Premier Abbott is now at his county house, St. Anne, Que. He gained flesh while down the St. Lawrence, but he asserts that he is still far from well. To a correspondent, he yesterday said: "My health is fairly good, but I do not seem to recover from my weakness, or regain my capacity for mental work. My general health has benefited by the ten days' trip down the gulf, but I do not think that my capacity for mental or sedentary work has at all improved. The least discussion, or even ordinary conversation, for any length of time not only fatigues me, but produces extreme weakness."

—Mr. John M. Denton, of this city, is an experienced entomologist. He has made a searching examination of the hornfly which has injured cattle so much in recent months, and he asserts that the eggs are deposited upon manure and hatched into footless maggots. This contradicts the report that the flies bore into the horn and deposit eggs, which hatch out maggots that consume the substance of the horn.
