## The best of all "Breakfast Foods" is BREAD

Bread is higher in nutritive material than any of the so-called "breakfast foods" and it is much cheaper.

Besides—bread may be served in just as many tempting ways.

Nothing is better or easier to digest than milk and bread or bread toasted to a golden brown and spread with butter —or bread fried in egg batter.

In fact, there's nothing that can take the place of bread at any meal—and there are many things that bread can well take the place of. More of it and less of other things will increase the family's health and decrease living expense.

Of course, you should be careful toget the best bread-bread that is light, fine-grained, thoroughly digestible - bread raised with Fleischmann's Yeast. Ask your baker:

"Do You Use FLEISCHMANN'S YEAST?"
