St. John Gazette. The Record of last evening contained an article attacking the local government, principally on the ground of its want of economy in administering the affairs of the province. This attitude is explained by the fact that the gentleman most largely interested in the paper, and who is also its editorial writer, has lately lost the fat office of Queen's printer by reason of the government recently making re- forms in connection with the public print- ing, which will effect a great saving to the province. Mr. Fenety has for many years been drawing between four and five thousand dollars a year from the office of Queen's printer, and while this was per- mitted to continue, he saw much to admire in the conduct of the government. But when in the public interest, and in order that this money, instead of going into the pocket of Mr. Fenety, who had already grown rich at the public expense, should be made available for the various provin- cial services, the late Queen's printer calls uon the people to turn the government. It is understood that Mr. Fenety was not unwilling to be superannuated on an allowance of \$1,500 a year, but the govern- ment felt that, there would be no justifi- cation for saddling this cost upon the country, and refused to accede to Mr. Fenety's request. The demands upon the chief commissioner in this direction have been so pressing for many years past that he has found it wholly impossible to meet the needs of the country and at the same time keep strictly within the limits of the annual appropria- tion for roads and bridges. The Building of Many New Railways throughout the country necessarily led to the opening up of innumberable new high- ways in all directions so that the people might reach the stations located upon the lines of the e railways, and with the open- ing up of new highways the building of multitudes of new bridges thereupon fol- lowed as a necessary consequence. The public works department adopted the policy of building bridges of iron and stone, in preference to wood, in as many suitable places as possible, and the government is convinced that while the present outlay, consequent upon the construction of pub- lic works of this character, is much greater, its policy will prove in the end to be much more in the interest of true economy. The government, being fully sensible of the great importance of exercising the utmost economy, will continue to direct its best energies in the future, as it has in the past, to a careful husbanding of the resources of the province; and to a reduction of expen- diture whenever and wherever such reduc- tion may be found consistent with main- taining the efficiency of the public services. The demands upon the chief commissioner in this direction have been so pressing for many years past that he has found it wholly impossible to meet the needs of the country and at the same time keep strictly within the limits of the annual appropria- tion for roads and bridges. The Building of Many New Railways throughout the country necessarily led to the opening up of innumberable new high- ways in all directions so that the people might reach the stations located upon the lines of the e railways, and with the open- ing up of new highways the building of multitudes of new bridges thereupon fol- lowed as a necessary consequence. The public works department adopted the policy of building bridges of iron and stone, in preference to wood, in as many suitable places as possible, and the government is convinced that while the present outlay, consequent upon the construction of pub- lic works of this character, is much greater, its policy will prove in the end to be much more in the interest of true economy. The government, being fully sensible of the great importance of exercising the utmost economy, will continue to direct its best energies in the future, as it has in the past, to a careful husbanding of the resources of the province; and to a reduction of expen- diture whenever and wherever such reduc- tion may be found consistent with main- taining the efficiency of the public services.
