

CAPITAL AND LABOUR.

pital is simply the savings of previous labour and is useful in sustaining present and future labour.

Capital, therefore, is produced by labour. Labour is simply toilsome work, which is generally performed under the direction of bosses or task-masters, and is rewarded by drafts on the fruits of previous labour or Capital.

The custodians of Capital may abuse their position and grind the faces of labourers; and, labourers may form trades-unions and organize strikes; but, labour and capital will not quarrel any more than a man will quarrel with his meals.
