# **SALES OF STOCKS** AT CONCESSIONS

Guaranteed Securities May Be Dealt in Without Minimum Restriction.

NEW YORK, Oct. 13.—All parts of the country are enquiring of Wall street oncerning the prospects for the establishment of official quotations on stocks. and the probable time of the reopening of the exchange. The exchange ruled today that it will permit dealings among members in listed guaranteed stocks at members in isted guaranteed stocks at price concessions, but it was said that in all probability no quotations would be given officially until the stock market resumes operations. When that will be is no clearer than when the market was closed two and one-half months ago.

It was said generally in the financial district that more depended upon the outcome of the application of the eastern railroads for a freight rate increase than any other factor, excepting perhaps the duration of the European war. In the view of Wall street, the existing railroad situation has passed beyond the road situation has passed beyond the question of valuation of railroad holdings, and has become merged with every phase of business. This is the view which is to be presented to the interstate commerce commerced with every commerce commerced to the interstate commerced commerced to the interstate commerced to the interstate commerced commerced to the interstate com state commerce commission when the railroads next week again state their case in Washington.

case in Washington.

Wall Street's View.

Recognized authorities on economics and finance have been engaged by the railroads to present their arguments to the interstate commerce commission. The depreciation of railroad securities it is argued, affects not only the railroads themselves, but also the investing public, and all classes of semi-public institutions, such as savings banks, insurance companies and colleges, whose investments in large part are placed in transportation companies. To re-establish public confidence in these investments the first essential, in Wall street opinion, is an increase in freight rates. Should the increase be granted, it was said, a long step will have been taken toward re-establishment of normal conditions, and would naturally lead to the reopening of the stock exchange.
