Many suppose it is impossible to have a good practical paper printed outside of certain cities. We simply ask such to send for a specimen copy of the Ricondera, (sent free to all applicants.) and let it speak for itself. We think it will satisfy you that a person can be practically engaged in this business, and vet oat a p esentable paper. Over one thousand testinonials re cived the proent year, claim for it the best paper extant on Front Growing, Flowers, and the Kitchen Garden. One prominent horiculturist writes us: "The Ricondera grow better and better—It is filled brim full of practical multiple fractical subjects as an egg with meat"
