

POND'S EXTRACT The history of the cheese "exhibit" that vas not exhibited is easily stated. Mr. Ballantyne did not at first favor putting cheese on show at the Colonial, but thought it better in the dairy interest to send over ralissimo and Great Authority on cheese, why he bought up 600 boxes rather than six or sixty at the outside, which would be BURNS, SUNBURNS, DIARRHORA, CHAF.

a large amount to be cut up as required for and as the representative of the Outario use in the restaurants. This would, in his Government visits Europe during the sumfirst judgment, form a better advertisement of our cheese than merely to place the cheese on show in the building. And this was

One hundred and two thousand shingles all that exhibition space could reasonably have been shipped from Puget Sound to be asked for. But on his arrival at Lon. Port Moody for shipment across the Canadon he found that Mr. T. D. Millar, a dian Pacific to the east. The Vancouver rominent dairyman of Ingersoll, was al- News says: "This is only the beginning of ready on hand with a small stock of cheese, a future great trade between the Pacific tent over in good time and at his private and the Atlantic coasts. Cedar grows here xpense. Then it seems to have occurred in abundance, and the shingles cut from o Mr. Ballantyne that he had made a the lumber are the most substantial in the to Mr. Ballantyne that he had made a blunder in not applying for space, and being a prominent figure in the Exhibition, especially as Messis. Spiers and Pond, the caterers, did not tackle over kindly to his other views. It would never do to be out-stripped by Mr. Millsr, and allow him to carry off honor in an interest in which he (Bailantyne) had been endeavoring to pass (Bailantyne) had been endeavoring to pass an immense trade. as a "king." He demanded space for his 600 bcxes, which was declined, because at A correspondent writes that the "model

that late date, in April, it had all been as- township of Westminster would better designed. Sir Charles Tupper agreed, howserve that title if the gravel roads were ever, to clear out a space of six square feet, better attended to. For instance, he says: -"If it is because most of the gravel for occupied by some tubs and other wooden wares, for Mr. Ballantyne's use, but he the roads has been put in the west side of (Mr. B.) objected. He asked to be allow- the township, and on some of the conces ed to erect his cheese into an arch, over sion roads, instead of being placed on 'the ed to erect his cheese into an arch, over one of the passages, but this was refused, as being too dangerous an experiment. The arch might break and fall on the crowd of people. Mr. Ball-antyne agreed at length to take his cheese awsy if it should turn bad by the effect of heat. Already it seems some of it had become bad, or had taken on a bad odor. To this request the Exhibition bad odor. To this request the Exhibition always lose, per year than would make a suthorities objected, saying that once good road there." there the cheese should be a fixture. It

Government of Sir John Macdonald, because the Premier had not thought is to step in and stay the hand of Justice when Riel fell, at last, into its clutches. And is should be borne in mind that Hon. Alex. Mackenzie took the same course. Bu the other hand, Mr. Armstrong and Mr. Mills were willing to censure the Government for refusing to interfere, and thus are Riel from his well-merited fate. Taking that view of the matter, it is not ments. Would that we have as an offset some 2,700 miles of railway penetrating and opening

Taking that view of the matter, it is not improbable that at the coming convention in South Middlesex Sir Richard may stand a fair chance of nomination; for it is well known that the corduct of Messrs Mills and Armstrong, as well as that of Mr. D. M. Cameron, of West Middlesex, in at-taching themselves to the rebel cause, is not stomached by the loyal inhabitants of Western Ontario.

writes: On the Columbia River I found a M. de Giers is described as a highly in-wry discouraging state of affairs. The indigent-looking man of about sixty five, The shows the cares of office. He stoops, and his beard is snow white. His stay in Franzensbad was said to be primarily due to the approaching marriage of his draughter. Olgs, to M. Rosetti-Solesco, which had been fixed for the lat of September. M. Solerco is a Rumanian boyar, and a dipiomat of promise. He is a nephew of Prince Cuzs, the former ruler of Moldavia and Wallachia, and was a fellow-student in Paris of King Milan of Servia. The result of Portland, which is the same latitude as Montreal, is similar to the climate of Portland, and is the author of more than one in approach the lat of serves and many server frozen. The climate of Portland, which is the same latitude as Montreal, is similar to the climate of Northern Georgia. There are 18 miles of shoreland and the water is so deep that vessels can approach the land to load with timber at any point.
