

The Weekly Monitor

WEDNESDAY, SEPTEMBER 25th, 1889

MEMORIALS FOR THE DEAD.

In our article of last week under this heading we made reference to the worthiness of the illustrious ancestors of the people of this country to have their names and memories perpetuated, and that it was the duty of their descendants, now both numerous and respectable, to take measures to bring about as desirable an object, and to that end we promised to make a suggestion to their relation thereto.

It seems to us that a suitable monument should be erected in the most public place, in their honor, with suitable historical inscriptions, embracing a notice of the ancestry of each, with facts touching his personal history, the date of settlement here, the town occupied or granted, the obstacles he overcame in making a home in a wilderness land, made of living and other particulars, together with a record of the distinguished names of his children, who completed the second generation of settlers, thus perpetuating the first steps necessary to a geographical history of the family.

It is already known to a large number of readers that the editor of this journal has spent several years in the attempt to recover all necessary particulars concerning the pioneer English settlers in the western section of this noble valley of Annapolis, with the view to place their toils, struggles, hopes, wishes, histories, and merits on record. In this work he has not been entirely unsuccessful, and he hereby offers to furnish suitable inscriptions for the monuments referred to of free charge, to all who may desire them.

More than one hundred of these monuments would be erected within the next ten years. The expense to each family thus inclined to promote the memory by recording the merits of their common ancestors, would not be felt by them if each descendant would contribute the small sum of five cents. But they would not alone possess a valuable record in these monuments; they would in themselves become valuable public records in our leading cemeteries as well as public records. We may continue the subject next week as our columns to-day are so filled with other matter as to leave us no room to elaborate the subject further. In the meantime let the reader remember the old saw which so truthfully says, "He that careth not for ancestry deserves not to be cared for by posterity."

Local and Other Matter.

The funeral of the late Judge James, was one of the largest ever seen in Dartmouth.

The funeral of the late Robert Hill Young, takes place to-day from his late residence at Bellisle.

CHERRY.—Thanks to F. W. Harris Esq., for the stalks of cherry sent. They were a yard in length nearly half of which was finely blushed.

The Gold Hunter has concluded the first year of its existence and is a healthy business. May it escape the ills incident to a more advanced career.

South Unkitch gold mine show prospect of a coming boom—the Thompson area having already been proved equal to the Withrow area.

Call at J. W. Beckwith's and see the best value in Chatham. Over 1000 coats over looked at. Fits perfect.

A large quantity of considerable tonnage will soon be placed in frame on Digby Neck with a view to launching in the coming spring. She will be captained by Morton, the son of a native of this county.

Mr. Rupert Willet, of Granville, has sold his stud, Hamilton Prince, to David Lamberton, of Digby county, for \$200. This is about the highest figure paid for a horse sold in this county that we have heard of.

Mrs. J. G. H. Parker, will please accept the thanks of the editor for the magnificent garden rose in full bloom which she sent him yesterday. We never before saw so fine a rose in bloom after the autumnal equinox.

Sam Johnson, the thief who robbed the Shubenacadie post office a while ago, has just had his trial at Windsor, and having been found guilty has been sentenced to nine years in the penitentiary.

Mr. William Miller, of Clarence West, laid an apple of the Gravenstein variety, on our table on Friday, which measured 12 inches around and weighed 15 ounces. It is seldom we have seen a larger and finer formed or colored specimen.

A strong feeling is gaining ground in favor of creating a Department of Marriage and Divorce for the Dominion of Canada. It is a wonder that such a court has not long since been created. The time of parliament could be better employed than in the hearing of divorce applications.

As it requires a large quantity of Fresh Eggs to fill my contract I will pay for the next two weeks 20 cents per dozen, for Strictly Fresh Eggs. This offer will only be good for 2 weeks from this date. J. W. Beckwith.

The Bridgewater Enterprise says that two iron bridges for the N. S. C. Railway have arrived at that port and will at once be put in place—one at Liverpool and one at Kintola. It is confidently stated that an engine will pass over the entire line about the 10th prox.

Mr. W. V. Foster, of this town, sent to our office, one last week, a sample of peaches, produced in his fruit garden, for which he owes our thanks. They were of fair size, fully ripened, and of most delicious flavor, proving once more, if proof were necessary, that the peaches in the world can excel those raised in this province for superior flavor and general excellence.

GOLD RETURNS.—We learn from the Gold Hunter of the 21st inst., that the Metals Gold Mining Company's property has yielded the amount of 1229 ounces of the precious metal within the four months included between May 25th and September 25th of the current year. The value may be placed at \$24,000. The tonnage of ore crushed was 262, which yielded somewhat over two ounces of gold to the ton.

OUR.—Mrs. Crosskill, wife of Herbert Crosskill, Esq., Dy. Provincial Secretary, late Joseph F. Allison, Esq., of this place, died at Halifax, on Friday, after a long and very painful illness. She remains were brought to Sackville and interred on Sunday. Mrs. Crosskill was greatly beloved for her amiable and gentle character. She was a devoted wife and mother.

Mining operations were commenced on a southern spur of the North mountain about four miles north-west of Bridgewater on Friday, by Colonel Hatley of Cambridge, N. J., whose name has on several occasions been referred to in this journal. He has obtained leases of land, in which to mine for iron, from a number of owners in Granville, and has secured the services of David Archibald, late of Guysborough County, as foreman of operations. We hope to be able in a few weeks to report successful results.

On the successful completion of the burning of the second kiln in the brick yard, Messrs. Alden and Charles Walker, left for their home on Tuesday morning last. Whilst absent Mr. W. has not only proved his skill in the manufacture of a very fine article of brick, but has, by his social and many other good qualities, caused us to regret his leaving. Mr. W. goes, we understand, to take charge of a very large establishment for the manufacture of brick in the vicinity of Bridgewater, his native home.—Gold Hunter.

A Trip to the Eastward.

Returned to have a few days' vacation the writer, hurriedly packing, and starting on his trip to the Eastward, on Wednesday last, by the N. S. C. Railway.

It would appear from the most casual observer that the city by the sea has improved in late years in a business point of view. There is a more hopeful spirit abroad among its merchants and general dealers. The introduction of the electric light and telephone systems; the horse railway, and other kindred improvements, are tokens that Halifax has reached a stage in her progress which is indicative of the necessity of pushing and enterprise in the conduct of its affairs.

The Dry Dock, now nearly complete, is a huge structure and must have consumed thousands and thousands of tons of cement and iron in its construction. Many of the most valuable of the city's resources are being expended in the construction of this structure. The introduction of a new and younger generation of men, who are more energetic and more enterprising, is a fact which will do more to stimulate its business activity.

Disasters.

A disastrous fire occurred at Shelburne, N. S., last Tuesday, destroying Ebering's saw mill, and a large quantity of stock and materials, a barn belonging to C. S. McGill, and a barn belonging to Captain McGill.

Accidents.

A narrow gauge, with precipitous cliffs of high land on either side. A stream of water, several weeks without rain, had gathered in the narrow drift, over which a rude bridge had been thrown. A long wall of the foot of the gorge led to a fall, which is worth visiting. At the fall a succession of rustic steps, intended to assist the bright, there you only sensation is one of weariness, and you are glad to descend to the foot of the falls and rest for a while on a rustic seat.

A narrow gauge, with precipitous cliffs of high land on either side. A stream of water, several weeks without rain, had gathered in the narrow drift, over which a rude bridge had been thrown. A long wall of the foot of the gorge led to a fall, which is worth visiting. At the fall a succession of rustic steps, intended to assist the bright, there you only sensation is one of weariness, and you are glad to descend to the foot of the falls and rest for a while on a rustic seat.
