Tubful!

Ladies! Just see how easy I do a big washing with my 1900 Gravity Washer. I start the tub a-whirling. Then the gravity device under the tub begins to help and the rest is just like play. Washes a tubful in six minutes! How's that for quick and easy work? The 1900 Washer Co. sent me this marvellous machine on trial. They didn't ask for notes or cash in advance. And they let me pay for it a little each week out of the money it saved me! They treat everybody the same way.

You can have one shipped FREE

on thirty days' trial, the same as I got mine. The company will let you pay for it on the same easy terms they offered me. The Washer will actually pay for itself in a very short time. Mine did! I wouldn't take \$100 cash for my 1900 Gravity Washer if I couldn't get another just like it. It does beautiful work—handles anything from heavy blankets to daintiest laces. Every housewife who is tired of being a drudge and a slave to the washtub should write to

W. A. E. Bach, manager the 1900 Washer Company, 357 Yonge Street, Toronto, Ont., for their beautiful Washer book and generous offer of a washer on free trial.

Mrs. R. H. FREDERICK
This offer is not good in Toronto, Montreal, Winnipeg or Vancouver and suburbs, as we have branch offices in these places. Special trial arrangements are made in these districts.

TRADE NOTES

GREASING A WAGON AXLE

A recent report of an agricultural committee of the United States Senate states that during the worst of the hauling season in America a team is able to transport on an average only 800 or 900 pounds a day, while in France a team draws 3,036 pounds a day, a distance of 18½ miles any day in the year. Thus it appears that the farmer here has to spend three or four times as long as the Frenchman in hauling his crops and supplies, and as he obviously has to choose those days when the roads are in good condition the chances are he has to take the extra time and labor from work in the fields.

For much of the relief desired in the direction of better roads farmers must wait on others; but there is one point making for easier hauling, larger loads, fewer trips and far less expense that rests with the farmer himself. This is the proper lubrication of the axles of his wagons, drays and carriages. Greases that gum and stick, or run

are unusually blessed with heavy fur this year. This would also indicate a cold winter.

Such being the case it behooves every man and boy, who has the cunning of his forefathers, to get out his traps and oil them, preparatory to a season of unusual activity in this line. It is astonishing how remunerative and interesting this occupation is, and how the cold winter months can be made a source of great financial gain.

M. Sloman & Co. are among the largest and most reputable dealers in raw fur in the United States.

OF VALUE TO HORSEMEN

Do you turn your horses out for the winter? Horses which have been used steadily at work, either on the farm or road, have quite likely had some strains whereby lameness or enlargements have been caused. Or perhaps new life is needed to be infused into their legs. Gombault's Caustic Balsam, applied as per directions, just as you are turning the horse out, is said to be of great benefit; and this is the time when it can be used very successfully. One great advantage in using this remedy is that after it is applied it needs no care or attention, but does its work well and at a time when the horse is having a rest. Of course, it

off and leave the axles to grind, are a waste of money. The Imperial Oil Company, Limited, of Montreal, is offering in Mica Axle Grease a lubricant of high efficiency that is giving a great deal of satisfaction. It forms a cushion between axle and box that does away with friction almost entirely and lessens both labor and wear. Its durability is a strong factor in favor of economy. Handicapped as he is by bad roads the wideawake farmer must insist on getting everything he can out of his teams and wagons. If he is not already using a lubricant of the efficiency and economy of Mica Axle Grease, he will hardly delay to at least give it a trial.

can be used with equal success while horses are in the stable, but many people in turning their horses out would use Caustic Balsam if they were reminded of it, and this article is given as a reminder.

QUESTIONS and ANSWERS

GENERAL

Questions of general interest to farmers are answered through our columns without charge to bona-fide subscribers. Details must be clearly stated as briefly as possible, only one side of the paper being written on. Full name and address of the enquirer must accompany each query as an evidence of good faith but not necessarily for publication. When a reply is required by mail one dollar (\$1.00) must be enclosed.

OUTLOOK FOR FURS

M. Sloman & Co., of Detroit, Mich., report that they are anticipating one of the biggest years in the raw fur business that they have experienced. They say that their reports from the entire country indicate that the fur-bearing animals

HITCHING FIVE HORSES ABREAST

In answer to a question in a recent issue a reader sends in the device illustrated, No. 1, for hitching five horses abreast. He states that it is one of the most satisfactory five-horse eveners he has ever used. Measurements are stated on the plan. The straps from the tree to the whiffletrees are one and one-quarter by quarter inch iron.

Evener for driving five horses abreast on rank row or harness.

THE GAS TRACTION ENGINE DOES THINGS BETTER

We are so sure of this that we absolutely guarantee our engine.

WE GUARANTEE

How many breaker and stubble plows it will pull.

How much fuel it consumes per acre in plowing.

The size separator it will steadily and continuously drive.

The labor-saving ability of the self-steering device.

The material and workmanship for one year from date of engine's acceptance.

This Is Our Famous Golden Rule Guarantee

Right away is the time for you to decide to buy a Gas Traction Engine. Put in your order now and get delivery early.

The Man That Puts Off Loses Out

The Gas Traction Engine has been proved the best. It does the work on the farm you want a tractor to do, and does it cheaper than you can get it done any other way.

We don't and won't make statements we can't show you are right. We would rather have you get the word of a man who has a Gas Traction Engine than take our word about what it will do.

Write to us and we will give you names of users, also give you their bona fide letters about the Gas Traction Engine.

You can then size up the matter for yourself.

We want you to satisfy yourself that

THE GAS TRACTION ENGINE

is the most economical, most durable, the least expensive in up-keep of any all-purpose farm power.
