The greatest difficulty thus far experienced is on the question of the reinstatement of the men who went on strike. The conviction grows that the threats of violence made against the manager of the mine have caused public opinion to veer to the support of the mining company. The Radicals have lost all interest in the affairsince they failed in their attempt to use it as a means to overthrow the Ministry. Everybody is, therefore, convinced that Loubet's decision, whatever it may be, will end the strike.

Civilization in Danger When Capital Is Aggressive and Elections Are Fraudulent.

General Weaver and General Field, the eople's Party candidates for President and lice-President, have issued the following

Vice-President, have issued the following address:

To the People of the United States:

Having been nominated respectively for the office of President and Vice-President of the United States by the National Convention of the People's Party, which assembled at Omaha, Neb., July 4, 1892, we take this method of formally notifying the public of our acceptance of the nominations and of our appreciation of the honor conferred upon us by the action of this convention.

We are heartily in favor of the platform of principles adopted by that convention, and, if elected, will faithfully carry out the demands in letter and spirit.

We have been received with marked cordiality. The enthusiasm everywhere is without parallel, and extends to every part of the Union we have visited. By contact with their wants and sufferings, and have been brought face to face with the manifold powers which threaten our civilization and the overthrow of our popular government. We wish to express our judgment freely and without reserve, in order that we may stand acquitted before our fellow men and our own conscience touching the whole matter. The people are in poverty. Their substance is being devoured by heartless monopolists, trusts and money sharks. Labor is largely unemployed, and where work is obtainable the wages paid are for the most part unremunerative, and the products of labor not paying the cost of production. This is a matter of serious concern to the whole people. The leaders of the heretofore dominant parties are everywhere controlled by the great monopoly and money centers, and manifest utter disregard for the wants and wishes of the people.

The parties are hostile camps, arranged on serional lines, and represent the hitter.

the country, otherwise scenes of violence and perhaps bloodshed may follow these efforts of parties in charge of the ballotboxes to defraud the will of the voter. They will lead to the serious collision, and that quickly.

After consultation with the people, we believe it to be true, beyond reasonable question, that the majority of the white voters are with the People's Party in every Southern State thus far visited, and our information leads us to believe that the same thing is true in other States also. The white people are leaving the old parties and casting their lot with us, and our numbers are constantly increasing. We are informed by a large number of intelligent and reputable people that in the recent State election in Alabama, Capt. Koib was chosen Governor by over 40,000 majority, and yet his opponent was counted in by a najority of 10,000. County tiekets throughout the State were counted out and others counted in.

By the same unblushing methods, we are informed that in the State election which occurred in Arkansas on the 5th of September at least 50,000 qualified voters of the State were deprived of the right of suffrage; shat the returns were insecurated.

Coughs and Colds.

that at this election the People's Party, though polling a large vote in the State, was denied representation in the appointment of judges and commissioners by whom the election was to be conducted. In consequence of these methods, the will of the legally authorized voters of the State has been defeated.

The thing that our friends in that State

been defeated.

The thing that our friends in that State have to guide them is in the few counties where they are able to force an honest count. In every one of those our vote ran fully up to expectation. In Washington, Independence, White, Clark, Nevada, Crawford, Sebastian, Scott, populous white counties, the People's Party had an immense vote, their ticket leading the Kepublican largeiy, and was about equal with the Democratic. We believe that a fair count would have shown similarity throughout the State.

the Democratic. We believe that a fair count would have shown similarity throughout the State.

These frauds and irregularities in the State referred to, though local, are matters worthy of the serious consideration of the people of the whole United States. The deplorable condition of affairs cannot be remedied from without. The solution must come from the people within these States, supported by a healthy public sentiment everywhere, and we believe it to be the duty of all people, without regard to section, to stand by these noble people of the South who have risen up to demand good government and honest elections.

After experiment of many years, it is apparent that neither the Republican Party nor the Democratic Party can or will accomplish the much-desired end, to wit: The restoration of the bailot to a fair and honest basis in the States of the Union. The People's Party alone can secure the desired end. If the people of the whole country who desire honest elections and the repeal of class laws will rally to the support of this great industrial movement, and place the party in power under whose banner the white people of the South are now marshaling themselves, this vexed question will be settled forever.

It is certain that the people of the South

ing themselves, this vexed question will be settled forever.

It is certain that the people of the South will not join the ranks of the Republican Party. It is equally certain that the Republicans will not unite with the Democratic Party. The People's Party affords the only solution to these important matters. All who desire the revival of business, all who desire the revival of business, all who wish the return of prosperity to our country, all who desire to relieve the depressed industries and wage-workers of our common country, all who desire an adequate increase of our currency and the free coinage of silver, all who desire the abolition of banks of issue and the constitutional control of the great instruments of commerce by the Government of the United States, all who desire that the laws of taxation shall be equitably adjusted to the property of the country, all who desire that the highways between the States shall be rendered subservient to the popular good, and, finally, all who desire the the the bublic domain shall be sacredly held in trust for the people, all who desire that the highways between the States shall be rendered subservient to the popular good, and, finally, all who desire the the obliteration of sectional animosities, should at once regard it as their concientious duty to align themselves under the banner of this great industrial and fraternal morement.

It seems to us to be quite impossible that the liberty and justice loving people of this country should longer cast their ballots for the corporation and money-changer. It would seem impossible that the producers and laboring people of this country should longer cast their ballots for the corporation and money-changer. It would seem impossible that the producers and laboring people of this country should have essense quite impossible that the producers and laboring people of the polls in November and cast their votes in harmony with the resems quite impossible that the producers and laboring people of the longer of the producers and labo

With aggression of capital on the one hand and the overthrow by fraud of free elections on the other, how is it possible for our civilization to last? The new party has its face turned to the glorious future; its sublime mission is to usher in an era of fraternity and justice among men. In the presence of such an opportunity to emancipate our country from misrule of every kind, let party lines be forgotten, and let the generous flame of a common patriotism nerve every heart and move every sont.
