

WINCARNIS

This popular tonic needs no introduction, it is now so well-known North, South, East and West of the Island, as well as in the city. It is looked upon as one of the best health preservers or restorers ever placed before the public.

For those recovering from protracted illness and want building up there is nothing to equal it.

It is recommended by men occupying foremost positions in the Medical profession of Great Britain, from whom over 15,000 testimonials have been received.

Asquith's Perplexities.

How Will He Get Through Them?

Special to Evening Telegram.

LONDON, Feb. 25.—Premier Asquith's predisposition to extreme patience makes a judgment of the political situation a matter of great difficulty. While it is easy to see by the numerous prolonged cabinet meetings that the Government is facing grave problems, it is not easy to forecast the issue. Several conferences of the Cabinet have already been held and another Cabinet council has been summoned for to-morrow. But for the fact that no party or group in the House of Commons wants another general election at present, the ministry's term of office would not be worth many weeks purchase. The Liberals, Radicals and Nationalists added to the difficulty arising out of depleted party funds, fear that a general election now would be a Unionist triumph. On the other hand, the Unionists are aware that time is on their side and that while the Liberal ministry is floundering alone, the Conservative organization and Home Reform propaganda may be pursued throughout the country to their ultimate advantage. Premier Asquith's statement that he did not intend to guarantee the King is interpreted on all sides as a confession that the result of the elections was too inconclusive to justify his asking for such guarantees, and the bare of the difficulties facing him lies in the impossibility of reconciling the divergent views of his supporters on the manner of dealing with the House of Lords. Sir Ed. Grey, the Foreign Secretary, Chancellor Lloyd George and Winston Spencer Churchill, Home Secretary, are said to be in favor of reforming the second chamber on the elective principle. The Radicals, led by Sir Chas. Wentworth, oppose the reform of the House and want merely to abolish all power of veto by the Lords, both financial and legislative. The Nationalists also want to abolish the Lords' power of veto, while the Laborites make a still greater demand for the abolition of the House of Lords altogether. A large portion of the moderate Liberals probably would be satisfied if the Lords were debared from interference in the matter of finances. Amid these conflicting views, all of which are being urged upon him with the utmost vehemence, the Premier needs vigilance and resource to steer the Ship of State. The Daily Telegraph asserts that the Cabinet has abandoned all idea of reforming the House of Lords and will now direct its whole energies to limiting the veto power of the Lords. In this, the Telegraph says, the Government

will proceed by bill, not by resolution first and bill afterwards, as originally intended. This concession of the Radicals will not satisfy the Radicals, the paper thinks, because Ministers have not yet decided to put the veto question before the Budget. The Radical Chronicle, however, confirms the foregoing by stating that the Government resolutions will deal with the veto, leaving the question of the Reform of the House of Lords for future consideration.

ST. PATRICK'S NIGHT.

The ladies of St. Bon's Association are making great preparations for "An Irish Night" in the Methodist College Hall, St. Patrick's Night, in aid of the College funds. Mr. Hutton is organizing the event and will be assisted by Mr. T. H. O'Neill and other popular amateurs. The programme is an exceptionally good one and should draw a full house.

The Tenderfoot Farmer

It was one of these experimental farmers, who put green spectacles on his cow and fed her shavings. His theory was that it didn't matter what the cow ate so long as she was fed. The results of digestion and nourishment had not entered into his calculations.

It's only a "tenderfoot" farmer that would try such an experiment with a cow. But many a farmer feeds himself regardless of digestion and nutrition. He might almost as well eat shavings for all the good he gets out of his food. The result is that the stomach grows "weak" the action of the organs of digestion and nutrition are impaired and the man suffers the miseries of dyspepsia and the agonies of nervousness.

To strengthen the stomach, restore the activity of the organs of digestion and nutrition and brace up the nerves, use Dr. Pierce's Golden Medical Discovery. It is an unfailing remedy, and has the confidence of physicians as well as the praise of thousands healed by its use.

In the strictest sense "Golden Medical Discovery" is a temperance medicine. It contains neither intoxicants nor narcotics, and is as free from alcohol as from opium, cocaine and other dangerous drugs. All ingredients printed on its outside wrapper.

Don't let a dealer delude you for his own profit. There is no medicine for stomach, liver and blood "just as good" as "Golden Medical Discovery."

Death of Capt. Moss.

Capt. James R. Moss, well known in this city, especially in shipping and insurance circles, passed away at his residence, Gower Street, early this morning, after an illness of one week, at the advanced age of seventy-four years. The captain came to this country to Carbonar in 1865 as master of the brigantine Stanley, and for a number of years commanded the Sparking Glance, well known in this trade. Since 1886 the captain has occupied the position of Secretary of the Mutual Marine Insurance Club in this city. The deceased captain was a regular worshipper at Gower Street Methodist Church, and for years held the St. Bon's Ladies' Association. We deeply sympathize with Mrs. Moss in her sad bereavement.

Mr. Furlong, K.C., Will Lecture.

It is pleasing to note that while the various clubs and societies are devoting a good deal of time to healthy amusements, they are not neglecting the higher aims of such associations, namely, those that help to tend towards higher culture and self-improvement. We have had several lectures by prominent leaders and ministers this season, and the subjects were timely, instructive and entertaining. Amongst others slated for the coming month is a lecture by Mr. Furlong, K.C., under the auspices of the St. Bon's Ladies' Association. The learned lecturer has not yet announced his subject, but it is safe to assume that his audience, judging by his past efforts, will be both pleased and entertained with the lecturer and his subject.

HORSE FELL INTO DOCK.

A horse and express driven by J. Colfield and belonging to the Reid Nfld. Co. Express Department, fell into the Dry Dock this forenoon while the driver was going to the freight shed to deliver a load of freight on board the s.s. Glenoce. The horse backed out from the freight shed and suddenly and went head over heels down to the bottom of the dock, which is now pumped out. A barrel of sugar that was on the express was broken in pieces by the fall and the contents scattered over the steps that lead down to the bottom. The sleigh was broken in several places, but strange to say the horse escaped without noticeable injury.

Weather Report.

LaSalle.—Wind W., strong breeze, very cold, with snow flurries. A good many seals seen in White Bay; ice packed in on the land.

St. Jacques.—Herring struck off; fair hauls made last week. At Rencontre and Lally Cove yesterday hauls of 300 and 400 barrels, respectively. A Canadian vessel is taking the herring.

Sound Island.—Wind N. E., fine, frosty.

Lark Harbor.—Wind N., fine, frosty. Tilt Cove.—Wind N., strong breeze. Birch Cove.—Wind N., strong and frosty.

Change Islands.—Light S. Wind, clear and soft; ice still packed on coast.

Both Cape Spear and Cape St. Francis report the ice about 3 miles off the coast.

THE MYSTERIOUS NERVES.

How like electricity is the mysterious nerve force which courses through the body controlling the movement of every muscle and the working of every organ. The secret of keeping the marvellous nervous system in health and vigor is found in the use of Dr. Cassell's Nerve Food, the great blood builder and nerve restorative.

ST. VINCENT DE PAUL SOCIETY.

Inspector O'Brien who has been an officer of the St. Vincent de Paul Society for very many years, and who at present holds the position of Treasurer of that institution has signified his intention of resigning at an early date. This is regrettable as he is an officer who will be a great loss to the Society in the interest of which he has always been an indefatigable worker.

Ends Kidney or Bladder Misery.

Backache vanishes and your out-of-order kidneys act fine after first few doses.

If you take several doses of Pape's Diuretic, all backache and distress from out-of-order kidneys or bladder trouble will vanish, and you will feel fine.

Lame back, painful stitches, rheumatism, nervous headache, dizziness, irritability, sleeplessness, inflamed or swollen eyelids, worn-out, sick feeling and other symptoms of sluggish, inactive kidneys disappear.

Uncontrollable, smarting, frequent urination (especially at night) and all bladder misery ends.

Feeling miserable and worried is needless, because this unusual preparation goes at once to the disordered kidneys, bladder and urinary system and restores its healing, cleansing and vitalizing influence directly upon the organs and glands affected, and completes the cure before you realize it.

The moment you suspect any kidney or urinary disorder or feel rheumatism pains, begin taking this harmless medicine, with the knowledge that there is no other remedy at any price, made anywhere else in the world, which will effect so thorough and prompt a cure as a fifty-cent treatment of Pape's Diuretic, which any druggist can supply.

Your physician, pharmacist, banker or any mercantile agency will tell you that Pape, Thompson & Pape, of Cincinnati, is a large and responsible medicine concern, thoroughly worthy of your confidence.

Only curative results can come from taking Pape's Diuretic, and a few days' treatment means clean, active, healthy kidneys, bladder and urinary organs—and no backache.

School Desks.

The Premier in discussing the educational grant recommended the encouragement of home industry, and referred to the "Burke" double desk as a sample of what the workmen of the country could turn out in this connection. Superintendents, teachers and ministers of all denominations have accepted them as the long felt want, and ever since the first sample model was exhibited they have been in continual demand. The "Burke" double desk is a useful, ornamental and indispensable piece of school furniture, and is receiving the popularity it merits. There is another desk, "The Terra Nova Strong-form" (dual), perhaps not intended to be in the same class as the foregoing. This sturdy little desk was designed by W. W. Blackall, Esq., Supt. C. E. Schools, and is designed so as to be easy of construction. For this reason it should prove a boon to the poor parish, and we have no doubt but this was the intention of the designer. It is strong, all wood, simple in its parts, and can be made by the local carpenter of sturdy cut outposts. We believe that Mr. Blackall intends to send copies of his design to teachers and others who may need them.
